Contributors vii

- 1 The Inspection Paradox and Whole-Genome Analysis 1**
Marc Jeanpierre
 - I. Inspection Paradox 2
 - II. Homozygosity Mapping 6
 - III. X-Linked Mutations 10
 - IV. Discussion 14
 - References 16

- 2 Gene Expression Studies in Mosquitoes 19**
Xiao-Guang Chen, Geetika Mathur
and Anthony A. James
 - I. Introduction 20
 - II. Study of Gene Expression in Mosquitoes 21
 - III. Concluding Remarks 41
 - References 42

- 3 Phylogeny of Tec Family Kinases: Identification of a Premetazoan Origin of Btk, Bmx, Itk, Tec, Txk, and the Btk Regulator SH3BP5 51**
Csaba Ortutay, Beston F. Nore, Mauno Vihinen,
and C.I. Edvard Smith
 - I. Tyrosine kinases and the Tec Family 52
 - II. Aim of this Review 55
 - III. The function of individual domains in TFKs 56
 - IV. The ancestry of TFKs 61
 - V. SH3BP5—A conserved negative regulator of TFKs 66
 - VI. The origin of phosphotyrosine signaling and the role of cytoplasmic tyrosine Kinases 66
 - References 68

4	Therapeutic Approaches to Ion Channel Diseases	81
	Diana Conte Camerino, Jean-François Desaphy, Domenico Tricarico, Sabata Pierno, and Antonella Liantonio	
	I. Introduction	82
	II. Pharmacotherapy of Ion Channelopathies	83
	III. Molecular Pharmacology of Ion Channels	112
	IV. Conclusions	132
