

Contents

Introduction to the series	7
Introduction to this book	9
Data compilation and coding	13
Categories for coding the ecological preferences	19
Acknowledgements	35
References	36
Ecological parameters	44
Species inventory	45
Ecoregional distribution	57
Endemism	79
Rare species	85
Red list	91
Stream zonation preference	97
Altitude preference (WFD) and altitude range	107
Microhabitat/substrate preference and habitat specialist	119
Hydrologic preference	133
Current preference	145
Temperature preference and temperature range preference	155

pH preference	161
Feeding type	167
Life duration	173
Larval development cycle	181
Emergence/flight period and duration of emergence period	189
Reproductive life cycles per year	201
References to the ecological parameters	213
Abbreviations	251
