vii

1. The Physiological Role of Lysyl tRNA Synthetase in the Immune System 1

Hovav Nechushtan, Sunghoon Kim, Gillian Kay, and Ehud Razin

1. Gene Sharing and Noncanonical Protein Roles 2
2. Aminoacyl-tRNA Synthetases (AaRSs) and the Multisynthetase Complex 3
3. LysRS 8
4. Concluding Remarks 21
- References 21

2. Kill the Bacteria . . . and Also Their Messengers? 29

Robert Munford, Mingfang Lu, and Alan Varley

1. Lipopolysaccharide (LPS) Sensing by MD-2-TLR4 30
2. Acyloxyacyl Hydrolase 31
3. LPS Deacylation *In Vivo* 36
4. Inactivating LPS *In Vivo* 38
5. Potential Clinical Connections 43
6. Conclusion 44
- Acknowledgments 44
- References 44

3. Role of SOCS in Allergic and Innate Immune Responses 49

Suzanne L. Cassel and Paul B. Rothman

1. Atopic Immune Responses 51
2. SOCS Family 53
3. SOCS Genes 58
4. Conclusion 69
- References 70

4. Multitasking by Exploitation of Intracellular Transport Functions: The Many Faces of FcRn	77
E. Sally Ward and Raimund J. Ober	
1. Introduction	79
2. FcRn: A Historical Perspective	79
3. FcRn is a Multitasking Receptor	80
4. The Molecular Nature of FcRn-IgG Interactions	84
5. The Intracellular Trafficking of FcRn	87
6. Regulation of FcRn Expression	96
7. The Complexity of Engineering FcRn-IgG Interactions	97
8. Cross-Species Differences in FcRn-Binding Specificity and Implications for Preclinical Models	102
9. Concluding Remarks	104
Acknowledgments	104
References	104
