About the Authors xxii

Part I Introduction to Microbiology

- 1 The History and Scope of Microbiology 1**
 - 1.1 The Discovery of Microorganisms 2
 - 1.2 The Conflict over Spontaneous Generation 2
 - 1.3 The Role of Microorganisms in Disease 7
 - Techniques & Applications 1.1: The Scientific Method 9
 - Disease 1.2: Molecular Koch's Postulates 10
 - 1.4 Industrial Microbiology and Microbial Ecology 11
 - 1.5 Members of the Microbial World 11
 - 1.6 The Scope and Relevance of Microbiology 12
 - 1.7 The Future of Microbiology 14
- 2 The Study of Microbial Structure: Microscopy and Specimen Preparation 17**
 - 2.1 Lenses and the Bending of Light 18
 - 2.2 The Light Microscope 18
 - 2.3 Preparation and Staining of Specimens 26
 - 2.4 Electron Microscopy 30
 - 2.5 Newer Techniques in Microscopy 35
- 3 Prokaryotic Cell Structure and Function 39**
 - 3.1 An Overview of Prokaryotic Cell Structure 40
 - Microbial Diversity & Ecology 3.1: Monstrous Microbes 43
 - 3.2 Prokaryotic Cell Membranes 44
 - 3.3 The Cytoplasmic Matrix 47
 - 3.4 The Nucleoid 50
 - Microbial Diversity & Ecology 3.2: Living Magnets 51
 - 3.5 The Prokaryotic Cell Wall 52
 - 3.6 Protein Secretion in Prokaryotes 59
 - 3.7 Components External to the Cell Wall 61
 - 3.8 Chemotaxis 67
 - 3.9 The Bacterial Endospore 68
- 4 Eucaryotic Cell Structure and Function 73**
 - 4.1 An Overview of Eucaryotic Cell Structure 75
 - 4.2 The Cytoplasmic Matrix, Microfilaments, Intermediate Filaments, and Microtubules 76
 - 4.3 The Endoplasmic Reticulum 78
 - 4.4 The Golgi Apparatus 78
 - 4.5 Lysosomes and Endocytosis 79
 - 4.6 Eucaryotic Ribosomes 82

- 4.7 Mitochondria 82
- 4.8 Chloroplasts 84
- Microbial Diversity & Ecology 4.1: The Origin of the Eucaryotic Cell 84
- 4.9 The Nucleus and Cell Division 85
- 4.10 External Cell Coverings 88
- 4.11 Cilia and Flagella 88
- 4.12 Comparison of Prokaryotic and Eucaryotic Cells 90

Part II Microbial Nutrition, Growth, and Control

- 5 Microbial Nutrition 93**
 - 5.1 The Common Nutrient Requirements 94
 - 5.2 Requirements for Carbon, Hydrogen, and Oxygen 94
 - 5.3 Nutritional Types of Microorganisms 95
 - 5.4 Requirements for Nitrogen, Phosphorus, and Sulfur 96
 - 5.5 Growth Factors 96
 - 5.6 Uptake of Nutrients by the Cell 98
 - 5.7 Culture Media 102
 - Historical Highlights 5.1: The Discovery of Agar as a Solidifying Agent and the Isolation of Pure Cultures 103
 - 5.8 Isolation of Pure Cultures 104
 - Techniques & Applications 5.2: The Enrichment and Isolation of Pure Cultures 105
- 6 Microbial Growth 109**
 - 6.1 The Growth Curve 110
 - 6.2 Measurement of Microbial Growth 114
 - 6.3 The Continuous Culture of Microorganisms 117
 - 6.4 The Influence of Environmental Factors on Growth 118
 - Microbial Diversity & Ecology 6.1: Life above 100°C 124
 - 6.5 Microbial Growth in Natural Environments 128
- 7 Control of Microorganisms by Physical and Chemical Agents 133**
 - 7.1 Definition of Frequently Used Terms 134
 - Techniques & Applications 7.1: Safety in the Microbiology Laboratory 134
 - 7.2 The Pattern of Microbial Death 135
 - 7.3 Conditions Influencing the Effectiveness of Antimicrobial Agent Activity 136
 - 7.4 The Use of Physical Methods in Control 136
 - Techniques & Applications 7.2: Universal Precautions for Microbiology Laboratories 142
 - 7.5 The Use of Chemical Agents in Control 142
 - 7.6 Evaluation of Antimicrobial Agent Effectiveness 146

