Preface xx

Guided Tour xxiv

A Special Note to Students xxxii

CHAPTER 1

The Main Themes of Microbiology 1

1.1 The Scope of Microbiology 2

1.2 The Origins of Microorganisms and Their Roles in the Earth's Environments 4

Microbial Involvement in Energy and Nutrient Flow 4

1.3 Human Use of Microorganisms 7

1.4 Infectious Diseases and the Human Condition 7

1.5 The General Characteristics of Microorganisms 9

Cellular Organization 9

Microbial Dimensions: How Small Is Small? 11

Lifestyles of Microorganisms 12

1.6 The Historical Foundations of Microbiology 13

The Development of the Microscope:

“Seeing Is Believing” 13

The Establishment of the Scientific Method 15

The Development of Medical Microbiology 15

The Discovery of Spores and Sterilization 15

1.7 Taxonomy: Organizing, Classifying, and Naming Microorganisms 18

The Levels of Classification 18

Assigning Specific Names 18

The Origin and Evolution of Microorganisms 20

Systems of Presenting a Universal Tree of Life 20

INSIGHT 1.1 *Discovery*

Astrobiology: The Search for Extraterrestrial Life 5

INSIGHT 1.2 *Historical*

The More Things Change . . . 9

INSIGHT 1.3 *Historical*

The Fall of Superstition and the Rise of Microbiology 12

Chapter Summary with Key Terms 22

Multiple-Choice Questions 23

Writing to Learn 24

Concept Mapping 25

Critical Thinking Questions 25

Visual Understanding 26

Internet Search Topics 26

viii

CHAPTER 2

The Chemistry of Biology 27

2.1 Atoms, Bonds, and Molecules: Fundamental Building Blocks 28

Different Types of Atoms: Elements and Their Properties 29

The Major Elements of Life and Their Primary Characteristics 29

Bonds and Molecules 32

Solutions: Homogeneous Mixtures of Molecules 37

2.2 Macromolecules: Superstructures of Life 41

Carbohydrates: Sugars and Polysaccharides 41

Lipids: Fats, Phospholipids, and Waxes 45

Proteins: Shapers of Life 47

The Nucleic Acids: A Cell Computer and Its Programs 48

The Double Helix of DNA 50

INSIGHT 2.1 *Discovery*

Better Living through Bacteria? 44

Chapter Summary with Key Terms 53

Multiple-Choice Questions 54

Writing to Learn 54

Concept Mapping 55

Critical Thinking Questions 56

Visual Understanding 56

Internet Search Topics 56

CHAPTER 3

Tools of the Laboratory: The Methods for Studying Microorganisms 57

3.1 Methods of Culturing Microorganisms—The Five I'S 58

Inoculation: Producing a Culture 58

Isolation: Separating Microbes from One Another 58

Media: Providing Nutrients in the Laboratory 60

Incubation and Inspection 68

Identification 69

3.2 The Microscope: Window on an Invisible Realm 70

Magnification and Microscope Design 71

Variations on the Optical Microscope 74

Electron Microscopy 77

Preparing Specimens for Optical Microscopes 78

INSIGHT 3.1 Discovery

The Uncultured 65

INSIGHT 3.2 Medical

Animal Inoculation: "Living Media" 69

INSIGHT 3.3: Discovery

The Evolution in Resolution: Probing Microscopes 79

Chapter Summary with Key Terms 83

Multiple-Choice Questions 84

Writing to Learn 85

Concept Mapping 85

Critical Thinking Questions 86

Visual Understanding 87

Internet Search Topics 87

CHAPTER 4**A Survey of Prokaryotic Cells and Microorganisms 88****4.1 Characteristics of Cells and Life 89**

What Is Life? 89

4.2 Prokaryotic Profiles: The Bacteria and Archaea 90

The Structure of a Generalized Bacterial Cell 90

4.3 External Structures 90

Appendages: Cell Extensions 90

4.4 The Cell Envelope: The Boundary Layer of Bacteria 97

Differences in Cell Envelope Structure 97

Structure of Cell Walls 98

Mycoplasmas and Other Cell-Wall-Deficient Bacteria 101

Cell Membrane Structure 101

4.5 Bacterial Internal Structure 102

Contents of the Cell Cytoplasm 102

Bacterial Endospores: An Extremely Resistant Life Form 104

4.6 Bacterial Shapes, Arrangements, and Sizes 106**4.7 Classification Systems in the Prokaryotae 108**Bacterial Taxonomy Based on *Bergey's Manual* 109

