CD22: A Multifunctional Receptor That Regulates B Lymphocyte Survival and Signal Transduction

Thomas F. Tedder, Jonathan C. Poe, and Karen M. Haas

Abstract	1
1. Introduction	2
2. CD22 Expression	3
3. CD22 Structure	4
4. CD22—A Receptor for Diverse Sialylated Ligands	5
5. Effects of CD22 Engagement on B-Cell Activation and Function <i>In Vitro</i>	7
6. CD22 Ligand Binding Regulates B-Cell Survival and Proliferation	8
7. The CD22 Cytoplasmic Domain Regulates B-Cell Signal Transduction	15
8. CD22-Directed Therapies and Clinical Trials in Oncology	28
9. CD22-Directed Therapies and Clinical Trials in Autoimmunity	30
10. Conclusions	36

Regulation of Phospholipase C- γ 2 Networks in B Lymphocytes

Masaki Hikida and Tomohiro Kurosaki

Abstract	73
1. Introduction	73
2. From the BCR to PLC- γ	74
3. Roles for PLC- γ	78
4. Regulation of IP ₃ Receptors	79
5. Coupling Between Calcium Release and Calcium Influx	81
6. Looking for Ca ²⁺ Entry Channels	83
7. NFAT and NF- κ B	86
8. Modulation of Calcium Signaling	88
9. Concluding Remarks	89
References	90

Role of Human Mast Cells and Basophils in Bronchial Asthma

Gianni Marone, Massimo Triggiani, Arturo Genovese, and Amato De Paulis

Abstract	97
1. Introduction	97
2. Human Mast Cells	101
3. Human Basophils	109
4. Experimental Evidence for Mast Cells in Bronchial Asthma	116
5. Experimental Evidence for Basophils in Bronchial Asthma	117
6. Mast Cell and Basophil Recruitment to Asthmatic Airways	118
7. Anatomical and Functional Evidence for Mast Cells and Basophils in Asthma	119
8. Superallergens in Bronchial Asthma	121
9. Angiogenesis in Bronchial Asthma	127
10. Tissue Remodeling in Bronchial Asthma	128
11. Pharmacologic Modulation of Human Mast Cells and Basophils in the Treatment of Bronchial Asthma	130
12. Conclusions and Implications	136

A Novel Recognition System for MHC Class I Molecules Constituted by PIR

Toshiyuki Takai

Abstract.....	161
1. Introduction.....	161
2. PIR and LILR in Ig-like Receptor Family.....	163
3. PIR Genes and Protein Structure.....	166
4. Ligand for PIR.....	169
5. 3D Structure of PIR and LILR and Their Interaction with MHC Class I.....	171
6. Activation Signal via PIR-A.....	174
7. Inhibitory Signal via PIR-B.....	176
8. Dominant Expression of PIR-B <i>In Vivo</i>	177
9. <i>Pirb</i> ^{-/-} B Cells, Neutrophils, and Macrophages are Hyperresponsive.....	178
10. Modulated Cytokine Signaling in PIR-B Deficiency.....	180
11. PIR in Transplantation.....	182
12. Conclusion.....	186
References.....	187

Dendritic Cell Biology

Francesca Granucci, Maria Foti, and Paola Ricciardi-Castagnoli

Abstract.....	193
1. Introduction.....	193
2. DC Subtypes.....	194
3. Deciphering DC Biology with Genomic Approaches.....	196
4. DC Interactions with the Microbial World.....	199
5. DC Functions.....	209
6. Conclusions.....	219
References.....	219

The Murine Diabetogenic Class II Histocompatibility Molecule I-A^{g7}: Structural and Functional Properties and Specificity of Peptide Selection

Anish Suri and Emil R. Unanue

Abstract.....	235
1. Introduction.....	235

2. Structural Features of I-A ^{G7} and DQ8.....	236
3. Biochemical Basis of Peptide Selection by I-A ^{G7}	241
4. Why Is There a Difference in Results Between Binding and Peptide Selection?	254
5. The Biological Role of I-A ^{G7}	256
