

CONTENTS

CONTRIBUTORS TO VOLUME 48	vii
CONTENTS OF VOLUMES 35-47	ix

Molecular Mechanisms Underlying Vascular Development

JAE-HOON JUNG, SANG-GYU KIM, PIL JOON SEO AND
CHUNG-MO PARK

I. Introduction	3
II. Vascular Tissues	6
III. Growth in Vascular Plants	9
IV. Model Systems for Studying Vascular Development	14
V. Vascular Continuity and Regulatory Signals	17
VI. Regulation of Radial Patterning of Vascular Bundles	26
VII. Identification of Vascular Development-Related Factors	32
VIII. Tracheary Element Differentiation	42
IX. Concluding Remarks	50
References	52

Clock Control Over Plant Gene Expression

ANTOINE BAUDRY AND STEVE KAY

I. Introduction	70
II. Biological Pathways Under the Influence of the Clock in Plants	71
III. Interplay Between the Clock and Gene Expression	75
IV. Architecture of the Plant Clock	85
V. Conclusion and Perspectives	94
References	96

Plant Lectins

ELS J. M. VAN DAMME, NAUSICAA LANNOO AND
WILLY J. PEUMANS

I. Introduction	109
II. Rethinking Lectins in Terms of Carbohydrate Binding Domains	114
III. Overview of Carbohydrate Binding Domains Identified in Plants	115
IV. Sugar Binding Activity and Specificity of Plant Lectins	168

V. Biosynthesis, Topogenesis, and Subcellular Location of Plant Lectins	173
VI. Expression of Lectins in Plants	176
VII. Why do Plants Express Lectins?	181
VIII. The Plant Lectinome	192
References	193

Late Embryogenesis Abundant Proteins

**MING-DER SHIH, FOLKERT A. HOEKSTRA AND
YUE-IE C. HSING**

I. Introduction	212
II. Classification and Occurrence of Lea Proteins	215
III. The Structure of Lea Proteins	222
IV. The Physiological Roles of Lea Proteins	232
V. Conclusion and Future Perspectives	238
References	240
Author Index	257
Subject Index	265
