

The Living World

Contents

Part One | The Study of Life

1 The Science of Biology 1

BIOLOGY AND THE LIVING WORLD 2

1.1 The Diversity of Life 2

1.2 Properties of Life 3

1.3 The Organization of Life 4

1.4 Biological Themes 6

THE SCIENTIFIC PROCESS 8

1.5 How Scientists Think 8

1.6 Science in Action: A Case Study 9

1.7 Stages of a Scientific Investigation 10

1.8 Theory and Certainty 13

CORE IDEAS OF BIOLOGY 14

1.9 Four Theories Unify Biology as a Science 14

 **Author's Corner:** Where Are All My Socks Going? 12

2 Evolution and Ecology 21

EVOLUTION 22

2.1 Darwin's Voyage on HMS *Beagle* 22

2.2 Darwin's Evidence 24

2.3 The Theory of Natural Selection 25

DARWIN'S FINCHES: EVOLUTION IN ACTION 27

2.4 The Beaks of Darwin's Finches 27

2.5 How Natural Selection Produces Diversity 30

ECOLOGY 31

2.6 What Is Ecology? 31

2.7 A Closer Look at Ecosystems 32

2.8 How Species Evolve to Occupy Different Niches Within an Ecosystem 33

POPULATIONS AND HOW THEY GROW 34

2.9 Patterns of Population Growth 34

2.10 Human Populations 36

 **Science in Action:** Evolution Repeats Itself in Caribbean Lizards 29

Part Two | The Living Cell

3 The Chemistry of Life 41

SOME SIMPLE CHEMISTRY 42

3.1 Atoms 42

3.2 Ions and Isotopes 44

3.3 Molecules 46

WATER: CRADLE OF LIFE 50

3.4 Hydrogen Bonds Give Water Unique Properties 50

3.5 Water Ionizes 52

MACROMOLECULES 54

3.6 Forming Macromolecules 54

3.7 Proteins 56

3.8 Nucleic Acids 61

3.9 Carbohydrates 63

3.10 Lipids 65

 **Science in Action:** The Case of the Dying Racehorse Foals 47
