CONTRIBUTORS TO VOLUME 421	vii
PREFACE	ix
VOLUMES IN SERIES	xi

Section I. Strain Collections and Genetic Nomenclature

1. Strain Collections and Genetic Nomenclature	STANLEY R. MALOY AND KELLY T. HUGHES	3
--	---	---

Section II. Transposons

2. Use of Antibiotic-Resistant Transposons for Mutagenesis	STANLEY R. MALOY	11
3. <i>In Vivo</i> Mutagenesis Using EZ-Tn5 TM	JOHN R. KIRBY	17
4. Identification of Essential Genes in Bacteria	DAVID R. HILLYARD AND MICHAEL J. REDD	21
5. Isolation of Transposon Insertions	STANLEY R. MALOY	35
6. Localized Mutagenesis	STANLEY R. MALOY	42
7. Generation of Deletions and Duplications Using Transposons as Portable Regions of Homology with Emphasis on Mud and Tn10 Transposons	KELLY T. HUGHES	51
8. Target-Directed Proteolysis <i>In Vivo</i>	MARKUS ESER, TANJA HENRICHs, DANA BOYD, AND MICHAEL EH RMANN	68
9. Sets of Transposon-Generated Sequence- Tagged Mutants for Structure-Function Analysis and Engineering	BETH TRAXLER AND ELIORA GACHELET	83
10. Using Genomic Microarrays to Study Insertional/Transposon Mutant Libraries	DAVID N. BALDWIN AND NINA R. SALAMA	90

11. Screening Transposon Mutant Libraries Using Full-Genome Oligonucleotide Microarrays	KELLY M. WINTERBERG AND WILLIAM S. REZNIKOFF	110
12. Creating Recombination-Activated Genes and Sequence-Defined Mutant Libraries Using Transposons	LARRY GALLAGHER, CHERI TURNER, ELIZABETH RAMAGE, AND COLIN MANOIL	126
13. Use of Operon and Gene Fusions to Study Gene Regulation in <i>Salmonella</i>	KELLY T. HUGHES AND STANLEY R. MALOY	140
14. Genomic Screening for Regulatory Genes Using the T-POP Transposon	CHANGHAN LEE, CHRISTOPHER WOZNAK, JOYCE E. KARLINSEY, AND KELLY T. HUGHES	159

Section III. Phage

15. Recombineering: <i>In Vivo</i> Genetic Engineering in <i>E. coli</i> , <i>S. enterica</i> , and Beyond	JAMES A. SAWITZKE, LYNN C. THOMASON, NINA COSTANTINO, MIKHAIL BUBUNENKO, SIMANTI DATTA, AND DONALD L. COURT	171
16. λ -Red Genetic Engineering in <i>Salmonella enterica</i> serovar Typhimurium	JOYCE E. KARLINSEY	199
17. Probing Nucleoid Structure in Bacteria Using Phage Lambda Integrase-Mediated Chromosome Rearrangements	NATHALIE GARCIA-RUSSELL, SAMANTHA S. ORCHARD, AND ANCA M. SEGALL	209
18. Dissecting Nucleic Acid-Protein Interactions Using Challenge Phage	STANLEY R. MALOY AND JEFFREY GARDNER	227
19. Mud-P22	JENNY A. CRAIN AND STANLEY R. MALOY	249
20. Phage Metagenomics	VERONICA CASAS AND FOREST ROHWER	259