Part III

Microbial Metabolism

8 Metabolism: Energy, Enzymes, and Regulation 149

- 8.1 Energy and Work 150
- 8.2 The Laws of Thermodynamics 151
- 8.3 Free Energy and Reactions 152
- 8.4 The Role of ATP in Metabolism 153
- 8.5 Oxidation-Reduction Reactions and Electron Carriers 153
- 8.6 Enzymes 156
- 8.7 The Nature and Significance of Metabolic Regulation 160
- 8.8 Metabolic Channeling 160
- 8.9 Control of Enzyme Activity 161

9 Metabolism: Energy Release and Conservation 167

- 9.1 An Overview of Metabolism 168
- 9.2 The Breakdown of Glucose to Pyruvate 171
- 9.3 Fermentations 174
- Historical Highlights 9.1: Microbiology and World War I 177
- 9.4 The Tricarboxylic Acid Cycle 178
- 9.5 Electron Transport and Oxidative Phosphorylation 179
- 9.6 Anaerobic Respiration 185
- 9.7 Catabolism of Carbohydrates and Intracellular Reserve Polymers 186
- 9.8 Lipid Catabolism 187
- 9.9 Protein and Amino Acid Catabolism 188
- 9.10 Oxidation of Inorganic Molecules 188
- Microbial Diversity & Ecology 9.2: Acid Mine Drainage 190
- 9.11 Photosynthesis 190

10 Metabolism: The Use of Energy in Biosynthesis 199

- 10.1 Principles Governing Biosynthesis 200
- Techniques & Applications 10.1: The Identification of Anabolic Pathways 202
- 10.2 The Photosynthetic Fixation of CO_2 202
- 10.3 Synthesis of Sugars and Polysaccharides 203
- 10.4 The Assimilation of Inorganic Phosphorus, Sulfur, and Nitrogen 205
- 10.5 The Synthesis of Amino Acids 209
- 10.6 Anaplerotic Reactions 209
- 10.7 The Synthesis of Purines, Pyrimidines, and Nucleotides 211
- 10.8 Lipid Synthesis 214
- 10.9 Peptidoglycan Synthesis 216
- 10.10 Patterns of Cell Wall Formation 217

Part IV

Microbial Molecular Biology and Genetics

11 Genes: Structure, Replication, and Mutation 221

- 11.1 DNA as Genetic Material 222
- 11.2 Nucleic Acid Structure 224
- Historical Highlights 11.1: The Elucidation of DNA Structure 227

- 11.3 DNA Replication 229
- 11.4 The Genetic Code 234
- 11.5 Gene Structure 235
- 11.6 Mutations and Their Chemical Basis 239
- 11.7 Detection and Isolation of Mutants 245
- 11.8 DNA Repair 248

12 Genes: Expression and Regulation 253

- 12.1 DNA Transcription or RNA Synthesis 254
- Microbial Tidbits 12.1: Catalytic RNA (Ribozymes) 259
- 12.2 Protein Synthesis 260
- 12.3 Regulation of mRNA Synthesis 270
- Historical Highlights 12.2: The Discovery of Gene Regulation 272
- 12.4 Attenuation 274
- 12.5 Global Regulatory Systems 276
- 12.6 Small RNAs and Regulation 278
- 12.7 Two-Component Phosphorelay Systems 279
- 12.8 Control of the Cell Cycle 280

13 Microbial Recombination and Plasmids 285

- 13.1 Bacterial Recombination: General Principles 286
- 13.2 Bacterial Plasmids 288
- Disease 13.1: Virulence Plasmids 291
- 13.3 Transposable Elements 291
- 13.4 Bacterial Conjugation 296
- 13.5 DNA Transformation 299
- 13.6 Transduction 301
- 13.7 Mapping the Genome 306
- 13.8 Recombination and Genome Mapping in Viruses 307

Part V

DNA Technology and Genomics

14 Recombinant DNA Technology 311

- 14.1 Historical Perspectives 312
- 14.2 Synthetic DNA 315
- 14.3 The Polymerase Chain Reaction 316
- 14.4 Preparation of Recombinant DNA 319
- 14.5 Cloning Vectors 322
- 14.6 Inserting Genes into Eucaryotic Cells 326
- 14.7 Expression of Foreign Genes in Bacteria 327
- Techniques & Applications 14.1: Gene Expression and Kittyboo Colors 329
- 14.8 Applications of Genetic Engineering 329
- Techniques & Applications 14.2: Plant Tumors and Nature's Genetic Engineer 331
- 14.9 Social Impact of Recombinant DNA Technology 332

