CONTRIBUTORS TO VOLUME 54	ix
---------------------------	----

Complex Regulatory Pathways Coordinate Cell-Cycle Progression and Development in *Caulobacter crescentus*

Pamela J.B. Brown, Gail G. Hardy, Michael J. Trimble and
Yves V. Brun

Abbreviations	2
1. Introduction	2
2. Global Regulation	3
3. Polar Structure Biogenesis and Function	32
4. Chromosome Replication and Segregation, Cell Division, and Cell Shape	60
5. Concluding Remarks	82
Acknowledgements	83
References	84

Sulfur Metabolism in Phototrophic Sulfur Bacteria

Niels-Ulrik Frigaard and Christiane Dahl

Abbreviations	105
1. Introduction	106
2. Anoxygenic Phototrophic Bacteria: Physiology and Taxonomy	107
3. Anoxygenic Phototrophic Sulfur Bacteria: Ecology	116
4. Transformations of Sulfur Compounds	118
5. Oxidative Sulfur Metabolism: Enzymes and Genes	126
6. Evolution of Sulfur Metabolism	165
7. Sulfate Assimilation in Anoxygenic Phototrophic Bacteria	167
8. Conclusions	177
Acknowledgements	179
References	179

Carbon, Iron and Sulfur Metabolism in Acidophilic Micro-Organisms

D. Barrie Johnson and Kevin B. Hallberg

1. Acidophilic Micro-organisms: Overview	202
2. Carbon Metabolism in Acidophilic Micro-organisms.	206
3. Iron Metabolism by Acidophilic Micro-organisms.	219
4. Sulfur Metabolism by Acidophilic Micro-organisms	230
5. Applied and Ecological Aspects	239
Acknowledgments	244
References	245

Chemostat-Based Micro-Array Analysis in Baker's Yeast

Pascale Daran-Lapujade, Jean-Marc Daran,
Antonius J.A. van Maris, Johannes H. de Winde
and Jack T. Pronk

Abbreviations.	258
1. Introduction.	259
2. Experimental Tools	261
3. Specific Growth Rate.	276
4. Context Dependency	279
5. Functional Analysis.	282
6. Evolutionary and Reverse Engineering.	290
7. Outlook	295
8. Concluding Remarks	298
Acknowledgements	299
References	299

A Predatory Patchwork: Membrane and Surface Structures of *Bdellovibrio bacteriovorus*

Carey Lambert, Laura Hobley, Chien-Yi Chang, Andrew Fenton,
Michael Capeness and Liz Sockett

1. Introduction.	314
2. The Role of Flagellar Motility in Predation.	316
3. The Role of Type IV Pili in Predation	326
4. Outer Membrane Proteins.	335

CONTENTS

vii

5. Autotransporters.	340
6. The Role of the Sec System.	344
7. Membrane Chemistry.	345
8. Peptidoglycan Chemistry and Metabolism.	349
9. Summary.	354
Acknowledgements	355
References.	355
 AUTHOR INDEX.	 363
 SUBJECT INDEX.	 395

Color Plate Section to be found in the back of this book

MICHAEL CAPENESS, Institute of Genetics, School of Biology, University of Nottingham, Queen's Medical Centre, Nottingham NG7 2UH, UK

CHEN-YI CHANG, Institute of Genetics, School of Biology, University of Nottingham, Queen's Medical Centre, Nottingham NG7 2UH, UK

CHRISTIANE DAHL, Institut für Mikrobiologie & Biotechnologie, Rheinische Friedrich Wilhelms-Universität Bonn, D-53115 Bonn, Germany

JEAN-MARC DARAN, Department of Biotechnology, Delft University of Technology and Kluyver Centre for Genomics of Industrial Fermentation, Julianalaan 67, 2628 BC Delft, The Netherlands

PASCAL DARAN-LAPUJADE, Department of Biotechnology, Delft University of Technology and Kluyver Centre for Genomics of Industrial Fermentation, Julianalaan 67, 2628 BC Delft, The Netherlands

JOHANNES H. DE WIND, Department of Biotechnology, Delft University of Technology and Kluyver Centre for Genomics of Industrial Fermentation,
