Preface	xiii

Discovery of Activation-Induced Cytidine Deaminase, the Engraver of Antibody Memory

Masamichi Muramatsu, Hitoshi Nagaoka, Reiko Shinkura,
Nasim A. Begum, and Tasuku Honjo

Abstract	1
1. Introduction	2
2. Identification of AID as a Key Molecule in CSR and SHM	4
3. AID Is the Only B-Cell-Specific Factor Required for Both CSR and SHM	8
4. Functional Domains of AID	11
5. AID Is Involved in a DNA Cleavage Step	14
6. Major Hypotheses for the Action of AID	16
7. Critical Examination of the DNA Deamination Model	19
8. Evidence for a Novel Function of UNG in CSR	24
9. Conclusion	28
References	29

DNA Deamination in Immunity: AID in the Context of Its APOBEC Relatives

Silvestro G. Conticello, Marc-Andre Langlois,
Zizhen Yang, and Michael S. Neuberger

Abstract	37
1. Introduction	38

2. AID: The DNA Deaminase Trigger for Antibody Diversification	38
3. The Zn-Dependent Deaminase Superfamily	39
4. Timeline of AID/APOBEC Evolution	48
5. APOBEC1: An RNA-Editing Enzyme That Can Also Act on DNA	49
6. APOBEC2: A Muscle-Specific Family Member of Unknown Function/Activity	50
7. APOBEC4: A Distant or Ancestral Member of the AID/APOBEC Family	51
8. APOBEC3s: DNA Deaminases Active in Viral Restriction	52
9. Conclusion	63
References	63

The Role of Activation-Induced Deaminase in Antibody Diversification and Chromosome Translocations

Almudena Ramiro, Bernardo Reina San-Martin, Kevin McBride, Mila Jankovic, Vasco Barreto, André Nussenzweig, and Michel C. Nussenzweig

Abstract	75
1. Introduction	76
2. Events Preceding the DNA Lesion	77
3. The DNA Lesion	78
4. DNA Damage Detection and Resolution During CSR	85
5. AID and Lymphomagenic Lesions	93
6. Conclusions and Perspectives	96
References	96

Targeting of AID-Mediated Sequence Diversification by *cis*-Acting Determinants

Shu Yuan Yang and David G. Schatz

Abstract	109
1. Introduction	109
2. The Link Between Transcription and AID-Mediated Sequence Diversification	111
3. Other <i>cis</i> -Acting Determinants Involved in the Targeting of AID	116

4. Future Outlook.....	120
References	120

AID-Initiated Purposeful Mutations in Immunoglobulin Genes

Myron F. Goodman, Matthew D. Scharff, and Floyd E. Romesberg

Abstract.....	127
1. Introduction	128
2. Biochemical Basis of C Deamination by APOBEC Enzymes	132
3. How and Why Might AID-Specific Mutations Be Targeted?.....	141
4. Selection of AID-Induced Mutations During Ab Maturation	143
References	149

Evolution of the Immunoglobulin Heavy Chain Class Switch Recombination Mechanism

Jayanta Chaudhuri, Uttiya Basu, Ali Zarrin, Catherine Yan,
Sonia Franco, Thomas Perlot, Bao Vuong, Jing Wang,
Ryan T. Phan, Abhishek Datta, John Manis, and Frederick W. Alt

Abstract.....	157
1. Overview of Genetic Alterations in B Lymphocytes	158
2. Activation-Induced Cytidine Deaminase	162
3. Role of Germ Line Transcription and Switch Regions in CSR....	169
4. Posttranscriptional Regulation of AID.....	180
5. Mechanisms Involved in Synapsis of AID Initiated DSBs in Widely Separated S Regions	184
6. General DNA Repair Systems in the Joining Phase of CSR.....	189
7. Evolution of CSR.....	197
References	198

Beyond SHM and CSR: AID and Related Cytidine Deaminases in the Host Response to Viral Infection

Brad R. Rosenberg and E. Nina Papavasiliou

Abstract.....	215
1. Introduction	215

2. Evolution of the AID/APOBEC Cytidine Deaminase Family	216
3. APOBEC3: A Subfamily of Antiviral Cytidine Deaminases	217
4. AID in the Host Response to Viral Infection	229
5. Concluding Remarks	235
References	237

Role of AID in Tumorigenesis

Il-mi Okazaki, Ai Kotani, and Tasuku Honjo

Abstract	245
1. Introduction	246
2. AID Transgenic Mouse Models	247
3. Role of AID in Chromosomal Translocation and Subsequent Lymphomagenesis	249
4. AID Expression in Human B-Cell Malignancies	252
5. Mechanism of AID Expression in Normal and Malignant B Cells	259
6. AID Expression in Normal and Malignant Nonlymphoid Cells	263
7. Concluding Remarks	265
References	265

Pathophysiology of B-Cell Intrinsic Immunoglobulin Class Switch Recombination Deficiencies

Anne Durandy, Nadine Taubenheim, Sophie Peron, and Alain Fischer

Abstract	275
1. Introduction	276
2. Ig-CSR Deficiency Type 1 Caused by Activation-Induced Cytidine Deaminase Deficiency	279
3. Ig-CSR Deficiency Type 2 Caused by UNG Deficiency	289
4. Molecularly Undefined Ig-CSR Deficiency with Normal SHM	292
5. Concluding Remarks	296
References	298