Survey of Prokaryotic Groups with Unusual Characteristics 112

Free-Living Nonpathogenic Bacteria 112

Unusual Forms of Medically Significant Bacteria 114

4.8 Archaea: The Other Prokaryotes 115**INSIGHT 4.1 Discovery**

Biofilms—The Glue of Life 95

INSIGHT 4.2 Discovery

The Gram Stain: A Grand Stain 97

INSIGHT 4.3 Discovery

Redefining Bacterial Size 114

Chapter Summary with Key Terms 117

Multiple-Choice Questions 118

Writing to Learn 118

Concept Mapping 119

Critical Thinking Questions 119

Visual Understanding 120

Internet Search Topics 120

CHAPTER 5**A Survey of Eukaryotic Cells and Microorganisms 121****5.1 The History of Eukaryotes 122****5.2 Form and Function of the Eukaryotic Cell: External Structures 124**

Locomotor Appendages: Cilia and Flagella 124

The Glycocalyx 125

Form and Function of the Eukaryotic Cell:

Boundary Structures 126

5.3 Form and Function of the Eukaryotic Cell: Internal Structures 127

The Nucleus: The Control Center 127

Endoplasmic Reticulum: A Passageway in the Cell 128

Golgi Apparatus: A Packaging Machine 128

Mitochondria: Energy Generators of the Cell 130

Chloroplasts: Photosynthesis Machines 131

Ribosomes: Protein Synthesizers 131

The Cytoskeleton: A Support Network 132

Survey of Eukaryotic Microorganisms 133

5.4 The Kingdom of the Fungi 134

Fungal Nutrition 134

Organization of Microscopic Fungi 135

Reproductive Strategies and Spore Formation 135

Fungal Classification 141

Fungal Identification and Cultivation 142

The Roles of Fungi in Nature and Industry 142

5.5 The Protists 143

The Algae: Photosynthetic Protists 143

Biology of the Protozoa 145

5.6 The Parasitic Helminths 150

General Worm Morphology 151

Life Cycles and Reproduction 151

A Helminth Cycle: The Pinworm 151

Helminth Classification and Identification 152

Distribution and Importance of Parasitic Worms 152

INSIGHT 5.1 Historical

The Extraordinary Evolution of Eukaryotic Cells 123

INSIGHT 5.2 Discovery

Fungi: A Force of Nature 138

Chapter Summary with Key Terms 153

Multiple-Choice Questions 154

Writing to Learn 154

Concept Mapping 155

Critical Thinking Questions	155
Visual Understanding	156
Internet Search Topics	156

CHAPTER 6

An Introduction to Viruses 157

6.1 The Search for the Elusive Viruses	158
6.2 The Position of Viruses in the Biological Spectrum	158
6.3 The General Structure of Viruses	159
Size Range	159
Viral Components: Capsids, Nucleic Acids, and Envelopes	160
6.4 How Viruses Are Classified and Named	166
6.5 Modes of Viral Multiplication	168
Multiplication Cycles in Animal Viruses	168
The Multiplication Cycle in Bacteriophages	173
6.6 Techniques in Cultivating and Identifying Animal Viruses	176
Using Cell (Tissue) Culture Techniques	176
Using Bird Embryos	177
Using Live Animal Inoculation	178
6.7 Medical Importance of Viruses	178
6.8 Detection and Treatment of Animal Viral Infections	179
6.9 Prions and Other Nonviral Infectious Particles	179

INSIGHT 6.1 *Discovery*

An Alternate View of Viruses 159

INSIGHT 6.2 *Discovery*

Artificial Viruses Created! 178

INSIGHT 6.3 *Medical*

A Vaccine for Obesity? 179

Chapter Summary with Key Terms 181

Multiple-Choice Questions 181

Writing to Learn 182

Concept Mapping 183

Critical Thinking Questions 183

Visual Understanding 184

Internet Search Topics 184

CHAPTER 7

Elements of Microbial Nutrition, Ecology, and Growth 185

7.1 Microbial Nutrition	186
Chemical Analysis of Cell Contents	187
Sources of Essential Nutrients	188
How Microbes Feed: Nutritional Types	189
Transport: Movement of Chemicals across the Cell Membrane	192