15 Microbial Genomics 335

- 15.1 Introduction 336
- 15.2 Determining DNA Sequences 336
- 15.3 Whole-Genome Shotgun Sequencing 336
- 15.4 Bioinformatics 339
- 15.5 General Characteristics of Microbial Genomes 339
- 15.6 Functional Genomics 345
- 15.7 The Future of Genomics 349

Part VI

The Viruses

- 16 The Viruses: Introduction and General Characteristics 351**
 - 16.1 Early Development of Virology 352
 - Historical Highlights 16.1: Disease and the Early Colonization of America 353
 - 16.2 General Properties of Viruses 353
 - 16.3 The Cultivation of Viruses 353
 - 16.4 Virus Purification and Assays 355
 - 16.5 The Structure of Viruses 358
 - 16.6 Principles of Virus Taxonomy 367
 - Microbial Tidbits 16.2: The Origin of Viruses 369
- 17 The Viruses: Bacteriophages 371**
 - 17.1 Classification of Bacteriophages 372
 - Microbial Diversity & Ecology 17.1: An Ocean of Viruses 372
 - 17.2 Reproduction of Double-Stranded DNA Phages: The Lytic Cycle 373
 - 17.3 Reproduction of Single-Stranded DNA Phages 378
 - 17.4 Reproduction of RNA Phages 379
 - 17.5 Temperate Bacteriophages and Lysogeny 380
- 18 The Viruses: Viruses of Eucaryotes 387**
 - 18.1 Classification of Animal Viruses 388
 - 18.2 Reproduction of Animal Viruses 388
 - Techniques & Applications 18.1: Constructing a Virus 396
 - 18.3 Cytocidal Infections and Cell Damage 398
 - 18.4 Persistent, Latent, and Slow Virus Infections 399
 - 18.5 Viruses and Cancer 400
 - 18.6 Plant Viruses 401
 - 18.7 Viruses of Fungi, Algae, and Protozoa 404
 - 18.8 Insect Viruses 404
 - 18.9 Viroids and Prions 405

Part VII

The Diversity of the Microbial World

- 19 Microbial Taxonomy and Phylogeny 409**
 - 19.1 General Introduction and Overview 410
 - 19.2 Microbial Evolution and Diversity 410
 - 19.3 Taxonomic Ranks 412
 - 19.4 Classification Systems 414
 - 19.5 Major Characteristics Used in Taxonomy 416
 - 19.6 Assessing Microbial Phylogeny 420
 - 19.7 The Major Divisions of Life 423
 - Microbial Diversity & Ecology 19.1: "Official" Nomenclature Lists—A Letter from Bergey's 428
 - 19.8 *Bergey's Manual of Systematic Bacteriology* 428
 - 19.9 A Survey of Prokaryotic Phylogeny and Diversity 431
- 20 The Archaea 437**
 - 20.1 Introduction to the Archaea 438
 - 20.2 Phylum *Crenarchaeota* 442
 - 20.3 Phylum *Euryarchaeota* 444
 - Microbial Diversity & Ecology 20.1: Methanotrophic Archaea 447
 - Microbial Tidbits 20.2: Photosynthesis in *Halobacterium salinarum* 450
- 21 Bacteria: The Deinococci and Nonproteobacteria Gram Negatives 453**
 - 21.1 *Aquificae* and *Thermotogae* 454
 - 21.2 *Deinococcus-Thermus* 455
 - 21.3 Photosynthetic Bacteria 456
 - Microbial Diversity & Ecology 21.1: The Mechanism of Gliding Motility 461
 - 21.4 Phylum *Planctomycetes* 464
 - 21.5 Phylum *Chlamydiae* 464
 - 21.6 Phylum *Spirochaetes* 466
 - 21.7 Phylum *Bacteroidetes* 469
- 22 Bacteria: The Proteobacteria 473**
 - 22.1 Class *Alphaproteobacteria* 474
 - 22.2 Class *Betaproteobacteria* 482
 - 22.3 Class *Gammaproteobacteria* 485
 - Microbial Diversity & Ecology 22.1: Bacterial Bioluminescence 492
 - 22.4 Class *Deltaproteobacteria* 495
 - 22.5 Class *Epsilonproteobacteria* 500
- 23 Bacteria: The Low G + C Gram Positives 503**
 - 23.1 General Introduction 504
 - 23.2 Class *Mollicutes* (the Mycoplasmas) 504
 - 23.3 Low G + C Gram-Positive Bacteria in *Bergey's Manual* 507
 - 23.4 Class *Clostridia* 508
 - Microbial Tidbits 23.1: Spores in Space 509
 - 23.5 Class *Bacilli* 511
- 24 Bacteria: The High G + C Gram Positives 521**
 - 24.1 General Properties of the Actinomycetes 522
 - 24.2 High G + C Gram-Positive Bacteria in *Bergey's Manual* 524
 - 24.3 Suborder *Actinomycineae* 526
 - 24.4 Suborder *Micrococcineae* 527
 - 24.5 Suborder *Corynebacterineae* 528
 - 24.6 Suborder *Micromonosporineae* 529
 - 24.7 Suborder *Propionibacterineae* 531
 - 24.8 Suborder *Streptomycineae* 531
 - 24.9 Suborder *Streptosporangineae* 533
 - 24.10 Suborder *Frankineae* 533
 - 24.11 Order *Bifidobacteriales* 534
- 25 The Fungi (Eumycota), Slime Molds, and Water Molds 537**
 - 25.1 Distribution 538
 - 25.2 Importance 539
 - 25.3 Structure 539
 - 25.4 Nutrition and Metabolism 541
 - 25.5 Reproduction 542
 - 25.6 Characteristics of the Fungal Divisions 543
 - 25.7 Slime Molds and Water Molds 548

