Section I. Defining the Mitochondrial Proteome, Including Phosphorylated, Acetylated, and Palmitoylated Proteins 1

1. The Mitochondrial Proteome Database: MitoP2 3

M. Elstner, C. Andreoli, T. Klopstock, T. Meitinger, and H. Prokisch

1. Introduction	4
2. Yeast, Human, and Mouse Proteome Information	6
3. Mitochondrial Reference Set, Candidates, and SVM Prediction Score	8
4. Integrated Genome-Wide Approaches	9
5. Other Search Options: Restrictions to Functional Categories, Gene Locus and Disease-Causing Proteins	12
6. Output Lists and Practical Examples	14
References	17

2. Predicting Proteomes of Mitochondria and Related Organelles from Genomic and Expressed Sequence Tag Data 21

Daniel Gaston, Anastasios D. Tsoulos, and Andrew J. Roger

1. Introduction	22
2. Data Preparation	28
3. Screening Large Datasets for Mitochondrial Proteins	29
4. Detailed Analysis	33
5. Comparison of Methods	41
Acknowledgments	44
References	44

3. Proteome Characterization of Mouse Brain Mitochondria Using Electrospray Ionization Tandem Mass Spectrometry 49

X. Fang and Cheng S. Lee

1. Introduction	50
-----------------	----

2. Analysis of Mitochondrial Proteome by Two-Dimensional PAGE and LC-MS Techniques	51
3. Selective Proteome Enrichment by Capillary Isotachopheresis (CITP)-Based Separations	51
4. Analysis of Mouse Brain Mitochondria Using the CITP-Based Proteome Platform	52
5. Proteome Characterization of Mouse Brain Mitochondria	55
References	60
4. ³²P Labeling of Protein Phosphorylation and Metabolite Association in the Mitochondria Matrix	63
Angel M. Aponte, Darci Phillips, Robert A. Harris, Ksenia Blinova, Stephanie French, D. Thor Johnson, and Robert. S. Balaban	
1. Introduction	64
2. Methods	65
3. Results and Discussion	72
4. Summary	78
References	79
5. Selective Enrichment in Phosphopeptides for the Identification of Phosphorylated Mitochondrial Proteins	81
Gabriella Pocsfalvi	
1. Introduction	82
2. Off-Line Phosphopeptide Enrichment Methods	84
3. On-Line 2D-LC Phosphopeptide Enrichment Methods	90
4. Mass Spectrometry-Based Methods	92
5. Quantitative Phosphoproteomics	94
References	94
6. Post-translational Modifications of Mitochondrial Outer Membrane Proteins	97
Anne M. Distler, Janos Kerner, Kwangwon Lee, and Charles L. Hoppel	
1. Introduction	98
2. Isolation of Mitochondria and Mitochondrial Membranes	99
3. Detection of Post-translational Modifications Using One-dimensional Gel Electrophoresis	101
4. Focused Proteomics Using Immunological Approaches	105
5. Shotgun Methods for Identification of Post-translational Modifications	109
6. Conclusion	111
Acknowledgments	111
References	112

7. Analysis of Tyrosine-Phosphorylated Proteins in Rat Brain Mitochondria	117
Urs Lewandrowski, Elena Tibaldi, Luca Cesaro, Anna M. Brunati, Antonio Toninello, Albert Sickmann, and Mauro Salvi	
1. Introduction	118
2. Identification of Src Tyrosine Kinase Substrates in Rat Brain Mitochondria	119
3. Mass Spectrometric Analysis of Tyrosine-Phosphorylated Peptides in Mitochondria	125
4. Bioinformatic Tools to Analyze the Potential Role of Tyrosine Phosphorylation	131
Acknowledgment	134
References	134
8. Acetylation of Mitochondrial Proteins	137
Matthew D. Hirschey, Tadahiro Shimazu, Jing-Yi Huang, and Eric Verdin	
1. Introduction	138
2. Purification of Enzymatically Active SIRT3	138
3. SIRT3 Enzymatic Deacetylation Assay	141
4. Detection of Acetylated Proteins in Mitochondria	144
5. Conclusion	146
References	147
9. Non-radioactive Detection of Palmitoylated Mitochondrial Proteins Using an Azido-Palmitate Analogue	149
Morris A. Kostiuik, Bernd O. Keller, and Luc G. Berthiaume	
1. Introduction	150
2. Synthesis of 12-Azidododecanoate and 14-Azidotetradecanoate	153
3. Synthesis of Tagged Phosphine Probes	155
4. Preparation of Azido-Fatty Acids and Tagged Phosphine Stock Solutions	155
5. Production of 14-Azidotetradecanoyl-CoA Derivatives	156
6. <i>In Vitro</i> Labeling of Proteins with 14-Azidotetradecanoyl-CoA and Tagged Phosphines	156
7. Isolation of Intact Mitochondria from Livers of Sprague-Dawley Rats	157
8. Chromatography of Soluble Mitochondrial Proteins	158
9. Labeling of Anion Exchange Eluates with 14-Azidotetradecanoyl-CoA and Phosphine-Biotin	158
10. Identification of Labeled Proteins by Mass Spectrometry	159

