Preface V

List of Contributors XIII

Part One Cell–Matrix Junctions

1 The Ins and Outs of Integrin Signaling 3

Asoka Banno and Mark H. Ginsberg

- 1.1 General Overview 3
- 1.1.1 Integrin Receptors 3
- 1.1.2 Functions 4
- 1.2 Integrin Activation 5
- 1.2.1 Definition 5
- 1.2.1.1 Platelets 6
- 1.2.1.2 Leukocytes 6
- 1.2.2 Structural Basis of Activation 6
- 1.2.2.1 Extracellular Rearrangements 7
- 1.2.2.2 Transmembrane Propagation 7
- 1.2.2.3 Intracellular Rearrangements 8
- 1.2.2.4 Interactions at the Integrin Cytoplasmic Domains 9
- 1.2.3 Regulation of Integrin Activation 13
- 1.2.4 Future Research Directions 16
- References 18

2 Integrin Signaling Through Focal Adhesion Kinase 25

Youngdong Yoo and Jun-Lin Guan

- 2.1 Introduction 25
- 2.2 Structure of FAK 26
- 2.3 Regulation of FAK Activity 28
- 2.3.1 Activation of FAK 28
- 2.3.2 Inhibition of FAK Activity 30
- 2.4 Regulation of Cellular Functions by FAK Signaling Pathways 30
- 2.4.1 Cell Adhesion and Spreading 31
- 2.4.2 Cell Migration and Invasion 32

2.4.3	Cell Survival and Proliferation	36
2.5	Recent Analysis of FAK Functions <i>In Vivo</i>	37
2.6	Conclusions	39
	Acknowledgment	39
	References	39
3	The Paxillin Family and Tissue Remodeling	47
	<i>David A. Tumbarello and Christopher E. Turner</i>	
3.1	Focal Adhesions and the Paxillin Superfamily	47
3.1.1	Focal Adhesions	47
3.1.2	The Paxillin Superfamily	49
3.1.3	Structure of Paxillin	50
3.1.4	Structure of Hic-5	51
3.2	The Paxillin Superfamily and Tissue Remodeling	52
3.2.1	Epithelial-Mesenchymal Transformation	52
3.2.2	Integrin-Mediated Signaling and EMT	53
3.2.3	Paxillins α and δ in EMT	56
3.2.4	Hic-5 and EMT	58
	References	60
4	Adhesion Dynamics in Motile Cells	71
	<i>Christa L. Cortesio, Keefe T. Chan, and Anna Huttenlocher</i>	
4.1	Introduction	71
4.2	Focal Adhesion Dynamics	72
4.2.1	Focal Adhesion Composition	73
4.2.2	Mechanisms of Focal Adhesion Assembly	74
4.2.2.1	Rho GTPases	75
4.2.2.2	Talin and Phosphoinositides	75
4.2.3	Mechanisms of Focal Adhesion Disassembly	75
4.2.3.1	Calpain	76
4.2.3.2	Tyrosine Phosphorylation and Contractile Machinery	76
4.3	Podosome and Invadopodia Dynamics	76
4.3.1	Podosome and Invadopodia Architecture	77
4.3.2	Molecular Mechanisms of PTA Assembly	78
4.3.2.1	Actin Regulatory Proteins	78
4.3.2.2	Rho GTPases	79
4.3.2.3	Signaling Molecules	79
4.3.3	Molecular Mechanisms of PTA Disassembly	80
4.4	Summary	80
	Acknowledgments	81
	References	81
5	Integrin Trafficking	89
	<i>Susan E. LaFlamme, Feng Shi, and Jane Sottile</i>	
5.1	Introduction	89