The Diffusion of Water: Osmosis	193
Endocytosis: Eating and Drinking by Cells	197

7.2 Environmental Factors That Influence Microbes 198

Adaptations to Temperature	198
Gas Requirements	200
Effects of pH	201
Osmotic Pressure	202
Miscellaneous Environmental Factors	202
Ecological Associations among Microorganisms	202
Interrelationships between Microbes and Humans	204

7.3 The Study of Microbial Growth 206

The Basis of Population Growth: Binary Fission	206
The Rate of Population Growth	206
The Population Growth Curve	208
Stages in the Normal Growth Curve	208
Other Methods of Analyzing Population Growth	210

INSIGHT 7.1 *Discovery*

Dining with an Amoeba 187

INSIGHT 7.2 *Discovery*

Life in the Extremes 199

INSIGHT 7.3 *Discovery*

A Mutual Attraction 203

INSIGHT 7.4 *Microbiology*

Steps in a Viable Plate Count—Batch Culture Method 209

Chapter Summary with Key Terms 211

Multiple-Choice Questions 212

Writing to Learn 213

Concept Mapping 214

Critical Thinking Questions 214

Visual Understanding 215

Internet Search Topics 215

CHAPTER 8

An Introduction to Microbial Metabolism: The Chemical Crossroads of Life 216

8.1 The Metabolism of Microbes 217

Enzymes: Catalyzing the Chemical Reactions of Life 218

Regulation of Enzymatic Activity and Metabolic Pathways 224

8.2 The Pursuit and Utilization of Energy 226

Cell Energetics 226

8.3 Pathways of Bioenergetics 229

Catabolism: An Overview of Nutrient Breakdown and Energy Release 230

Energy Strategies in Microorganisms 230

Aerobic Respiration 231

Pyruvic Acid—A Central Metabolite 233

The Krebs Cycle—A Carbon and Energy Wheel 233

The Respiratory Chain: Electron Transport and Oxidative Phosphorylation 235

Summary of Aerobic Respiration 238

Anaerobic Respiration 239

The Importance of Fermentation 240

8.4 Biosynthesis and the Crossing Pathways of Metabolism 241

The Frugality of the Cell—Waste Not, Want Not 242

Assembly of the Cell 244

8.5 Photosynthesis: The Earth's Lifeline 244

Light-Dependent Reactions 245

Light-Independent Reactions 246

Other Mechanisms of Photosynthesis 246

INSIGHT 8.1 Discovery

Enzymes as Biochemical Levers 218

INSIGHT 8.2 Discovery

An Unconventional Enzyme 219

INSIGHT 8.3 Discovery

The Enzyme Name Game 222

INSIGHT 8.4 Historical

Pasteur and the Wine-to-Vinegar Connection 241

Chapter Summary with Key Terms 247

Multiple-Choice Questions 248

Writing to Learn 249

Concept Mapping 250

Critical Thinking Questions 250

Visual Understanding 251

Internet Search Topics 251

CHAPTER 9

Microbial Genetics 252

9.1 Introduction to Genetics and Genes: Unlocking the Secrets of Heredity 253

The Nature of the Genetic Material 253

The Structure of DNA: A Double Helix with Its Own Language 255

The Significance of DNA Structure 258

DNA Replication: Preserving the Code and Passing It On 258

9.2 Applications of the DNA Code: Transcription and Translation 261

The Gene-Protein Connection 261

The Major Participants in Transcription and Translation 262

Transcription: The First Stage of Gene Expression 264

Translation: The Second Stage of Gene Expression 264

Eukaryotic Transcription and Translation: Similar yet Different 268

The Genetics of Animal Viruses 270

9.3 Genetic Regulation of Protein Synthesis and Metabolism 271

The Lactose Operon: A Model for Inducible Gene Regulation in Bacteria 272

A Repressible Operon 275

9.4 Mutations: Changes in the Genetic Code 276

Causes of Mutations 277

Categories of Mutations 278

Repair of Mutations 278

The Ames Test 279

Positive and Negative Effects of Mutations 279

9.5 DNA Recombination Events 280

Transmission of Genetic Material in Bacteria 280

INSIGHT 9.1 Discovery

The Packaging of DNA: Winding, Twisting, and Coiling 255

INSIGHT 9.2 Historical

Deciphering the Structure of DNA 256

INSIGHT 9.3 Discovery

Revising Some Rules of Genetics 267

INSIGHT 9.4 Medical