11. Demonstration that Acylation of Cysteine Residues Occurs via a Thioester Bond	160
12. Concluding Remarks	162
References	163

Section II. Characterization of Mitochondrial Kinases, Phosphatases, Dynamics, and Respiratory Function 167

10. Detection of a Mitochondrial Kinase Complex that Mediates PKA-MEK-ERK-Dependent Phosphorylation of Mitochondrial Proteins Involved in the Regulation of Steroid Biosynthesis	169
Cristina Paz, Cecilia Poderoso, Paula Maloberti, Fabiana Cornejo Maciel, Carlos Mendez, Juan J. Poderoso, and Ernesto J. Podestá	
1. Introduction	170
2. Steroidogenic Cells	171
3. Analysis of a Mitochondrial Kinase Complex	172
4. Analysis of a Mitochondrial Acyl-CoA Thioesterase, Acot2 as a Phosphoprotein	186
References	190
11. Isolation of Regulatory-Competent, Phosphorylated Cytochrome c Oxidase	193
Icksoo Lee, Arthur R. Salomon, Keping Yu, Lobelia Samavati, Petr Pecina, Alena Pecinova, and Maik Hüttemann	
1. Introduction	194
2. Purification of Mitochondria Maintaining Protein Phosphorylation	195
3. Isolation of Cytochrome c Oxidase from Mitochondria	199
4. Analysis of Cytochrome c Oxidase Phosphorylation	204
5. Concluding Remarks	208
References	209
12. Using Functional Genomics to Study PINK1 and Metabolic Physiology	211
Camilla Scheele, Ola Larsson, and James A. Timmons	
1. Introduction	212
2. Studying Mitochondrial Modulation in Humans <i>In Vivo</i>	214
3. Cellular Mitochondrial Models	216
4. Considerations When Using Short Interfering RNAs	218
5. <i>Ex Vivo</i> Gene Expression Analysis	222
References	226

13. Functional Characterization of Phosphorylation Sites in Dynamin-Related Protein 1	231
J. Thomas Cribbs and Stefan Strack	
1. Introduction	232
2. Replacement of Endogenous with Phosphorylation-Site Mutant Drp1	234
3. Analysis of Drp1 Phosphorylation	237
4. Production and Assays of Recombinant Drp1	240
5. Cell Death Assays	243
6. Mitochondrial Shape Analysis with ImageJ	245
7. Appendix: Morphometry Macro	250
References	251
14. Functional Characterization of a Mitochondrial Ser/Thr Protein Phosphatase in Cell Death Regulation	255
Gang Lu, Haipeng Sun, Paavo Korge, Carla M. Koehler, James N. Weiss, and Yibin Wang	
1. Introduction	256
2. Identification of Protein Phosphatases in Mitochondria	258
3. Characterization of Mitochondrial Localization of PP2Cm in Mammalian Cells	260
4. Functional Characterization of PP2Cm in Cultured Cells	264
5. Functional Characterization of PP2Cm in Cell Death and Mitochondrial Regulation	267
6. Mitochondrial Phosphatase in Cell Death Regulation	270
Acknowledgments	271
References	271
15. Distinguishing Mitochondrial Inner Membrane Orientation of Dual Specific Phosphatase 18 and 21	275
Matthew J. Rardin, Gregory S. Taylor, and Jack E. Dixon	
1. Introduction	276
2. Analysis of Phosphatase Activity of DSP18	277
3. Isolation of Highly Purified Rat Kidney Mitochondria and Subfractionation	279
4. Mitochondrial Inner Membrane Association of DSP18 and DSP21	283
Acknowledgments	286
References	287

16. Monitoring Mitochondrial Dynamics with Photoactivateable Green Fluorescent Protein	289
Anthony J. A. Molina and Orian S. Shirihai	
1. Mitochondrial Dynamics	290
2. PAGFPmt	292
3. Tracking Individual Fusion and Fission Events	293
4. Quantifying Networking Activity in Whole Cells: Whole Cell Mitochondrial Dynamics Assay	296
5. Potential Artifacts and Important Controls	301
6. Comparison with an Alternative Method	302
Acknowledgments	303
References	303
17. Determination of Yeast Mitochondrial KHE Activity, Osmotic Swelling and Mitophagy	305
Karin Nowikovsky, Rodney J. Devenish, Elisabeth Froschauer, and Rudolf J. Schweyen	
1. Introduction	306
2. Disturbance of Mitochondrial K^+ Homeostasis by dox-Regulated Mdm38 Expression	307
3. Morphological Changes in Mitochondria in Mdm38-Depleted Cells: Confocal Microscopy and Electron Microscopy	309
4. Measurement of KHE Activity and Other Bioenergetic Parameters	310
5. Following Mitophagy Using a Novel Biosensor and Fluorescence Microscopy	313
6. Growth and Preparation of Cells for Fluorescence Microscopy Observations of Mitophagy	314
7. Fluorescence Microscopy	315
Acknowledgments	316
References	317
18. Imaging Axonal Transport of Mitochondria	319
Xinnan Wang and Thomas L. Schwarz	
1. Introduction	320
2. Protocols to Image Axonal Transport of Mitochondria in Rat Hippocampal Neurons	324
3. Protocols to Image Axonal Transport of Mitochondria in <i>Drosophila</i> Larval Neurons	328
4. Conclusion	331
Acknowledgments	332
References	332

