<i>Contributors</i>	<i>xiii</i>
<i>Preface</i>	<i>xix</i>
<i>Volumes in Series</i>	<i>xxi</i>

Section I. Stem Cell **1**

1. β 1,4-Galactosyltransferase V: A Growth Regulator in Glioma **3**

Jianhai Jiang and Jianxin Gu

1. Overview	4
2. Experimental	5
3. Results	8
4. Conclusion and Future Direction	18
Acknowledgments	22
References	22

2. Roles of Polysialic Acid in Migration and Differentiation of Neural Stem Cells **25**

Kiyohiko Angata and Minoru Fukuda

1. Overview	26
Acknowledgments	34
References	34

3. Structural and Functional Analysis of Chondroitin Sulfate Proteoglycans in the Neural Stem Cell Niche **37**

Swetlana Sirko, Kaoru Akita, Alexander Von Holst, and Andreas Faissner

1. Overview	39
2. Immunohistochemistry of Embryonic and Postnatal Mouse Brain Sections	42
3. Method to Stain Embryonic Sections for NSPC Markers	43
4. Analysis of the Adult Neurogenic Niche and SVZ-Derived Cells by Immunocytochemistry	44
5. Immunocytochemistry of Acutely Dissociated Cells	46
6. Isolation of NSPCs by Immunopanning or by Immunoisolation Using Paramagnetic Beads (EasySep)	47

7. Neurosphere Cultures and Various Methods for Their Analysis	49
8. Disaccharide Analysis of CS/DS Chains from Embryonic Brain and Conditioned Neurosphere Culture Media and Effect of Sodium Chlorate Treatment on Neurosphere Formation at Clonal Cell Density	55
9. Analysis of NSPC-Proliferation <i>In Vitro</i> and <i>In Vivo</i>	56
10. Analysis of CSPG Functions in NSPCs Using Chondroitinase ABC Treatment in Culture	56
11. Analysis of Chondroitin Sulfate Functions in the Neural Stem Cell Niche	58
12. RT-PCR and Semiquantitative Analysis of the Synthetic Machinery for Glycosaminoglycans	59
13. <i>In Situ</i> Hybridization of Sulfotransferases in Tissue and Neurosphere Sections	63
14. Microscopy	66
15. Conclusion and Outlook	66
Acknowledgments	66
References	66
4. Transcript Analysis of Stem Cells	73
Alison V. Nairn, Mitche de la Rosa, and Kelley W. Moremen	
1. Introduction	74
2. qRT-PCR as a Tool for Determining Transcript Analysis for Glycan-Related Gene Expression	75
3. Examples of the Applications of qRT-PCR Transcript Analysis to Investigate Changes in Glycan-Related Gene Expression in Stem Cells	83
Acknowledgments	88
References	88
5. Directing Stem Cell Trafficking via GPS	93
Robert Sackstein	
1. Overview	94
2. Rationale for GPS	95
3. Guiding Principles and Method for GPS	97
4. Method of $\alpha(1,3)$ -Fucosylation of Cell Surface Using FTVI	99
5. Detection of E-Selectin Ligand Expression Following GPS	100
6. Testing for E-Selectin Ligand Activity Using E-Selectin-Ig Chimera (Three-Step Method for Flow Cytometry)	101
7. Summary	102
Acknowledgments	103
References	103

