

CONTENTS

<i>Contributors</i>	<i>vii</i>
1. Trophic Factors in the Carotid Body	1
Andrea Porzionato, Veronica Macchi, Anna Parenti, and Raffaele De Caro	
1. Introduction	2
2. Growth and Trophic Factors	6
3. Peptide Neuromodulators as Glomic Potential Trophic Factors	24
4. Concluding Remarks and Perspectives	35
References	37
2. Structure of the Insect Oocyte Nucleus with Special Reference to Interchromatin Granule Clusters and Cajal Bodies	59
Dmitry Bogolyubov and Vladimir Parfenov	
1. Introduction	60
2. Background	62
3. Nuclear Structures of Oocytes in Panoistic Ovaries	70
4. Oocyte Nuclear Structures in Insects with Meroistic-Polytrophic Ovaries	76
5. Oocyte Nuclear Structures in Insects with Meroistic-Telotrophic Ovaries	87
6. Closing Remarks	96
Acknowledgments	99
References	99
3. Galactose Metabolism in Yeast—Structure and Regulation of the Leloir Pathway Enzymes and the Genes Encoding Them	111
Christopher A. Sellick, Robert N. Campbell, and Richard J. Reece	
1. Introduction	112
2. Leloir Pathway Enzymes in Yeast	114
3. The Regulation of <i>GAL</i> Gene Expression	120
4. Chromatin Re-Localization and Transcriptional Memory in <i>GAL</i> Gene Regulation	137
5. Conclusions and Future Directions	142
Acknowledgments	142
References	143

4. Signaling Systems of Lower Eukaryotes and Their Evolution	151
Alexander O. Shpakov and Marianna N. Pertseva	
1. Introduction	152
2. Serpentine-Type Receptors: Organization, Ligands, and Signaling Cascades	155
3. Heterotrimeric G Proteins	187
4. Adenylyl Cyclases	202
5. Guanylyl Cyclases	222
6. Evolution of Eukaryotic Chemosignaling Systems	240
Acknowledgments	254
References	254
5. Mechanisms of Sister Chromatid Pairing	283
Robert V. Skibbens	
1. Introduction	284
2. Structural Cohesins	286
3. Cohesin Enzymology	292
4. Cohesin Deposition	298
5. PDS5 and WAP1/RAD61—Cohesin Regulators	308
6. Cohesion Establishment and CTF7	311
7. Alternate Cohesion Mechanisms	324
8. Human Disease States and Future Considerations	326
Acknowledgments	327
References	327
6. Teleost Lens Development and Degeneration	341
Thomas S. Vihtelic	
1. Introduction	342
2. Zebrafish Lens Developmental Morphology	343
3. Adult Lens Structural Organization	346
4. Molecular Basis of Teleost Lens Formation	349
5. Teleost Lens and Development of Extralenticular Eye Tissues	357
6. Mutational Analysis to Identify Genes Necessary for Zebrafish Lens Development and Maintenance of Transparency	359
7. Summary	364
Acknowledgments	365
References	365
Index	375
