Preface xvii

I

MICROBIAL GLYCOLIPIDS, GLYCOPROTEINS AND GLYCOPOLYMERS

1. Overview of the glycosylated components of the bacterial cell envelope 3
Otto Holst, Anthony P. Moran and Patrick J. Brennan
2. Bacterial cell envelope peptidoglycan 15
Waldemar Vollmer and Petra Born
3. Core region and lipid A components of lipopolysaccharides 29
Otto Holst and Antonio Molinaro
4. O-Specific polysaccharides of Gram-negative bacteria 57
Yuriy A. Knirel
5. Teichoic acids, lipoteichoic acids and related cell wall glycopolymers of Gram-positive bacteria 75
Thomas Kohler, Guoqing Xia, Emir Kulauzovic and Andreas Peschel
6. Bacterial capsular polysaccharides and exopolysaccharides 93
Paola Cescutti
7. Bacterial surface layer glycoproteins and "non-classical" secondary cell wall polymers 109
Paul Messner, Eva Maria Egelseer, Uwe B. Sleytr and Christina Schäffer
8. Glycosylation of bacterial and archaeal flagellins 129
Susan M. Logan, Ian C. Schoenhofen and Evelyn C. Soo
9. Glycosylated components of the mycobacterial cell wall: structure and function 147
Delphi Chatterjee and Patrick J. Brennan
10. Glycoconjugate structure and function in fungal cell walls 169
Marlyn Gonzalez, Piet W. J. de Groot, Frans M. Klis and Peter N. Lipke
11. Cytoplasmic carbohydrate molecules: trehalose and glycogen 185
Alan D. Elbein
12. Glycosylated compounds of parasitic protozoa 203
Joanne Heng, Thomas Naderer, Stuart A. Ralph and Malcolm J. McConville
13. Analytical approaches towards the structural characterization of microbial wall glycopolymers 233
I. Darren Grice and Jennifer C. Wilson
14. Single-molecule characterization of microbial polysaccharides 253
Marit Sletmoen, Dionne C.G. Klein and Bjørn T. Stokke

15. Viral surface glycoproteins in carbohydrate recognition: structure and modelling 269
Jeffrey C. Dyason and Mark von Itzstein

II

SYNTHESIS OF MICROBIAL GLYCOSYLATED COMPONENTS

A. Biosynthesis and biosynthetic processes

16. Biosynthesis of bacterial peptidoglycan 287
Jean van Heijenoort
17. Biosynthesis and membrane assembly of lipid A 305
M. Stephen Trent
18. Biosynthesis of O-antigen chains and assembly 319
Peter R. Reeves and Monica M. Cunneen
19. Biosynthesis of cell wall teichoic acid polymers 337
Mark P. Pereira and Eric D. Brown
20. Biosynthesis and assembly of capsular polysaccharides 351
Anne N. Reid and Christine M. Szymanski
21. Biosynthesis of the mycobacterial cell envelope components 375
Delphi Chatterjee and Patrick J. Brennan
22. Biosynthesis of fungal and yeast glycans 393
Morgann C. Reilly and Tamara L. Doering

B. Chemical synthesis

23. Chemical synthesis of bacterial lipid A 415
Shoichi Kusumoto, Koichi Fukase and Yukari Fujimoto
24. Chemical synthesis of the core oligosaccharide of bacterial lipopolysaccharide 429
Paul Kosma

25. Chemical synthesis of lipoteichoic acid and derivatives 455
Christian Marcus Pedersen and Richard R. Schmidt

26. Chemical synthesis of parasitic glycoconjugates and phosphoglycans 477
Nawaf Al-Maharik, Jennifer A. Tee and Andrei V. Nikolaev

III

MICROBE-HOST GLYCOSYLATED INTERACTIONS

27. Bacterial lectin-like interactions in cell recognition and adhesion 551
Joe Tiralongo and Anthony P. Moran
28. Lectin-like interactions in virus-cell recognition: human immunodeficiency virus and C-type lectin interactions 567
Imke Steffen, Theodoros S. Tsegaye and Stefan Pöhlmann
29. Sialic acid-specific microbial lectins 585
Joe Tiralongo
30. Bacterial toxins and their carbohydrate receptors at the host-pathogen interface 599
Clifford A. Lingwood and Radia Mahfoud
31. Toll-like receptor recognition of lipoglycans, glycolipids and lipopeptides 623
Holger Heine and Sabine Riekenberg
32. NOD receptor recognition of peptidoglycan 637
Ivo Gomperts Boneca
33. Microbial interaction with mucus and mucins 655
Stephen D. Carrington, Marguerite Clyne, Colm J. Reid, Eamonn FitzPatrick and Anthony P. Corfield

34. Mannose–fucose recognition by DC-SIGN 673
Jeroen Geurtsen, Nicole N. Driessen and Ben J. Appelmek
35. Host surfactant proteins in microbial recognition 697
Mark R. Thursz and Wafa Khamri
36. T-Cell recognition of microbial lipoglycans and glycolipids 715
Gennaro De Libero

IV

BIOLOGICAL RELEVANCE OF MICROBIAL GLYCOSYLATED COMPONENTS

A. Environmental relevance

37. Extracellular polymeric substances in microbial biofilms 735
Thomas R. Neu and John R. Lawrence
38. Physicochemical properties of microbial glycopolymers 759
Klaus Brandenburg, Patrick Garidel and Thomas Gutschmann
39. Microbial biofilm-related polysaccharides in biofouling and corrosion 781
Heidi Annuk and Anthony P. Moran
40. Microbial glycosylated components in plant disease 803
Max Dow, Antonio Molinaro, Richard M. Cooper and Mari-Anne Newman

B. Medical relevance

41. Antigenic variation of microbial surface glycosylated molecules 821
Daniel C. Stein and Volker Briken

42. Phase variation of bacterial surface glycosylated molecules in immune evasion 837
Michael A. Apicella and Michael P. Jennings
43. Molecular mimicry of host glycosylated structures by bacteria 847
Anthony P. Moran
44. Role of microbial glycosylation in host cell invasion 871
Margaret I. Kanipes and Patricia Guerry

V

BIOTECHNOLOGICAL AND MEDICAL APPLICATIONS

45. Exopolysaccharides produced by lactic acid bacteria in food and probiotic applications 887
Patricia Ruas-Madiedo, Nuria Salazar and Clara G. de los Reyes-Gavilán
46. Industrial exploitation by genetic engineering of bacterial glycosylation systems 903
Mario F. Feldman
47. Glycomimetics as inhibitors in anti-infection therapy 915
Milton J. Kiefel
48. Bacterial polysaccharide vaccines: glycoconjugates and peptide-mimetics 933
Harold J. Jennings and Robert A. Pon
49. Immunomodulation by zwitterionic polysaccharides 957
Rachel M. McLoughlin and Dennis L. Kasper
50. Future potential of glycomics in microbiology and infectious diseases 981
Mark von Itzstein and Anthony P. Moran