Replication Strategies in Animal Viruses 272

Chapter Summary with Key Terms 285

Multiple-Choice Questions 286

Writing to Learn 287

Concept Mapping 287

Critical Thinking Questions 288

Visual Understanding 288

Internet Search Topics 288

CHAPTER 10

Genetic Engineering: A Revolution in Molecular Biology 289

10.1 Basic Elements and Applications of Genetic Engineering 290

10.2 Tools and Techniques of Genetic Engineering 290

Practical Properties of DNA 290

10.3 Methods in Recombinant DNA Technology: How to Imitate Nature 297

Technical Aspects of Recombinant DNA and Gene Cloning 299

Construction of a Recombinant, Insertion into a Cloning Host, and Genetic Expression 300

10.4 Biochemical Products of Recombinant DNA Technology 302

10.5 Genetically Modified Organisms 303

Recombinant Microbes: Modified Bacteria and Viruses 303

Recombination in Multicellular Organisms 305

- 10.6 Genetic Treatments: Introducing DNA into the Body 307**
 - Gene Therapy 307
 - DNA Technology as Genetic Medicine 308
- 10.7 Genome Analysis: Fingerprints and Genetic Testing 308**
 - DNA Fingerprinting: A Unique Picture of a Genome 309

INSIGHT 10.1 Discovery

OK, the Genome's Sequenced—What's Next? 296

INSIGHT 10.2: Microbiology

A Moment to Think 304

Chapter Summary with Key Terms 312

Multiple-Choice Questions 313

Writing to Learn 313

Concept Mapping 314

Critical Thinking Questions 314

Visual Understanding 315

Internet Search Topics 315

CHAPTER 11

Physical and Chemical Agents for Microbial Control 316

- 11.1 Controlling Microorganisms 317**
 - General Considerations in Microbial Control 317
 - Relative Resistance of Microbial Forms 317
 - Terminology and Methods of Microbial Control 319
 - What Is Microbial Death? 320
 - How Antimicrobial Agents Work: Their Modes of Action 322
- 11.2 Methods of Physical Control 323**
 - Heat as an Agent of Microbial Control 323
 - The Effects of Cold and Dessication 327
 - Radiation as a Microbial Control Agent 327
 - Sterilization by Filtration: Techniques for Removing Microbes 330
- 11.3 Chemical Agents in Microbial Control 330**
 - Choosing a Microbicidal Chemical 331
 - Factors That Affect the Germicidal Activity of Chemicals 332
 - Germicidal Categories According to Chemical Group 333

INSIGHT 11.1 Historical

Microbial Control in Ancient Times 318

INSIGHT 11.2 Microbiology

Pathogen Paranoia: "The Only Good Microbe Is a Dead Microbe" 331

INSIGHT 11.3 Medical

The Quest for Sterile Skin 340

Chapter Summary with Key Terms 343

Multiple-Choice Questions 344

- Writing to Learn 345
- Concept Mapping 345
- Critical Thinking Questions 345
- Visual Understanding 346
- Internet Search Topics 346

CHAPTER 12

Drugs, Microbes, Host—The Elements of Chemotherapy 347

- 12.1 Principles of Antimicrobial Therapy 348**
 - The Origins of Antimicrobial Drugs 348
- 12.2 Interactions between Drugs and Microbes 350**
 - Mechanisms of Drug Action 351
- 12.3 Survey of Major Antimicrobial Drug Groups 355**
 - Antibacterial Drugs That Act on the Cell Wall 355
 - Antibiotics That Damage Bacterial Cell Membranes 359
 - Drugs That Act on DNA or RNA 359
 - Drugs That Interfere with Protein Synthesis 359
 - Drugs That Block Metabolic Pathways 360
 - Agents to Treat Fungal Infections 361
 - Antiparasitic Chemotherapy 362
- 12.4 Interactions between Microbes and Drugs: The Acquisition of Drug Resistance 366**
 - How Does Drug Resistance Develop? 366
 - Specific Mechanisms of Drug Resistance 366
 - Natural Selection and Drug Resistance 368
- 12.5 Interactions between Drugs and Hosts 369**
 - Toxicity to Organs 369
 - Allergic Responses to Drugs 371
 - Suppression and Alteration of Microflora by Antimicrobials 371
- 12.6 Considerations in Selecting an Antimicrobial Drug 373**
 - Identifying the Agent 373
 - Testing for the Drug Susceptibility of Microorganisms 373
 - The MIC and the Therapeutic Index 374

