

CONTENTS

Contributors	ix
Preface	xvii
Acknowledgments	xix
SECTION I: INTRODUCTORY CHAPTERS	
Chapter 1: Overview	3
<i>Shu Chien</i>	
Chapter 2: Perspectives of Biomechanics	13
<i>Yuan-Cheng B. Fung and Wei Huang</i>	
SECTION II: CARDIOVASCULAR BIOENGINEERING	
Chapter 3: Cardiac Electromechanics in the Healthy Heart	37
<i>Roy C. P. Kerckhoffs and Andrew D. McCulloch</i>	
Chapter 4: Cardiac Biomechanics and Disease	53
<i>Jeffrey H. Omens</i>	
Chapter 5: Bioengineering Solutions for the Treatment of Heart Failure	69
<i>John T. Watson and Shu Chien</i>	
Chapter 6: Molecular Basis of Modulation of Vascular Functions by Mechanical Forces	79
<i>Shu Chien</i>	
Chapter 7: Autoregulation of Blood Flow: Examining the Process of Scientific Discovery	99
<i>Paul C. Johnson</i>	
SECTION III: BLOOD CELL BIOENGINEERING	
Chapter 8: Molecular Basis of Cell and Membrane Mechanics	117
<i>Lanping Amy Sung</i>	
Chapter 9: Cell Activation in the Circulation: The Auto-Digestion Hypothesis	131
<i>Geert W. Schmid-Schönbein</i>	

Chapter 10: Blood Substitutes and the Design of Oxygen Non-Carrying and Carrying Fluids	149
--	-----

Marcos Intaglietta

SECTION IV: RESPIRATORY-RENAL BIOENGINEERING

Chapter 11: Analysis of Human Pulmonary Circulation: A Bioengineering Approach	163
---	-----

Wei Huang, Michael R. T. Yen and Qinlian Zhou

Chapter 12: Pulmonary Gas Exchange	181
---	-----

Peter D. Wagner

Chapter 13: Engineering Approaches to Understanding the Kidney	209
---	-----

Scott C. Thomson

SECTION V: TISSUE ENGINEERING AND REGENERATIVE MEDICINE

Chapter 14: Skeletal Muscle Tissue Bioengineering	225
--	-----

Richard L. Lieber and Samuel R. Ward

Chapter 15: Multi-Scale Biomechanics of Articular Cartilage	243
--	-----

Won C. Bae and Robert L. Sah

Chapter 16: Design and Development of an <i>In Vivo</i> Force-Sensing Knee Prosthesis	261
--	-----

Darryl D. D'Lima and Peter C. Y. Chen

Chapter 17: The Implantable Glucose Sensor in Diabetes: A Bioengineering Case Study	279
--	-----

David A. Gough

Chapter 18: Stem Cells in Regenerative Medicine	291
--	-----

Shu Chien and Lawrence S. B. Goldstein

SECTION VI: NANOSCIENCE AND NANOTECHNOLOGY

Chapter 19: Engineering Compounds Targeted to Vascular Zip Codes	313
---	-----

Erkki Ruoslahti

- Chapter 20:** The Structure of the Central Nervous System and Nanoengineering Approaches for Studying and Repairing It 327

Gabriel A. Silva

- Chapter 21:** Cellular Biophotonics: Laser Scissors (Ablation) 353

Michael W. Berns

- Chapter 22:** Microelectronic Arrays: Applications from DNA Hybridization Diagnostics to Directed Self-Assembly Nanofabrication 369

Michael J. Heller and Dietrich Dehlinger

SECTION VII: GENOMIC ENGINEERING AND SYSTEMS BIOLOGY

- Chapter 23:** Systems Biology: A Four-Step Process 387

Jennifer L. Reed and Bernhard O. Palsson

- Chapter 24:** Bioinformatics and Systems Biology: Obtaining the Design Principles of Living Systems 401

Shankar Subramaniam

- Chapter 25:** Synthetic Biology: Bioengineering at the Genomic Level 427

Natalie Ostroff, Mike Ferry, Scott Cookson, Tracy Johnson and Jeff Hasty

- Chapter 26:** Network Genomics 453

Trey Ideker

- Chapter 27:** Genomes, Genomic Technologies and Medicine 473

Xiaohua Huang

SECTION VIII: SOCIO-ECONOMICAL ASPECTS OF BIOENGINEERING

- Chapter 28:** Ethics for Bioengineers 489

Michael Kalichman

- Chapter 29:** Opportunities and Challenges in Bioengineering Entrepreneurship 507

Jen-Shih Lee

- Chapter 30:** How to Move Medical Devices from Bench to Bedside 521

Paul Citron

- Index** 533