19. Generation of mtDNA-Exchanged Cybrids for Determination of the Effects of mtDNA Mutations on Tumor Phenotypes 335

Kaori Ishikawa and Jun-Ichi Hayashi

1. Introduction 336
2. Establishment of ρ^0 Cells of Mice 337
3. Preparation and Enucleation of mtDNA-Donor Cells 340
4. Cell Fusion between ρ^0 Cells and Cytoplasts 341
5. Concluding Remarks 343
- References 344

Section III. Mitochondrial Function in Pancreatic Beta Cells and Insulin-Responsive Tissues 347**20. Functional Assessment of Isolated Mitochondria *In Vitro* 349**

Ian R. Lanza and K. Sreekumaran Nair

1. Introduction 350
2. Mitochondrial Isolation Procedures 354
3. Mitochondrial ATP Production 360
4. Mitochondrial Respiration 365
5. Summary 369
- References 369

21. Assessment of *In Vivo* Mitochondrial Metabolism by Magnetic Resonance Spectroscopy 373

Douglas E. Befroy, Kitt Falk Petersen, Douglas L. Rothman, and Gerald I. Shulman

1. Introduction 374
2. *In Vivo* Magnetic Resonance Spectroscopy 375
3. Insulin Resistance and Resting Mitochondrial Metabolism 386
4. Conclusions 389
- References 389

22. Methods for Assessing and Modulating UCP2 Expression and Function 395

Lício A. Velloso, Giovanna R. Degasperi, Aníbal E. Vercesi, and Mário A. Saad

1. Introduction 396
2. Analysis of UCP2 Expression by Immunoblot 397
3. Analysis of UCP2 Expression by Real-Time PCR 399

4. Mitochondria Respiration Assay	400
5. Modulating UCP2 Expression by Cold Exposure	400
6. Inhibiting UCP2 Expression by Antisense Oligonucleotide	401
7. Inhibiting PGC-1 α as an Indirect Means of Controlling UCP2 Expression	402
References	403
23. Measuring Mitochondrial Bioenergetics in INS-1E Insulinoma Cells	405
Charles Affourtit and Martin D. Brand	
1. Introduction	406
2. Quantification of Cellular Bioenergetics—Theoretical Aspects	407
3. INS-1E Cells—A Valuable Pancreatic Beta Cell Model	411
4. Measurement of Coupling Efficiency in Trypsinized INS-1E Cells	416
5. Noninvasive Measurement of Cellular Bioenergetics	418
Acknowledgment	422
References	423
24. Investigating the Roles of Mitochondrial and Cytosolic Malic Enzyme in Insulin Secretion	425
Rebecca L. Pongratz, Richard G. Kibbey, and Gary W. Cline	
1. Introduction	426
2. Malic Enzyme mRNA Expression in Rat Insulinoma INS-1 832/13 Cells, Rat Islets, and Mouse Islets	428
3. siRNA Knock-Down of ME1 and ME2 in INS-1 832/13 β -Cells	432
4. Enzymatic Assays to Determine Activity of Cytosolic and Mitochondrial Malic Enzymes	435
5. Calculating Relative Rates of Anaplerotic Pathways from ^{13}C -Glutamate Isotopomer Distribution	442
6. Discussion	448
References	449
25. Insulin Secretion from β-Cells is Affected by Deletion of Nicotinamide Nucleotide Transhydrogenase	451
Kenju Shimomura, Juris Galvanovskis, Michelle Goldsworthy, Alison Hugill, Stephan Kaizak, Angela Lee, Nicholas Meadows, Mohamed Mohideen Quwailid, Jan Rydström, Lydia Teboul, Fran Ashcroft, and Roger D. Cox	
1. Introduction	452
2. Gene-Driven ENU Screens	453
3. Generating BAC Transgenics	457

4. Isolation of Islets of Langerhans from Mouse Pancreas	460
5. RNA Interference (RNAi) Methodologies on Insulinoma Cell Lines	464
6. Measuring Intracellular Calcium	467
7. Measuring Hydrogen Peroxide in Mitochondria	468
8. Imaging of Mitochondrial Membrane Potential Changes by Confocal Microscopy	471
9. Measuring NNT Activity	475
10. Conclusions	477
References	478
