Preface

xi

1. Gene Regulatory Networks in Neural Crest Development and Evolution	1
Natalya Nikitina, Tatjana Sauka-Spengler, and Marianne Bronner-Fraser	
1. Gene Regulatory Network Underlies Neural Crest Development	1
2. The Evolutionary Origin of the Neural Crest	4
3. Why <i>Amphioxus</i> Does Not Have Neural Crest	6
4. Ascidians: Origins of the True Neural Crest or Parallel Evolution?	9
5. Neural Crest in Different Vertebrate Species: Evolution in Progress?	11
6. Conclusion and Future Perspectives	11
References	12
2. Evolution of Vertebrate Cartilage Development	15
GuangJun Zhang, B. Frank Eames, and Martin J. Cohn	
1. Introduction	16
2. Skeletal Cell Lineage Determination and the Skeletogenic Gene Network	16
3. Structure of Vertebrate Cartilage Matrix	22
4. Evolutionary History of the Vertebrate Skeleton	24
5. Diversification of Cartilaginous Tissues	26
6. Elaborating the Chondrogenetic Toolkit: Gene/Genome Duplication and the Origin of Collagenous Cartilage	31
References	32
3. <i>Caenorhabditis</i> Nematodes as a Model for the Adaptive Evolution of Germ Cells	43
Eric S. Haag	
1. Introduction	44
2. Germ Cell Adaptation and the Evolution of New Life Histories	44
3. Germ Cell Adaptation: Evo-Devo Meets RNA	48
4. Overview of <i>C. elegans</i> Sex Determination	49

5. <i>Caenorhabditis</i> : A Window on the World of Germline Adaptation	52
6. What Makes a Female Different from a Hermaphrodite?	53
7. Are There Really 50 Ways to Leave Your Lover?	55
8. Evolutionary Dynamics of Germline RNA-Binding Proteins	59
9. Challenges and Future Directions	60
Acknowledgments	61
References	61
 4. New Model Systems for the Study of Developmental Evolution in Plants	 67
Elena M. Kramer	
1. Introduction	68
2. Lower Land Plants	69
3. Angiosperms: The Core Eudicots	74
4. Angiosperms: Lower Eudicots	87
5. Angiosperms: Monocots and Magnoliids	91
6. Conclusions	93
Acknowledgments	94
References	94
 5. Patterning the Spiralian Embryo: Insights from <i>Ilyanassa</i>	 107
J. David Lambert	
1. Introduction	108
2. Early Development in <i>Ilyanassa</i> : The Embryological Perspective	110
3. The Molecular Basis of Spiralian Development in <i>Ilyanassa</i> : Progress and New Problems	116
4. Perspectives on Evolution and Development from the Spiralia	126
5. Conclusions	129
Acknowledgments	130
References	130
 6. The Origin and Diversification of Complex Traits Through Micro- and Macroeolution of Development: Insights from Horned Beetles	 135
Armin P. Moczek	
1. Introduction	136
2. Uniqueness and Diversity of Horns	136
3. Form and Function	138
4. The Ontogeny of Horns	140
5. The Regulation of Prepupal Horn Growth	141

6. The Regulation of Pupal Remodeling	147
7. The Regulation of Plasticity	150
8. The Origins of Novelty and Diversity	152
9. Thoracic Horns as an Exaptation	154
10. Developmental Tradeoffs and the Diversification of Horns and Horned Beetles	156
11. Conclusions	159
Acknowledgments	159
References	160
 7. Axis Formation and the Rapid Evolutionary Transformation of Larval Form	 163
Rudolf A. Raff and Margaret Snoke Smith	
1. Introduction: Sea Urchins and the Evolution of Marine Larval Development	164
2. Axis Formation	167
3. Heterochrony and Modularity in the Evolution of Larval Form	179
4. An Evolutionary Intermediate in Heterochronic Evolution of Direct-Developing Larvae	183
5. Conclusions	184
Acknowledgments	185
References	185
 8. Evolution and Development in the Cavefish <i>Astyanax</i>	 191
William R. Jeffery	
1. Introduction	192
2. Eye Development and Degeneration	194
3. Cellular Mechanisms of Eye Degeneration	197
4. Molecular Mechanisms of Eye Degeneration	200
5. Role of Hedgehog Signaling in Eye Degeneration	205
6. Pigment Cell Regression	207
7. Defective Melanogenesis and Undifferentiated Melanoblasts in Cavefish	210
8. Genetic Basis of Cavefish Albinism	212
9. Evolution of Development	215
Acknowledgments	218
References	218
 <i>Index</i>	 223
<i>Contents of Previous Volumes</i>	229