5.2	Historical Perspective	89
5.3	Clathrin versus Lipid Rafts	90
5.4	Internalization of Occupied versus Unoccupied Integrins	91
5.5	Regulation of Integrin Trafficking	92
5.6	The Role of Integrin Cytoplasmic Domains	94
5.7	Integrin-Dependent Endocytosis of Microbial Pathogens	95
5.8	Regulation of Cell Adhesion and Migration by Integrin Trafficking	96
5.9	The Regulation of Integrin Trafficking by Cell Adhesion	96
5.10	Integrin Trafficking and ECM Remodeling	98
5.11	Conclusions	100
	Acknowledgments	101
	References	101
6	Hemidesmosomes and their Components: Adhesion versus Signaling in Health and Disease	109
	<i>Kristina Kligys, Kevin Hamill, and Jonathan C. R. Jones</i>	
6.1	Introduction	109
6.2	The Structural Components of the Hemidesmosome	110
6.2.1	The Plaque Proteins	110
6.2.1.1	Plectin	110
6.2.1.2	BP230	112
6.2.2	Membrane Elements	112
6.2.2.1	$\alpha 6 \beta 4$ Integrin	112
6.2.2.2	BP180	114
6.2.2.3	CD151	115
6.3	Laminin-332	115
6.4	Hemidesmosome Assembly and Disassembly	116
6.5	Hemidesmosomes and Disease	118
6.5.1	Inherited Skin Diseases Involving Hemidesmosome Proteins	118
6.5.1.1	Disease Involving $\alpha 6 \beta 4$ Integrin	118
6.5.1.2	Disease Involving Plectin	119
6.5.1.3	Disease Involving BP180	119
6.5.1.4	Disease Involving CD151	120
6.5.1.5	Disease Involving Laminin-332	120
6.5.2	Autoimmune Diseases Associated with Hemidesmosomes	121
6.5.2.1	BP and Related Diseases	121
6.5.2.2	Cicatricial Pemphigoid	122
6.5.2.3	Autoimmune Diseases Involving $\alpha 6 \beta 4$ Integrin	122
6.6	$\alpha 6 \beta 4$ Integrin and Laminin-332 Expression in Cancer	123
6.7	Signaling by the $\alpha 6 \beta 4$ Integrin in Pathological States and Wound Healing	123
6.8	Laminin-332, $\alpha 6 \beta 4$ Integrin and Migration	125
6.9	Conclusions	126
	References	126

7	Cell Matrix Adhesion in Three Dimensions	135
	<i>Patricia J. Keely</i>	
7.1	Introduction	135
7.2	Model 3D Matrices for Investigations of Cell Behavior	136
7.2.1	Matrigel/Reconstituted Basement Membrane (rBM)	136
7.2.2	Collagen Gels	136
7.2.3	Fibrin Gels	138
7.2.4	Cell-Derived Fibronectin-Based Matrices	138
7.2.5	Engineered 3D Matrices and Microfluidic Chambers	138
7.3	Cell Behavior and Adhesive Structures Differ between 3D and 2D Matrices	139
7.4	"Compliancy" or Elastic Modulus Determines Cellular Response to ECMs	140
7.4.1	Cellular Contractility and the Response to Matrix Compliance	141
7.4.2	Rho Regulates the Cytoskeleton and Contractility	141
7.4.3	Rho/ROCK, Contractility, and Focal Adhesion Formation	142
7.4.4	Focal Adhesions as Transducers of Biophysical Signals	143
7.5	A Model for Cellular Response to 3D Matrices Varying in Compliance	144
	Acknowledgments	146
	References	146

Part Two Cell-Cell Junctions

8	Armadillo Repeat Proteins at Epithelial Adherens Junctions	153
	<i>Laura J. Lewis-Tuffin and Panos Z. Anastasiadis</i>	
8.1	Introduction	153
8.2	β -Catenin	156
8.3	Plakoglobin	158
8.4	p120-Catenin	159
8.5	The Role of Armadillo Repeat Proteins and AJs in Cancer	163
8.6	Conclusions	165
	References	165
9	Signaling To and Through The Endothelial Adherens Junction	169
	<i>Deana M. Ferreri and Peter A. Vincent</i>	
9.1	Introduction	169
9.2	Cadherins	170
9.2.1	VE-Cadherin Extracellular Domain	173
9.2.2	Interaction of Cadherin Cytoplasmic Domain and Catenins	174
9.2.2.1	VE-Cadherin Juxtamembrane Region and p120	174
9.2.2.2	VE-Cadherin Catenin Binding Domain	176
9.3	Phosphorylation and Junction Assembly/Disassembly	179
9.3.1	Tyrosine Phosphorylation of Endothelial AJ Proteins	180
9.3.2	Serine/Threonine Phosphorylation of Endothelial AJ Proteins	182
9.4	Small GTPases and Junction Assembly	183

