

Brief Contents

1 An Introduction to Ecology 2

SECTION ONE Organismal Ecology 22

- 2 Population Genetics 24
- 3 Natural Selection, Speciation and Extinction 44
- 4 Behavioral Ecology 74

SECTION TWO Physiological Ecology 100

- 5 Temperature 102
- 6 Water 122
- 7 Nutrients 138

SECTION THREE Population Ecology 154

- 8 Demographic Techniques and Population Patterns 156
- 9 Life Tables and Demography 172
- 10 Population Growth 188

SECTION FOUR Species Interactions 218

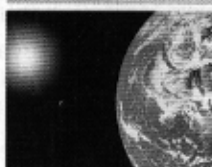

- 11 Competition and Coexistence 220
- 12 Facilitation 246
- 13 Predation 266
- 14 Herbivory 288
- 15 Parasitism 310
- 16 Population Regulation 330

SECTION FIVE Community Ecology 350

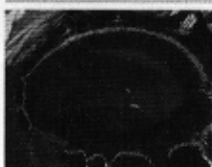

- 17 Species Diversity 352
- 18 Species Richness Patterns 372
- 19 Species Richness and Community Services 390
- 20 Succession 412
- 21 Island Biogeography 428

SECTION SIX Biomes 446

- 22 Terrestrial Biomes 448
- 23 Marine Biomes 480
- 24 Freshwater Biomes 500

SECTION SEVEN Ecosystems Ecology 516

- 25 Food Webs and Energy Flow 518
- 26 Biomass Production 538
- 27 Biogeochemical Cycles 562