INSIGHT 12.1 Historical

From Witchcraft to Wonder Drugs 349

INSIGHT 12.2 Discovery

A Modern Quest for Designer Drugs 357

INSIGHT 12.3 Discovery

New Perspectives in Antimicrobial Therapy 365

INSIGHT 12.4 Medical

The Rise of Drug Resistance 370

Chapter Summary with Key Terms 377

Multiple-Choice Questions 378

Writing to Learn 379

Critical Thinking Questions 445

Visual Understanding 446

Internet Search Topics 446

CHAPTER 15**Adaptive, Specific Immunity and Immunization 447****15.1 Specific Immunity: The Adaptive Line of Defense 448**

A General Scheme for Classifying Immunities 449

An Overview of Specific Immune Responses 451

15.2 Development of the Immune Response System 451

Markers on Cell Surfaces Involved in Recognition of Self and Nonself 451

The Origin of Diversity and Specificity in the Immune Response 453

15.3 Lymphocyte Responses and Antigens 456

Specific Events in B-Cell Maturation 456

Specific Events in T-Cell Maturation 456

Entrance and Processing of Antigens and Clonal Selection 457

15.4 Cooperation in Immune Reactions to Antigens 458

The Role of Antigen Processing and Presentation 458

15.5 B-Cell Responses 459

Activation of B Lymphocytes: Clonal Expansion and Antibody Production 459

Products of B Lymphocytes: Antibody Structure and Functions 461

Monoclonal Antibodies: Useful Products from Cancer Cells 466

15.6 T-Cell Responses 466

Cell-Mediated Immunity (CMI) 466

15.7 Immunization: Methods of Manipulating Immunity for Therapeutic Purposes 469

Passive Immunization 469

Artificial Active Immunity: Vaccination 469

Development of New Vaccines 473

Routes of Administration and Side Effects of Vaccines 474

To Vaccinate: Why, Whom, and When? 474

INSIGHT 15.1 Historical**Breast Feeding: The Gift of Antibodies 450****INSIGHT 15.2 Medical****Monoclonal Antibodies: Variety without Limit 465****INSIGHT 15.3 Historical****The Lively History of Active Immunization 470**

Chapter Summary with Key Terms 476

Multiple-Choice Questions 477

Writing to Learn 478

Concept Mapping 479

Critical Thinking Questions 479

Visual Understanding 480

Internet Search Topics 480

CHAPTER 16**Disorders in Immunity 481****16.1 The Immune Response: A Two-Sided Coin 482**

