1. T Cell Activation and the Cytoskeleton: You Can't Have One Without the Other

1

Timothy S. Gomez and Daniel D. Billadeau

1. Introduction 2
2. TCR Signaling Leading to Actin Cytoskeletal Remodeling 4
3. Cytoskeletal Control of IS Formation 18
4. Regulation of TCR-Mediated MTOC Polarization 28
5. F-Actin-Mediated Regulation of Integrins 31
6. Cytoskeletal Dynamics and Cell Migration 36
7. Conclusion 48
- References 50

2. HLA Class II Transgenic Mice Mimic Human Inflammatory Diseases 65

Ashutosh K. Mangalam, Govindarajan Rajagopalan, Veena Taneja, and Chella S. David

1. Introduction 68
2. Expression and Function of HLA-DQ Transgenes in Mice 69
3. HLA-DQ Transgenic Mice as Models for Human Allergies 74
4. Expression and Function of HLA-DR Transgenic Mice 77
5. HLA Class II Transgenic Mice Identify the Same Determinants of *M. Tuberculosis*-Derived Proteins as Humans 84
6. Collagen-Induced Arthritis—Model for Human Rheumatoid Arthritis 86
7. Experimental Autoimmune Encephalomyelitis: A Model for Multiple Sclerosis 92
8. Spontaneous Models for Human Type I Diabetes 107
9. Experimental Autoimmune Myasthenia Gravis 111
10. HLA and Gluten Sensitivity—Celiac Disease and *Dermatitis herpetiformis* 113
11. Relapsing Polychondritis 116
12. Spontaneous Autoimmune Myocarditis 119
13. Experimental Autoimmune Thyroiditis (Adapted from Kong *et al.*, 2007) 122
14. Experimental Autoimmune Uveitis (Adapted from Pennesi *et al.*, 2003) 125

15. Bacterial Superantigens and Toxic Shock Syndrome	127
16. Concluding Remarks	132
References	133
 3. Roles of Zinc and Zinc Signaling in Immunity: Zinc as an Intracellular Signaling Molecule	 149
Toshio Hirano, Masaaki Murakami, Toshiyuki Fukada, Keigo Nishida, Satoru Yamasaki, and Tomoyuki Suzuki	
1. Introduction	150
2. Zn Homeostasis, Zn Transporters, and Metallothioneins in Health and Disease	152
3. Role of Zn in the Immune Response	157
4. Role of Zn in Mast Cells	162
5. Zn Signaling	164
6. Conclusion and Future Prospects	167
Acknowledgements	169
References	169
 4. The SLAM and SAP Gene Families Control Innate and Adaptive Immune Responses	 177
Silvia Calpe, Ninghai Wang, Xavier Romero, Scott B. Berger, Arpad Lanyi, Pablo Engel, and Cox Terhorst	
1. Introduction	179
2. Structure, Ligands, and Expression of the SLAM-Family Receptors	182
3. The SLAM-Family Gene Isoforms and Polymorphisms and their Role in a Genetic Predisposition for Systemic Lupus Erythematosus	197
4. The SLAM-Associated Protein	201
5. The Protective Role of SAP in X-Linked Lympho-Proliferative Disease	207
6. The SAP-Related Single SH2-Domain Proteins EAT-2A and EAT-2B	213
7. The SLAM-Family Receptors in NK Cell Responses	214
8. The Role of the SLAM-Family in Lymphoid Cells	220
9. The Role of the SLAM-Family on Nonlymphoid Cells	228
10. Concluding Remarks	232
References	233
 5. Conformational Plasticity and Navigation of Signaling Proteins in Antigen-Activated B Lymphocytes	 251
Niklas Engels, Michael Engelke, and Jürgen Wienands	
1. Introduction	253
2. A Minimal Signaling Kit Couples to Proximal Transducer Enzymes	254
3. Signal Initiation: BCR Clusters with an Open Conformation	255

4. SLP-65: A Gateway to Intracellular Signaling Pathways	259
5. Dynamic Regulation of the BCR-Triggered Ca^{2+} Response	261
6. Mechanism and Function of BCR-Induced Ras Activation	266
7. Concluding Remarks	272
References	272
