

Preface	v
Acknowledgments	x
Orientation to the Laboratory: Rules of Conduct and General Safety	xi
Summary of Universal Precautions and Laboratory Safety Procedures	xiii

PART ONE

Microscopic Techniques

1. Bright-Field Light Microscope and Microscopic Measurement of Organisms	2
2. The Hanging Drop Slide and Bacterial Motility	15
3. Dark-Field Light Microscope	19
4. Phase-Contrast Light Microscope	23
5. Fluorescence Microscope	29

PART TWO

Bacterial Morphology and Staining

6. Negative Staining	34
7. Smear Preparation and Simple Staining	39
8. Gram Stain	45
9. Acid-Fast Staining (Ziehl-Neelsen and Kinyoun) Procedures	53
10. Endospore Staining (Schaeffer-Fulton or Wirtz-Conklin)	59
11. Capsule Staining	65
12. Flagella Staining: West and Difco's SpotTest Methods	71

PART THREE

Basic Laboratory and Culture Techniques

13. Microbiological Culture Media Preparation and Sterilization	78
14. Culture Transfer Instruments, Techniques, and Isolation and Maintenance of Pure Cultures	85
15. Spread-Plate Technique	95
16. The Streak-Plate Technique and Differential Media	101

17. Pour-Plate Technique	107
18. Cultivation of Anaerobic Bacteria	111
19. Determination of Bacterial Numbers	119

PART FOUR

Biochemical Activities of Bacteria

20. Carbohydrates I: Fermentation and β -Galactosidase Activity	128
21. Carbohydrates II: Triple Sugar Iron Agar Test	135
22. Carbohydrates III: Starch Hydrolysis	141
23. Lipids: Lipid Hydrolysis	145
24. Proteins, Amino Acids, and Enzymes I: Hydrogen Sulfide Production and Motility	149
25. Proteins, Amino Acids, and Enzymes II: The IMViC Tests	155
26. Proteins, Amino Acids, and Enzymes III: Casein Hydrolysis	163
27. Proteins, Amino Acids, and Enzymes IV: Gelatin Hydrolysis	167
28. Proteins, Amino Acids, and Enzymes V: Catalase Activity	171
29. Proteins, Amino Acids, and Enzymes VI: Coagulase and DNase Activity	175
30. Proteins, Amino Acids, and Enzymes VII: Oxidase Test	181
31. Proteins, Amino Acids, and Enzymes VIII: Urease Activity	187
32. Proteins, Amino Acids, and Enzymes IX: Lysine and Ornithine Decarboxylase Test	193
33. Proteins, Amino Acids, and Enzymes X: Phenylalanine Deamination	199
34. Proteins, Amino Acids, and Enzymes XI: Nitrate Reduction	205

PART FIVE

Rapid Multitest Systems

35. The API 20E System	212
36. The Enterotube II System	219

PART SIX

Unknown Identification

- 37. Using the First Edition of *Bergey's Manual of Systematic Bacteriology* to Identify Bacteria228
- 38. General Unknown233

PART SEVEN

Environmental Factors Affecting Growth of Microorganisms

- 39. Temperature242
- 40. pH247
- 41. Osmotic Pressure251
- 42. The Effects of Chemical Agents on Bacteria I: Disinfectants255
- 43. The Effects of Chemical Agents on Bacteria II: Antimicrobial Agents (Kirby-Bauer Method)261
- 44. Hand Washing, Environmental Sampling, and Microbiological Monitoring267
- 45. Determination of a Bacterial Growth Curve: Classical and Two-Hour Methods275

PART EIGHT

Environmental and Food Microbiology

- 46. Standard Coliform Most Probable Number (MPN) Test and Presence-Absence Coliform Test289
- 47. Membrane Filter Technique for Coliforms and Fecal Streptococci; KONFIRM Test for Fecal Coliforms295
- 48. Isolation of *Escherichia coli* Bacteriophages from Sewage and Determining Bacteriophage Titers303
- 49. Enumeration of Soil Microorganisms309
- 50. Bacterial Count of a Food Product315
- 51. Examination of Milk for Bacteria319

PART NINE

Medical Microbiology

- 52. Agglutination Reactions: Blood Groups327
- 53. Isolation of Normal Microbiota from the Human Body333

- 54. Staphylococci339
- 55. Pneumococci347
- 56. Streptococci353
- 57. Neisseriae361
- 58. Aerobic and Anaerobic Endospore-Forming Bacteria367

PART TEN

Survey of Selected Eucaryotic Microorganisms

- 59. Fungi I: Yeasts374
- 60. Fungi II: Phycomycetes, Ascomycetes, and Basidiomycetes379

PART ELEVEN

Microbial Genetics and Genomics

- 61. Bacterial Mutation388
- 62. Bacterial Transformation393
- 63. Bacterial Conjugation: The Transfer of Antibiotic-Resistant Plasmids399
- 64. Isolation of Genomic DNA from *Saccharomyces cerevisiae*405
- 65. Isolation and Purification of Genomic DNA from *Escherichia coli*409
- 66. Identifying Archaea and Bacteria Using the Internet and Computer-Assisted Gene Analysis415

Appendix A Dilutions with Sample Problems 423

Appendix B Metric and English Measurement Equivalents 433

Appendix C Transmission-Absorbance Table for Spectrophotometry 435

Appendix D Logarithms 436

Appendix E pH and pH Indicators 437

Appendix F Scientific Notation 438

Appendix G Identification Charts 440

Appendix H Reagents, Solutions, Stains, and Tests 444

Appendix I Culture Media 447

Appendix J Sources and Maintenance of Microbiological Stock Cultures 453

Index 457
