

Contents

Contributors ix

- 1 **Aggression** 1
Robert Huber and Patricia A. Brennan
- 2 **Evolutionary Aspects of Aggression: The Importance of Sexual Selection** 7
Patrik Lindenfors and Birgitta S. Tullberg
 - I. Introduction 8
 - II. Sexual Selection 9
 - III. Mating Systems 12
 - IV. When to Fight and When to Flee 13
 - V. Case Studies: Sexual Dimorphism 16
 - VI. Humans and the Mammalian Pattern 20
 - Acknowledgment 20
 - References 21
- 3 **Signaling Aggression** 23
Moira J. van Staaden, William A. Searcy, and Roger T. Hanlon
 - I. Introduction 24
 - II. Bird Song Signals Aggressive Intentions: Speak Softly and Carry a Big Stick 31
 - III. Visual Displays Signal Aggressive Intent in Cephalopods: The Sweet Smell of Success 37
 - Acknowledgments 44
 - References 44

4 Self-Structuring Properties of Dominance Hierarchies: A New Perspective 51

Ivan D. Chase and Kristine Seitz

- I. Introduction 52
- II. Definitions 53
- III. Animal Models 55
- IV. Factors Affecting Dominance Relationships in Pairs
of Animals 58
- V. Formation of Dominance Relationships and Dominance
Hierarchies in Groups 63
- VI. A New Approach to Explaining the Formation of Linear
Hierarchies: Behavioral Processes 70
- VII. Conclusion 74
- Acknowledgments 75
- References 75

5 Neurogenomic Mechanisms of Aggression in Songbirds 83

Donna L. Maney and James L. Goodson

- I. Aggression in Context 84
- II. Hormonal Mechanisms of Aggression 87
- III. Transcriptional Activity and Neural Mechanisms
of Aggression in Birds 95
- IV. A Natural Model Uniting Social Behavior, Hormones, and
Genetics 103
- V. Future Directions 109
- Acknowledgments 110
- References 110

6 Genetics of Aggression in Voles 121

Kyle L. Gobrogge and Zuoxin W. Wang

- I. Introduction 122
- II. The Prairie Vole Model 122
- III. Neural Correlates 125
- IV. Neural Circuitry 127
- V. Neurochemical Regulation of Selective Aggression 128
- VI. Molecular Genetics of Selective Aggression 136
- VII. Drug-induced Aggression 136
- VIII. Conclusions and Future Directions 138
