

CONTENTS

Contributors	ix
Preface	xiii
1. Bioinformatic Approaches to Dynein Heavy Chain Classification	
<i>Toshiki Yagi</i>	
I. Introduction	2
II. Methods	3
III. Materials	5
IV. Results and Discussion	6
References	8
2. Identification and Characterization of Dynein Genes in <i>Tetrahymena</i>	
<i>David E. Wilkes, Nicole Bennardo, Clarence W.C. Chan, Yu-Loung Chang, Elizabeth O. Corpuz, Jennifer DuMond, Jordan A. Eboreime, Julianna Erickson, Jonathan Hetzel, Erin E. Heyer, Mark J. Hubenschmidt, Ekaterina Kniazeva, Hallie Kuhn, Michelle Lum, Andrea Sand, Alicia Schep, Oksana Sergeeva, Natt Supab, Caroline R. Townsend, Liesl Van Ryswyk, Hadley E. Watson, Alice E. Wiedeman, Vidyalakshmi Rajagopalan, and David J. Asai</i>	
I. Introduction	12
II. Methods and Results	14
III. Discussion	26
References	27
3. Purification of Axonemal Dyneins and Dynein-Associated Components from <i>Chlamydomonas</i>	
<i>Stephen M. King</i>	
I. Introduction	32
II. Detachment and Isolation of Flagella	34
III. Flagellar Demembration	35
IV. Dynein Extraction from Flagellar Axonemes	36
V. Fractionation of Flagellar Extracts	36
VI. Immunoprecipitation from Cell Body Extracts	44
VII. Conclusions	46
References	46

4. Purification of Dyneins from Sperm Flagella	
<i>Kazuo Inaba and Katsutoshi Mizuno</i>	
I. Introduction	50
II. Short Protocol for Isolation of Sperm Outer Arm Dynein from the Ascidian <i>C. intestinalis</i>	51
III. Collection of Sperm	52
IV. Isolation of Sperm Flagella	54
V. Purification of Outer Arm Dyneins	55
VI. Regulation of Outer Arm Dynein	61
VII. Purification of Inner Arm Dyneins	61
VIII. Conclusion	62
References	62
5. Protein Engineering Approaches to Study the Dynein Mechanism using a <i>Dictyostelium</i> Expression System	
<i>Takahide Kon, Tomohiro Shima, and Kazuo Sutoh</i>	
I. Introduction	66
II. Preparation of Recombinant Dynein	67
III. FRET-Based Detection of Dynein's Conformational Changes	72
IV. Motility Assays	75
References	80
6. Biophysical Measurements on Axonemal Dyneins	
<i>Hiroaki Kojima, Shiori Toba, Hitoshi Sakakibara, and Kazuhiro Oiwa</i>	
I. Introduction	84
II. Materials and Methods	85
III. Results and Discussion	100
IV. Summary	102
References	103
7. Protein Electroporation into <i>Chlamydomonas</i> for Mutant Rescue	
<i>Masahito Hayashi and Ritsu Kamiya</i>	
I. Introduction	107
II. Materials and Methods	108
III. Discussion	110
References	110

8. Analysis of the Role of Nucleotides in Axonemal Dynein Function

Chikako Shingyoji

I. Introduction	114
II. Materials and Methods	117
III. Methods	119
IV. Results and Discussion	122
V. Outlook	129
References	130

9. The Regulation of Dynein-Driven Microtubule Sliding in *Chlamydomonas* Flagella by Axonemal Kinases and Phosphatases*Candice A. Elam, Winfield S. Sale, and Maureen Wirschell*

I. Introduction	134
II. The <i>Chlamydomonas</i> Experimental System: Axoneme Isolation and the Flagellar Mutants	137
III. <i>In Vitro</i> Microtubule Sliding Assays: The Method and Discovery of Kinases and Phosphatases that Regulate Dynein	138
IV. Biochemical Analysis of Kinases and Phosphatases Localized to the <i>Chlamydomonas</i> Axoneme	142
V. Discussion of the Regulatory Model and Concluding Remarks	145
References	147

10. Analysis of Redox-Sensitive Dynein Components

Ken-ichi Wakabayashi

I. Introduction	154
II. Materials and Reagents	155
III. Methods	155
References	160

11. Calcium Regulation of Ciliary Motility: Analysis of Axonemal Calcium-Binding Proteins

Christen DiPetrillo and Elizabeth Smith

I. Introduction	164
II. How Does Calcium Enter Motile Cilia?	164
III. What Ciliary Proteins Serve as Calcium Sensors?	165
IV. How Does a Change in Calcium Concentration Modulate Motility?	173
V. Summary	176
References	176

12. Isolation and Analysis of Radial Spoke Proteins

Pooja Kelekar, Mei Wei, and Pinfen Yang

I. Introduction	182
II. Isolation of Intact RS Complexes	183
III. Two-Dimensional Gel Electrophoresis of the RS Complexes	188
IV. Blue Native PAGE for Characterizing Subparticles in RS Complexes	192
V. Summary	195
References	195

13. Analysis of the Central Pair Microtubule Complex in *Chlamydomonas reinhardtii*

David R. Mitchell and Brandon Smith

I. Introduction	198
II. Basic Methods for Central Pair Structure Analysis by Thin Section Electron Microscopy	199
III. Genetic Dissection of the Central Pair	201
IV. Biochemical Dissection of the Central Pair	205
V. Methods to Study Central Pair Structural Conformation	207
VI. Summary	211
References	212