9.4.1	Rho GTPases	183
9.4.2	Rap1 GTPase	186
9.5	Conclusions	187
	References	187
10	Gap Junctions: Connexin Functions and Roles in Human Disease	197
	<i>Michael Koval</i>	
10.1	Introduction	197
10.2	Connexin Structure and Assembly	198
10.3	Interactions Between Different Connexins	199
10.4	Connexin Binding Proteins and Phosphorylation	201
10.5	Channel Permeability and Signaling	202
10.6	Connexins in Human Disease	203
10.7	Role of Connexins in Vessel Inflammation and Atherosclerosis	206
10.8	Conclusions	207
	References	208
11	Tight Junctions in Simple and Stratified Epithelium	217
	<i>Cara J. Gottardi and Carlen M. Niessen</i>	
11.1	Introduction	217
11.2	Ultrastructure of Tight Junctions	218
11.3	Tight Junctions and Epithelial Barrier Function	219
11.3.1	Transmembrane Components	219
11.3.2	Scaffolding Proteins	221
11.3.3	Actin and Related Cytoskeleton Proteins	221
11.4	Regulation of Tight Junction Barrier Function	222
11.5	Tight Junctions and Epithelial Polarity	222
11.5.1	Par3/Par6/aPKC Complex	223
11.5.2	Crbs/Patj/Pals	223
11.5.3	Fence Function	224
11.6	Signaling from Tight Junctions: Coupling Junction Maturation to Transcription-Mediated Differentiation	225
11.7	Tight Junctions in Stratifying Epithelia	225
11.8	Tight Junctions and Disease	227
11.9	Concluding Remarks	228
	Acknowledgments	229
	References	229
12	Desmosomes in Development and Disease	235
	<i>Ansgar Schmidt and Peter J. Koch</i>	
12.1	Introduction	235
12.2	Molecular Composition of Desmosomes, Disease Associations, and Animal Models	236
12.2.1	Desmosomal Cadherins	236
12.2.2	Desmoplakin	240
12.3	Plakoglobin	240

- 12.4 Plakophilins 242
- 12.5 Accessory Desmosomal Proteins 243
- 12.6 Desmosomal Proteins in Embryonic Development 243
- 12.7 Concluding Remarks 244
- Acknowledgments 245
- References 245

13 Cadherin Trafficking and Junction Dynamics 251

Christine M. Chiasson and Andrew P. Kowalczyk

- 13.1 Introduction 251
- 13.2 Exocytosis and Polarized Sorting of Adherens Junction Proteins 252
- 13.3 Endocytosis of Adherens Junction Proteins 255
- 13.4 Catenin Regulation of Cadherin Endocytosis 258
- 13.5 Rho GTPase Regulation of Cadherin Endocytosis 261
- 13.6 Co-Regulation of Cadherin and Receptor Tyrosine Kinase Function by Endocytosis 262
- 13.7 Conclusions 264
- Acknowledgments 266
- References 266

Part Three Cell-Matrix and Cell-Cell Crosstalk

14 Crosstalk Between Cell-Cell and Cell-Matrix Adhesion 273

C. Michael DiPersio

- 14.1 Introduction 273
- 14.1.1 Coordinate Regulation of Cell-Cell and Cell-Matrix Adhesion 273
- 14.1.2 Crosstalk Between Integrins and Cadherins 274
- 14.2 Mechanisms of Integrin-Cadherin Crosstalk 275
- 14.2.1 Extracellular Proteolysis 275
- 14.2.2 Cross-Regulation of Gene Expression 277
- 14.2.3 Changes in Intracellular Force Generation 278
- 14.2.4 Integrin-Cadherin Associations at Sites of Cell Adhesion 279
- 14.2.5 Intracellular Signal Transduction Pathways 281
- 14.2.5.1 FAK: An Integrin Effector that Signals to Cadherins 282
- 14.2.5.2 Fer: A Tyrosine Kinase that Translocates between Cadherins and Integrins 282
- 14.2.5.3 Rap1: A Central Regulator of Integrin-Cadherin Crosstalk Pathways? 283
- 14.2.5.4 The Epidermis as a Model for Investigating Cadherin-Integrin Crosstalk 285
- 14.3 Future Prospects 286
- Acknowledgments 287
- References 287
