1. Fate Decisions Regulating Bone Marrow and Peripheral B Lymphocyte Development

1

John G. Monroe and Kenneth Dorshkind

1. Introduction 2
2. B Lymphocyte Development in the Bone Marrow 3
3. Development of Immature B Cells in the Bone Marrow and Periphery 21
4. BCR-Dependent Signaling and Fate Decisions by Bone Marrow and Peripheral Immature B Lymphocytes 23
5. BCR Signaling During the Transitional to Mature B-Lymphocyte Transition 30
6. Peripheral B Lymphocyte Survival: Synergy Between BCR and BAFF-R Signaling 33
7. Development of FO and MZ Mature B Lymphocytes 35
8. Concluding Remarks 36
- Acknowledgments 36
- References 37

2. Tolerance and Autoimmunity: Lessons at the Bedside of Primary Immunodeficiencies

51

Magda Carneiro-Sampaio and Antonio Coutinho

1. Introduction 52
2. PIDs Systematically Associated with Clinical AI 56
3. PIDs Strongly Associated with Clinical AI 67
4. PIDs that Are Mildly Associated with Clinical AI 71
5. PIDs that Are Not Associated with AID 72
6. Concluding Remarks 73
- References 74

3. B-Cell Self-Tolerance in Humans

83

Hedda Wardemann and Michel C. Nussenzweig

1. Antibody Diversity 84
2. Antibodies and Self-Tolerance 85

3. Marginal Zone B Cells	94
4. B-Cell Memory	96
5. Concluding Remarks	100
References	102
 4. Manipulation of Regulatory T-Cell Number and Function with CD28-Specific Monoclonal Antibodies	 111
Thomas Hünig	
1. Aims of this Review	113
2. Positive and Negative Regulation of T-Cell Responses by the CD28/CTLA-4 System	113
3. The Importance of CD28 and CTLA-4 for the Generation and Homeostasis of Treg Cells	115
4. Manipulating the CD28 Pathway: General Considerations	120
5. Conventional and Superagonistic mAb to the Costimulatory Receptor CD28	121
6. <i>In Vitro</i> Expansion of Treg Cells with the Help of CD28-Specific mAb	125
7. <i>In Vivo</i> Effects of Conventional CD28-Specific mAb	126
8. <i>In Vivo</i> Effects of CD28 Superagonists: Predominance of Treg-Cell Activation	128
9. Treatment of Autoimmune and Inflammatory Model Diseases with CD28 Superagonists	132
10. TGN1412—A Superagonistic mAb to Human CD28	135
11. Conclusions	140
Acknowledgments	141
References	141
 5. Osteoimmunology: A View from the Bone	 149
Jean-Pierre David	
1. Opening Remarks: The Old and the New	150
2. Osteoimmunology: A Developmental Encounter	151
3. The TNF Superfamily: A Developmental Link Between Bone and Immune System	152
4. IFNs: Linking Bone Homeostasis to Immunity and T Cells	155
5. B Cells and Bone	157
6. A Bone Quality Control of the Immune Response	158
Acknowledgments	160
References	160

6. Mast Cell Proteases	167
Gunnar Pejler, Magnus Åbrink, Maria Ringvall, and Sara Wernersson	
1. Introduction	169
2. Expression of MC Proteases	171
3. Genetic Organization and Regulation of Transcription	176
4. Evolution of MC Proteases	182
5. Protein Organization and Processing	184
6. Three-Dimensional Structure	187
7. Cleavage Specificity	190
8. Interaction of MC Proteases with PGs: Implications for Storage, Activity, and Processing	196
9. Substrates for MC Proteases	203
10. <i>In Vivo</i> Function	214
11. MC Protease Inhibitors	226
12. Summary and Future Perspectives	228
Acknowledgments	229
References	229
 Index	 257
Content of Recent Volumes	269
