

CONTENTS

Contributors	ix
--------------	----

1. Bacterial L-Forms

E. J. Allan, C. Hoischen, and J. Gumpert	
I. Introduction	2
II. Definition and Characteristics of L-Forms	3
A. Definition of L-forms	3
B. Induction and cultivation	6
III. Significance of L-Forms	9
A. Contributions to bacterial cell division	10
B. Contributions to membrane organization	14
C. Biotechnology	18
D. L-form interaction and association with eukaryotes	21
IV. Conclusions	31
Acknowledgments	31
References	31

2. Biochemistry, Physiology and Biotechnology of Sulfate-Reducing Bacteria

Larry L. Barton and Guy D. Fauque	
I. Introduction	43
II. Diversity of SRB	44
A. Distribution in the environment	44
B. Major characteristics	45
III. Central Metabolic Pathways of SRB	46
A. Sulfur metabolism	46
B. Nitrogen metabolism	49
C. Hydrogen metabolism	51
D. Oxygen metabolism	52
E. Fermentation of organic substrates	53
F. Fermentation of inorganic sulfur compounds	53
G. Carbon metabolism	54
IV. Characteristics of Electron Transfer Proteins	54
A. Soluble electron transfer proteins	54
B. Membrane-associated electron transport complexes	58

V. Environmental Impact of SRB	59
A. Biocorrosion of ferrous metals	59
B. Corrosion of concrete and stonework	62
C. Impact on the petroleum industry	63
VI. Biotechnology of SRB	65
A. Bioremediation of organic compounds	65
B. Immobilization of toxic metals	72
C. Reduction of azo dyes	81
D. Recovery of precious metals	82
VII. Perspective	84
Acknowledgments	84
References	84

3. Biotechnological Applications of Recombinant Microbial Prolidases

Casey M. Theriot, Sherry R. Tove, and Amy M. Grunden

I. Introduction	100
II. Prolidase	103
A. Mechanism of substrate specificity and catalysis	103
B. Proposed reaction mechanism	105
C. Structure–function information provided by the solved <i>Pyrococcus furiosus</i> prolidase structure	106
D. Molecular and catalytic properties of recombinant prolidases	109
III. Applications of Prolidases	111
A. Detoxification of OP compounds	111
B. Uses in the food industry	116
C. Impact on human health	118
IV. Advances in and Limitations of the Use of Prolidase for Biotechnological Applications	121
V. Conclusions	123
Acknowledgments	123
References	124

4. The Capsule of the Fungal Pathogen *Cryptococcus neoformans*

Oscar Zaragoza, Marcio L. Rodrigues, Magdia De Jesus, Susana Frases, Ekaterina Dadachova, and Arturo Casadevall

I. Introduction	134
II. Capsule Components and Structure	136
A. Structure of capsular components	138
B. Capsule dynamics	145

III. Capsule Synthesis in <i>Cryptococcus</i>	154
A. Genes, enzymes and signaling pathways	154
B. GXM traffic in <i>C. neoformans</i>	166
C. Polysaccharide connections at the <i>C. neoformans</i> surface	170
IV. Capsule Functions in <i>C. neoformans</i> : The Capsule as a Virulence Factor: Function During the Interaction with the Host	172
A. Role of the capsule during interaction with the host	172
B. Role of the exopolysaccharides during infection	178
C. Origin of the capsule as virulence factor	188
V. Use of Capsular Components as Antifungal Targets and Vaccine	190
A. Capsule as an antifungal target: mAbs to the capsule as therapeutic alternative	190
B. Use of capsular components as vaccine	194
VI. Future Perspectives	195
Acknowledgments	196
References	196

5. Baculovirus Interactions *In Vitro* and *In Vivo*

Xiao-Wen Cheng and Dwight E. Lynn

I. Introduction	218
II. Baculovirus Infection Process	219
III. Baculovirus Interactions	220
IV. Baculovirus Interactions <i>In Vitro</i>	221
A. Antagonistic interactions	221
B. Neutralistic interactions	230
V. Baculoviruses Interactions <i>In Vivo</i>	232
A. Neutralism	232
B. Mutualism	233
C. Antagonism	234
VI. Conclusions	235
VII. Future Prospects	235
Acknowledgments	235
References	236

6. Posttranscriptional Gene Regulation in Kaposi's Sarcoma-Associated Herpesvirus

Nicholas K. Conrad

I. Introduction	242
II. KSHV-Encoded miRNAs	243
A. Discovery and conservation of KSHV-encoded miRNAs	244
B. Targets of KSHV miRNAs	245
C. KSHV miR-K12-II is an ortholog of miR-155	245

III. ORF57, A Multifunctional Regulator of Gene Expression	246
A. ORF57 stimulates the export of intronless viral mRNAs	247
B. ORF57 affects transcription and RNA stability	248
C. ORF57 enhances viral pre-mRNA splicing	250
IV. SOX Destabilizes Cellular mRNAs	250
V. Kaposin B Stabilizes AU-Rich mRNAs	251
VI. The PAN-ENE is a <i>cis</i> -acting RNA Stability Element	252
VII. Summary	253
Acknowledgment	254
References	254
Index	263
Contents of Previous Volumes	269
Color Plate Section	
Microbial Pathogenesis	
I. Introduction	269
II. Bacterovirus Interactions in Vivo and in Vitro	270
A. Xiao-Wen Cheng and Dwight E. Lyons	270
B. Introduction	270
C. Bacterovirus Infection Processes	270
D. Bacterovirus Interactions in Bacterial Systems	270
E. Bacterovirus Interactions in Viral Systems	270
F. Antagonistic Interactions	270
G. Neutrophilic Interactions	270
H. Bacterovirus Interactions in Vivo	270
I. Bacterovirus Interactions in Vitro	270
J. Impact on Human Health	270
K. Advantages and Limitations of the Use of Bacterovirus	270
L. Applications for Biotechnological Purposes	270
M. Conclusion	270
N. Acknowledgments	270
O. References	270
III. The Capsule of the Fungal Pathogen <i>Cryptococcus neoformans</i>	270
A. Posttranscriptional Gene Regulation in Kaposi's	270
B. Sarcoma-Associated Herpesvirus	270
C. KSHV-Encoded mRNAs	270
D. Discovery and Conservation of KSHV-Encoded mRNAs	270
E. Targets of KSHV mRNAs	270
F. KSHV mRNAs: A New Class of mRNAs	270