Overreactions to Antigens: Allergy/Hypersensitivity 482

16.2 Type I Allergic Reactions: Atopy and Anaphylaxis 484

Modes of Contact with Allergens 484

The Nature of Allergens and Their Portals of Entry 484

Mechanisms of Type I Allergy: Sensitization and Provocation 484

Cytokines, Target Organs, and Allergic Symptoms 486

Specific Diseases Associated with IgE- and Mast-Cell-Mediated Allergy 488

Anaphylaxis: A Powerful Systemic Reaction to Allergens 489

Diagnosis of Allergy 490

Treatment and Prevention of Allergy 490

16.3 Type II Hypersensitivities: Reactions That Lyse Foreign Cells 492

The Basis of Human ABO Antigens and Blood Types 492

Antibodies against A and B Antigens 493

The Rh Factor and Its Clinical Importance 494

Other RBC Antigens 496

16.4 Type III Hypersensitivities: Immune Complex Reactions 496

Mechanisms of Immune Complex Disease 496

Types of Immune Complex Disease 496

16.5 Immunopathologies Involving T Cells 497

Type IV Delayed-Type Hypersensitivity 497

T Cells and Their Role in Organ Transplantation 499

Types of Transplants 501

16.6 Autoimmune Diseases—An Attack on Self 501

Genetic and Gender Correlation in Autoimmune Disease 502

The Origins of Autoimmune Disease 502

Examples of Autoimmune Disease 503

16.7 Immunodeficiency Diseases: Compromised Immune Responses 505

Primary Immunodeficiency Diseases 505

Secondary Immunodeficiency Diseases 507

16.8 The Function of the Immune System in Cancer 508**INSIGHT 16.1 Medical****Of What Value Is Allergy? 488****INSIGHT 16.2 Medical****Why Doesn't a Mother Reject Her Fetus? 495****INSIGHT 16.3 Medical****Pretty, Pesky, Poisonous Plants 498****INSIGHT 16.4 Medical****The Gift of Life: Bone Marrow Transplantation 501****INSIGHT 16.5 Discovery****An Answer to the Mystery of David 507**

Critical Thinking Questions 445

Visual Understanding 446

Internet Search Topics 446

CHAPTER 15**Adaptive, Specific Immunity and Immunization 447****15.1 Specific Immunity: The Adaptive Line of Defense 448**

A General Scheme for Classifying Immunities 449

An Overview of Specific Immune Responses 451

15.2 Development of the Immune Response System 451

Markers on Cell Surfaces Involved in Recognition of Self and Nonself 451

The Origin of Diversity and Specificity in the Immune Response 453

15.3 Lymphocyte Responses and Antigens 456

Specific Events in B-Cell Maturation 456

Specific Events in T-Cell Maturation 456

Entrance and Processing of Antigens and Clonal Selection 457

15.4 Cooperation in Immune Reactions to Antigens 458

The Role of Antigen Processing and Presentation 458

15.5 B-Cell Responses 459

Activation of B Lymphocytes: Clonal Expansion and Antibody Production 459

Products of B Lymphocytes: Antibody Structure and Functions 461

Monoclonal Antibodies: Useful Products from Cancer Cells 466

15.6 T-Cell Responses 466

Cell-Mediated Immunity (CMI) 466

15.7 Immunization: Methods of Manipulating Immunity for Therapeutic Purposes 469

Passive Immunization 469

Artificial Active Immunity: Vaccination 469

Development of New Vaccines 473

Routes of Administration and Side Effects of Vaccines 474

To Vaccinate: Why, Whom, and When? 474

INSIGHT 15.1 Historical**Breast Feeding: The Gift of Antibodies 450****INSIGHT 15.2 Medical****Monoclonal Antibodies: Variety without Limit 465****INSIGHT 15.3 Historical****The Lively History of Active Immunization 470**

