

CONTENTS

Preface	vii
Basic Microbiology Laboratory Safety	ix
Biosafety Levels for Selected Infectious Agents	xii
Microorganisms Used in These Lab Exercises and Their BSL Ratings	xiii

PART 1 Microscopy 1

1	Brightfield Microscopy	3
2	Darkfield Microscopy	13
3	Phase-Contrast Microscopy	17
4	Microscopic Measurements	25

PART 2 Survey of Microorganisms 31

5	Protozoa, Algae, and Cyanobacteria	33
6	Ubiquity of Bacteria	47
7	The Fungi: Molds and Yeasts	53

PART 3 Manipulation of Microorganisms 61

8	Aseptic Technique	63
9	Pure Culture Techniques	73

PART 4 Staining and Observation of Microorganisms 85

10	Smear Preparation	87
11	Simple Staining	91
12	Negative Staining	93
13	Capsular Staining	95
14	Gram Staining	101
15	Spore Staining: Two Methods	105
16	Acid-Fast Staining: Ziehl-Neelsen Method	109
17	Motility Determination	115

PART 5 Culture Methods 121

18	Culture Media Preparation	123
19	Cultivation of Anaerobes	133
20	Enumeration of Bacteria: The Standard Plate Count	139
21	Slime Mold Culture	151
22	Slide Culture: Fungi	157

PART 6 Bacterial Viruses 161

23	Determination of a Bacteriophage Titer	165
24	Isolation of Phage from Flies	171
25	Phage Typing	177

PART 7 Environmental Influences and Control of Microbial Growth 181

26	Temperature: Effects on Growth	183
27	Temperature: Lethal Effects	189
28	pH and Microbial Growth	193
29	Water Activity and Osmotic Pressure	197
30	Ultraviolet Light: Lethal Effects	201
31	The Effects of Lysozyme on Bacterial Cells	205
32	Evaluation of Alcohol: Its Effectiveness as an Antiseptic	211
33	Antimicrobial Sensitivity Testing: The Kirby-Bauer Method	215
34	Evaluation of Antiseptics: The Filter Paper Disk Method	223
35	Effectiveness of Hand Scrubbing	229

PART 8 Identification of Unknown Bacteria 237

36	Morphological Study of Unknown Bacterium	239
37	Cultural Characteristics	245
38	Physiological Characteristics: Oxidation and Fermentation Tests	249
39	Physiological Characteristics: Hydrolytic and Degradative Reactions	261
40	Physiological Characteristics: Multiple Test Media	267
41	Use of Bergey's Manual	275

PART 9 Miniaturized Multitest Systems 281

42	Enterobacteriaceae Identification: The API 20E System	283
43	Enterobacteriaceae Identification: The Enterotube II System	291

- 44** O/F Gram-Negative Rods Identification:
The Oxi/Ferm Tube II System 301
- 45** Staphylococcus Identification: The API Staph
System 309

PART 10 Applied Microbiology 315

- 46** Bacterial Counts of Foods 317
- 47** Bacteriological Examination of Water:
Qualitative Tests 321
- 48** The Membrane Filter Method 331
- 49** Reductase Test 335
- 50** Microbial Spoilage of Canned
Food 339
- 51** Microbiology of Alcohol
Fermentation 343

PART 11 Medical Microbiology and Immunology 347

- 52** The Staphylococci: Isolation
and Identification 349
- 53** The Streptococci: Isolation
and Identification 359

- 54** Gram-Negative Intestinal Pathogens 371
- 55** Slide Agglutination Test:
Serological Typing 379
- 56** Slide Agglutination (Latex) Test: For *S. aureus*
Identification 381
- 57** Tube Agglutination Test: The Heterophile
Antibody Test 385
- 58** White Blood Cell Study: The Differential
WBC Count 389
- 59** Blood Grouping 395
- 60** A Synthetic Epidemic 401

- Appendix A** Tables 407
- Appendix B** Indicators, Stains, Reagents 412
- Appendix C** Media 415
- Appendix D** Identification Charts 419
- Appendix E** The Streptococci: Classification,
Habitat, Pathology, and Biochemical
Characteristics 429