26 The Algae 553

- 26.1 Distribution of Algae 555
- 26.2 Classification of Algae 555
- 26.3 Ultrastructure of the Algal Cell 556
- 26.4 Algal Nutrition 556
- 26.5 Structure of the Algal Thallus (Vegetative Form) 556
- 26.6 Algal Reproduction 556
- 26.7 Characteristics of the Algal Divisions 557
- Techniques & Applications 26.1: Practical Importance of Diatoms 560
- Disease 26.2: Toxic Algal Blooms 562

27 The Protozoa 565

- 27.1 Distribution 566
- 27.2 Importance 566
- 27.3 Morphology 566
- 27.4 Nutrition 567
- 27.5 Encystment and Excystment 568
- 27.6 Locomotory Organelles 568
- 27.7 Reproduction 568
- 27.8 Classification 568
- 27.9 Representative Types 569
- Microbial Diversity & Ecology 27.1: The Importance of Foraminiferans 572

Part VIII**Ecology and Symbiosis****28 Microorganism Interactions and Microbial Ecology 577**

- 28.1 Foundations of Microbial Ecology 578
- 28.2 Microbial Interactions 578
- Microbial Diversity & Ecology 28.1: Microbial Ecology Versus Environmental Microbiology 579
- Microbial Diversity & Ecology 28.2: Coevolution of Animals and Their Gut Microbial Communities 584
- 28.3 Nutrient Cycling Interactions 593
- 28.4 The Physical Environment 602
- Techniques & Applications 28.3: Thermophilic Microorganisms and Modern Biotechnology 607
- 28.5 Microbial Ecology and Its Methods: An Overview 607

29 Microorganisms in Aquatic Environments 615

- 29.1 Aquatic Environments and Microorganisms 616
- Disease 29.1: New Agents in Medicine—The Sea as the New Frontier 617
- 29.2 The Microbial Community 621
- 29.3 Marine Environments 624
- 29.4 Freshwater Environments 628
- 29.5 Waters and Disease Transmission 630
- Techniques & Applications 29.2: Waterborne Diseases, Water Supplies, and Slow Sand Filtration 632
- 29.6 Wastewater Treatment 636

- Disease 29.3: Sewage Sludge: Long-Term Concerns with Land and Water Disposal 641
- 29.7 Groundwater Quality and Home Treatment Systems 642