CHAPTER 17

Diagnosing Infections 513

17.1 Preparation for the Survey of Microbial Diseases 514

Phenotypic Methods 514

Genotypic Methods 514

Immunologic Methods 515

17.2 On the Track of the Infectious Agent: Specimen Collection 515

Overview of Laboratory Techniques 516

17.3 Phenotypic Methods 517

Immediate Direct Examination of Specimen 517

Cultivation of Specimen 518

17.4 Genotypic Methods 520

DNA Analysis Using Genetic Probes 520

Roles of the Polymerase Chain Reaction and Ribosomal RNA in Identification 520

17.5 Immunologic Methods 521

General Features of Immune Testing 521

Agglutination and Precipitation Reactions 523

The Western Blot for Detecting Proteins 524

Complement Fixation 525

Miscellaneous Serological Tests 526

Fluorescent Antibody and Immunofluorescent Testing 526

Immunoassays: Tests of Great Sensitivity 527

Tests That Differentiate T Cells and B Cells 529

In Vivo Testing 529

A Viral Example 529

INSIGHT 17.1 Medical

New Guidelines for Enteric Cultures 518

INSIGHT 17.2 Medical

When Positive Is Negative: How to Interpret Serological Test Results 523

Chapter Summary with Key Terms 531

Multiple-Choice Questions 532

Writing to Learn 532

Concept Mapping 533

Critical Thinking Questions 533

Visual Understanding 534

CHAPTER 18

The Cocci of Medical Importance 535

18.1 General Characteristics of the Staphylococci 536

Growth and Physiological Characteristics of *Staphylococcus aureus* 536

The Scope of Clinical Staphylococcal Disease 538

Host Defenses against *S. aureus* 540

Other Important Staphylococci 541

Identification of *Staphylococcus* Isolates in Clinical Samples 541

Clinical Concerns in Staphylococcal Infections 542

18.2 General Characteristics of the Streptococci and Related Genera 543

Beta-Hemolytic Streptococci: *Streptococcus pyogenes* 544

Group B: *Streptococcus agalactiae* 549

Group D Enterococci and Groups C and G Streptococci 549

Laboratory Identification Techniques 549

Treatment and Prevention of Group A, B, and D Streptococcal Infections 550

Alpha-Hemolytic Streptococci: The Viridans Group 551

Streptococcus pneumoniae: The Pneumococcus 551

18.3 The Family Neisseriaceae: Gram-Negative Cocci 554

Neisseria gonorrhoeae: The Gonococcus 554

Neisseria meningitidis: The Meningococcus 557

Differentiating Pathogenic from Nonpathogenic *Neisseria* 559

Other Genera of Gram-Negative Cocci and Coccobacilli 560

INSIGHT 18.1 Medical

Tampons and TSS 539

INSIGHT 18.2 Medical

Invasive Group A Streps and "Flesh-Eating" Syndrome 547

INSIGHT 18.3 Medical

Pelvic Inflammatory Disease and Infertility 555

Chapter Summary with Key Terms 560

Multiple-Choice Questions 561

Writing to Learn 562

Concept Mapping 563

Critical Thinking Questions 563

Visual Understanding 564

Internet Search Topics 564

CHAPTER 19

The Gram-Positive Bacilli of Medical Importance 565

19.1 Medically Important Gram-Positive Bacilli 566

19.2 Gram-Positive Spore-Forming Bacilli 566

General Characteristics of the Genus *Bacillus* 566

The Genus *Clostridium* 568

- 19.3 Gram-Positive Regular Non-Spore-Forming Bacilli 576**
 An Emerging Food-Borne Pathogen: *Listeria monocytogenes* 576
Erysipelothrix rhusiopathiae: A Zoonotic Pathogen 577
- 19.4 Gram-Positive Irregular Non-Spore-Forming Bacilli 578**
Corynebacterium diphtheriae 578
 The Genus *Propionibacterium* 580
- 19.5 Mycobacteria: Acid-Fast Bacilli 580**
Mycobacterium tuberculosis: The Tubercle Bacillus 580
Mycobacterium leprae: The Leprosy Bacillus 586
 Infections by Nontuberculosis Mycobacteria (NTM) 588
- 19.6 Actinomycetes: Filamentous Bacilli 589**
 Actinomycosis 589
 Nocardiosis 589

INSIGHT 19.1 Historical

A Bacillus That Could Kill Us 569

INSIGHT 19.2 Medical

BOTOX: No Wrinkles. No Headaches. No Worries? 575

INSIGHT 19.3 Medical

CHAPTER 20

The Gram-Negative Bacilli of Medical Importance 594

20.1 Aerobic Gram-Negative Nonenteric Bacilli 595

Pseudomonas: The Pseudomonads 595

20.2 Related Gram-Negative Aerobic Rods 598

Brucella and Brucellosis 599

Francisella tularensis and Tularemia 599

Bordetella pertussis and Relatives 600

Legionella and Legionellosis 601

20.3 Identification and Differential Characteristics of Family Enterobacteriaceae 602

Antigenic Structures and Virulence Factors 606

20.4 Coliform Organisms and Diseases 607

Escherichia coli: The Most Prevalent Enteric Bacillus 607

Miscellaneous Infections 608

Other Coliforms 608

20.5 Noncoliform Lactose-Negative Enterics 609

Opportunists: *Proteus* and Its Relatives 609

True Enteric Pathogens: *Salmonella* and *Shigella* 609

Nonenteric *Yersinia pestis* and Plague 613

Oxidase-Positive Nonenteric Pathogens in Family

Pasteurellaceae 615

Haemophilus: The Blood-Loving Bacilli 615

INSIGHT 20.1 Medical

Gram-Negative Sepsis and Endotoxic Shock 597

INSIGHT 20.2 Medical

Diarrheal Disease 603

INSIGHT 20.3 Microbiology

Avoiding Gastrointestinal Infections 611

CHAPTER 21

Miscellaneous Bacterial Agents of Disease 621

21.1 The Spirochetes 622

Treponemes: Members of the Genus *Treponema* 622

Leptospira and Leptospirosis 628

Borrelia: Arthropod-Borne Spirochetes 629

21.2 Curviform Gram-Negative Bacteria and Enteric Diseases 632

The Biology of *Vibrio cholerae* 632

Vibrio parahaemolyticus and *Vibrio vulnificus*: Pathogens Carried by Seafood 633