30 Microorganisms in Terrestrial Environments 645

- 30.1 Soils as an Environment for Microorganisms 646
- 30.2 Microorganisms in the Soil Environment 647
- 30.3 Microorganisms and the Formation of Different Soils 648
- 30.4 Soil Microorganism Associations with Vascular Plants 651
- Microbial Diversity & Ecology 30.1: Mycorrhizae and the Evolution of Vascular Plants 656
- 30.5 Soils, Plants, and Nutrients 662
- Microbial Tidbits 30.2: An Unintended Global-Scale Nitrogen Experiment 664
- 30.6 Soils, Plants, and the Atmosphere 664
- Techniques & Applications 30.3: Keeping Inside Air Fresh with Soil Microorganisms 665
- Microbial Diversity & Ecology 30.4: Soils, Termites, Intestinal Microbes, and Atmospheric Methane 666
- 30.7 Microorganisms and Plant Decomposition 666
- 30.8 The Subsurface Biosphere 667
- 30.9 Soil Microorganisms and Human Health 669
- 30.10 Understanding Microbial Diversity in the Soil 670

Part IX**Nonspecific (Innate) Resistance and the Immune Response****31 Normal Microbiota and Nonspecific (Innate) Host Resistance 673**

- 31.1 Gnotobiotic Animals 674
- 31.2 Normal Microbiota of the Human Body 675
- Techniques & Applications 31.1: Probiotics for Humans and Animals 679
- 31.3 Overview of Host Resistance 680
- 31.4 Cells, Tissues, and Organs of the Immune System 681
- 31.5 Physical and Chemical Barriers in Nonspecific (Innate) Resistance 685
- 31.6 Inflammation 688
- 31.7 The Complement System 691
- 31.8 Phagocytosis 693
- 31.9 Cytokines 697
- 31.10 Natural Killer Cells 700

32 Specific (Adaptive) Immunity 705

- 32.1 Overview of Specific (Adaptive) Immunity 706
- 32.2 Antigens 708
- 32.3 Antibodies 710
- Techniques & Applications 32.1: Immunotoxins 721
- 32.4 T-Cell Biology 721
- Techniques & Applications 32.2: Donor Selection for Tissue or Organ Transplants 724
- 32.5 B-Cell Biology 728

- 32.6 Action of Antibodies 731
- 32.7 The Classical Complement Pathway 734
- 32.8 Acquired Immune Tolerance 734
- 32.9 Summary: The Role of Antibodies and Lymphocytes in Resistance 734

33 Medical Immunology 739

- 33.1 Vaccines and Immunizations 740
 - Historical Highlights 33.1: The First Immunizations 740
- 33.2 Immune Disorders 744
- 33.3 Antigen-Antibody Interactions In Vitro 751
 - Techniques & Applications 33.2: History and Importance of Serotyping 757

Part X

Microbial Diseases and Their Control

34 Pathogenicity of Microorganisms 761

- 34.1 Host-Parasite Relationships 762
- 34.2 Pathogenesis of Viral Diseases 764
- 34.3 Pathogenesis of Bacterial Diseases 765
 - Techniques & Applications 34.1: Detection and Removal of Endotoxins 774
- 34.4 Microbial Mechanisms for Escaping Host Defenses 775

35 Antimicrobial Chemotherapy 779

- 35.1 The Development of Chemotherapy 780
 - Techniques & Applications 35.1: The Use of Antibiotics in Microbiological Research 781
- 35.2 General Characteristics of Antimicrobial Drugs 781
- 35.3 Determining the Level of Antimicrobial Activity 783
- 35.4 Mechanisms of Action of Antimicrobial Agents 784
- 35.5 Factors Influencing the Effectiveness of Antimicrobial Drugs 786
- 35.6 Antibacterial Drugs 787
- 35.7 Drug Resistance 792
 - Disease 35.2: Antibiotic Misuse and Drug Resistance 793
- 35.8 Antifungal Drugs 795
- 35.9 Antiviral Drugs 796

36 Clinical Microbiology 799

- 36.1 Specimens 800
 - Techniques & Applications 36.1: Universal Precautions for Health-Care Professionals 802
- 36.2 Identification of Microorganisms from Specimens 804
 - Techniques & Applications 36.2: Monoclonal Antibodies in Clinical Microbiology 813
- 36.3 Susceptibility Testing 817
- 36.4 Computers in Clinical Microbiology 817

37 The Epidemiology of Infectious Disease 821

- 37.1 Epidemiological Terminology 822
 - Historical Highlights 37.1: John Snow—The First Epidemiologist 822

- 37.2 Measuring Frequency: The Epidemiologist's Tools 823
- 37.3 Infectious Disease Epidemiology 823
- 37.4 Recognition of an Infectious Disease in a Population 824
- 37.5 Recognition of an Epidemic 824
 - Historical Highlights 37.2: "Typhoid Mary" 825
- 37.6 The Infectious Disease Cycle: Story of a Disease 827
 - Historical Highlights 37.3: The First Indications of Person-to-Person Spread of an Infectious Disease 831
- 37.7 Virulence and the Mode of Transmission 832
- 37.8 Emerging and Reemerging Infectious Diseases and Pathogens 832
 - Disease 37.4: The SARS Epidemic of 2003 835
- 37.9 Control of Epidemics 837
- 37.10 The Emerging Threat of Bioterrorism 837
 - Historical Highlights 37.5: 1346—The First Recorded Biological Warfare Attack 838
- 37.11 Global Travel and Health Considerations 839
- 37.12 Nosocomial Infections 840

38 Human Diseases Caused by Viruses 845

- 38.1 Airborne Diseases 846
 - Disease 38.1: Reye's and Guillain-Barré Syndromes 849
- 38.2 Arthropod-Borne Diseases 852
 - Disease 38.2: Viral Hemorrhagic Fevers—A Microbial History Lesson 853
- 38.3 Direct Contact Diseases 855
- 38.4 Food-Borne and Waterborne Diseases 868
 - Historical Highlights 38.3: A Brief History of Polio 870
- 38.5 Slow Virus and Prion Diseases 870
- 38.6 Other Diseases 871

39 Human Diseases Caused by Bacteria 875

- 39.1 Airborne Diseases 876
- 39.2 Arthropod-Borne Diseases 885
 - Historical Highlights 39.1: The Hazards of Microbiological Research 885
- 39.3 Direct Contact Diseases 889
 - Disease 39.2: Biofilms 897
 - Disease 39.3: Resistant Staphylococci 900
 - Disease 39.4: A Brief History of Syphilis 902
- 39.4 Food-Borne and Waterborne Diseases 905
 - Techniques & Applications 39.5: Clostridial Toxins as Therapeutic Agents—Benefits of Nature's Most Toxic Proteins 908
- 39.5 Sepsis and Septic Shock 911
- 39.6 Dental Infections 911

40 Human Diseases Caused by Fungi and Protozoa 917

- 40.1 Fungal Diseases 918
 - Disease 40.1: The Emergence of Candidiasis 925
- 40.2 Protozoan Diseases 926
 - Disease 40.2: A Brief History of Malaria 930

Part XI

Food and Industrial Microbiology

41 Microbiology of Food 937

- 41.1 Microorganism Growth in Foods 938
- 41.2 Microbial Growth and Food Spoilage 940
- 41.3 Controlling Food Spoilage 943
 - Historical Highlights 41.1: An Army Travels on Its Stomach 944
- 41.4 Food-Borne Diseases 946
 - Historical Highlights 41.2: Typhoid Fever and Canned Meat 947
- 41.5 Detection of Food-Borne Pathogens 949
- 41.6 Microbiology of Fermented Foods 951
 - Techniques & Applications 41.3: Starter Cultures, Bacteriophage Infections, and Plasmids 951
- 41.7 Microorganisms as Foods and Food Amendments 958

42 Industrial Microbiology and Biotechnology 963

- 42.1 Choosing Microorganisms for Industrial Microbiology and Biotechnology 964
 - Techniques & Applications 42.1: The Potential of Thermophilic Archaea in Biotechnology 965
- 42.2 Microorganism Growth in Controlled Environments 970
- 42.3 Major Products of Industrial Microbiology 974
- 42.4 Microbial Growth in Complex Natural Environments 979

- Microbial Diversity & Ecology 42.2: Methanogens—A New Role for a Unique Microbial Group 981
- Microbial Diversity & Ecology 42.3: A Fungus with a Voracious Appetite 985
- 42.5 Biotechnological Applications 986
 - Techniques & Applications 42.4: Streptavidin-Biotin Binding and Biotechnology 987
- 42.6 Impacts of Microbial Biotechnology 990

Appendices

Appendix I A Review of the Chemistry of Biological Molecules A-1

Appendix II Common Metabolic Pathways A-11

Appendix III Classification of Prokaryotes According to the Second Edition of *Bergey's Manual of Systematic Bacteriology* A-19

Appendix IV Classification of Viruses A-28

Appendix V Recommended Readings A-38

Glossary G-1