Diseases of the *Campylobacter* Vibrios 635

Helicobacter pylori: Gastric Pathogen 636

21.3 Medically Important Bacteria of Unique Morphology and Biology 637

Family Rickettsiaceae 637

Specific Rickettsioses 638

Emerging Rickettsioses 641

Coxiella and *Bartonella*: Other Vector-Borne Pathogens 641

Other Obligate Parasitic Bacteria: The Chlamydiaceae 642

21.4 Mollicutes and Other Cell-Wall-Deficient Bacteria 645

Biological Characteristics of the Mycoplasmas 645

Bacteria That Have Lost Their Cell Walls 646

21.5 Bacteria in Dental Disease 647

The Structure of Teeth and Associated Tissues 647

Hard-Tissue Disease: Dental Caries 648

Plaque and Dental Caries Formation 648

Soft-Tissue and Periodontal Disease 649

Factors in Dental Disease 650

INSIGHT 21.1 Historical

CHAPTER 24**Introduction to Viruses That Infect Humans: The DNA Viruses 724****24.1 Viruses in Human Infections and Diseases 725**

Important Medical Considerations in Viral Diseases 726

24.2 Survey of DNA Virus Groups Involved in Human Infections 727**24.3 Enveloped DNA Viruses 727**

Poxviruses: Classification and Structure 727

- The Herpesviruses: Common, Persistent Human Viruses 730
- The Viral Agents of Hepatitis 738
- 24.4 Nonenveloped DNA Viruses 741**
- The Adenoviruses 741
- Papilloma and Polyoma Viruses 742

24.5 Nonenveloped Single-Stranded DNA Viruses: The Parvoviruses 744

INSIGHT 24.1 Historical

Smallpox: An Ancient Scourge Revisited 728

INSIGHT 24.2 Medical

Herpesviruses: A Connection to Chronic Fatigue Syndrome? 736

INSIGHT 24.3 Medical

CHAPTER 25

The RNA Viruses That Infect Humans 749

- 25.1 Enveloped Segmented Single-Stranded RNA Viruses 750**
- The Biology of Orthomyxoviruses: Influenza 750
- Bunyaviruses and Arenaviruses 754
- 25.2 Enveloped Nonsegmented Single-Stranded RNA Viruses 756**
- Paramyxoviruses 756
- Rhabdoviruses 759
- 25.3 Other Enveloped RNA Viruses: Coronaviruses, Togaviruses, and Flaviviruses 761**
- Coronaviruses 761
- Rubivirus*: The Agent of Rubella 762
- Hepatitis C Virus 762
- 25.4 Arboviruses: Viruses Spread by Arthropod Vectors 763**
- Epidemiology of Arbovirus Disease 763
- General Characteristics of Arbovirus Infections 763
- Diagnosis, Treatment, and Control of Arbovirus Infection 766
- 25.5 HIV Infection and AIDS 766**
- Causative Agent 766
- Epidemiology of HIV Infection 766
- Stages, Signs, and Symptoms of HIV Infection and AIDS 770
- Diagnosis of HIV Infection 772

- Preventing HIV Infection 772
- Treating HIV Infection and AIDS 772

- 25.6 Other Retroviruses: Human T-Cell Lymphotropic Viruses 773**
- 25.7 Nonenveloped Nonsegmented Single-Stranded RNA Viruses: Picornaviruses and Caliciviruses 774**
- Poliovirus and Poliomyelitis 774
- Nonpolio Enteroviruses 777
- Caliciviruses 779
- 25.8 Nonenveloped Segmented Double-Stranded RNA Viruses: Reoviruses 779**
- 25.9 Prions and Spongiform Encephalopathies 780**
- Pathogenesis and Effects of CJD 780
- Transmission and Epidemiology 781
- Culture and Diagnosis 781
- Prevention and/or Treatment 781