6. Functional Assays for the Molecular Chaperone Cosmc	107
Tongzhong Ju and Richard D. Cummings	
1. Overview	108
2. T-Synthase and Cosmc	110
3. T-Synthase Activity Assay	113
4. Assay Activity for Function of Cosmc	116
5. Conclusion and Future Directions	119
Acknowledgments	120
References	120
 7. Core 3-Derived O-Glycans Are Essential for Intestinal Mucus Barrier Function	 123
Lijun Xia	
1. Introduction	124
2. Generation of <i>C3GnT</i> ^{-/-} Mice	126
3. Disruption of the <i>C3GnT</i> Gene Eliminates Core 3-Derived O-Glycans and Exposes the Tn Antigen in Murine Colon	128
4. Deficiency of C3GnT Results in Reduced Muc2 Expression in Colon and Impaired Mucosal Integrity	131
5. <i>C3GnT</i> ^{-/-} Mice are Highly Susceptible to Dextran Sodium Sulfate-Induced Colitis	133
6. Conclusion and Future Direction	138
Acknowledgments	140
References	140
 8. Core3 Glycan as Tumor Suppressor	 143
Seung Ho Lee and Minoru Fukuda	
1. Overview	144
2. Generating Core3 Glycan Expressing Cell Lines	145
3. Detection Methods of Core3 Expression	146
4. Migration Assay Using Attractant	147
5. Determination of Major Integrin Using Functional Blocking Antibodies	147
6. Tumor Formation Assay	149
7. Western Blotting and Lectin Blotting	150
8. Heterodimerization Assay	151
9. FAK Signaling	152
References	153

9. Characterization of Mice with Targeted Deletion of the Gene Encoding Core 2 β1,6-<i>N</i>-Acetylglucosaminyltransferase-2	155
Erica L. Stone, Seung Ho Lee, Mohd Nazri Ismail, and Minoru Fukuda	
1. Introduction	156
2. Generation and Genotyping of C2GnT2 KO Mice	157
3. Mice Lacking C2GnT2 Have Reduced Core 2 and no Core 4 Enzyme Activity and Altered Glycosylation	159
4. Phenotyping C2GnT2 KO Mice	161
5. Conclusions and Future Directions	168
Acknowledgments	170
References	170
10. Analyzing Physiological Function of Polypeptide GalNAcT-1-Deficient Mice in Humoral Immunity	173
Mari Tenno	
1. Overview	174
2. Assay for <i>In Vitro</i> B Lymphocyte Activation	174
3. Assay for <i>In Vivo</i> Antibody Production	175
4. Immunohistochemical Staining of Frozen Sections	177
5. Apoptosis Detection Using Antibody Against Caspase 3 Active Form	179
6. Apoptosis Detection by TUNEL System	182
Acknowledgment	183
References	183
11. β3GnT2 (<i>B3GNT2</i>), A Major Polylactosamine Synthase: Analysis of <i>B3gnt2</i>-Deficient Mice	185
Akira Togayachi, Yuko Kozono, Atsushi Kuno, Takashi Ohkura, Takashi Sato, Jun Hirabayashi, Yuzuru Ikehara, and Hisashi Narimatsu	
1. Overview	186
2. Glycogenes for Polylactosamine Synthesis (i.e., β 1,3- <i>N</i> -Acetylglucosaminyltransferase Genes)	186
3. <i>N</i> -Glycan Polylactosamine is Greatly Reduced in <i>B3gnt2</i> ^{-/-} Mice	187
4. Phenotype of <i>B3gnt2</i> ^{-/-} Lymphocytes Lacking Polylactosamine on <i>N</i> -Glycans	193
5. Protocols	197
Acknowledgments	202
References	202

12. Targeted Genetic Inactivation of <i>N</i>-Acetylglucosaminyltransferase-IVa Impairs Insulin Secretion from Pancreatic β Cells and Evokes Type 2 Diabetes	205
Kazuaki Ohtsubo	
1. Overview	206
2. Engineering GnT-IVa-Deficient Mice	207
3. GnT-IV Enzymology	209
4. Glucose and Insulin Homeostasis	210
5. Immunohistochemical Analysis	211
6. Islet Cell Preparation and Culture	214
7. Pulse-Chase Labeling	215
8. Cell Surface Half-Life Time of GLUT2	216
9. GLUT2 Glycan Analysis by Lectin Blot	217
10. Cell-Surface Protein Cross-Linking	218
Acknowledgment	220
References	220
13. The Ashwell–Morell Receptor	223
Prabhjit K. Grewal	
1. Overview	224
2. Endogenous Ligands of the AMR	227
3. Hepatocytes in Molecular Clearance Mechanisms of the Liver	228
4. Genotyping HL-1- or HL-2-Deficient Mice	229
5. Hematology and Coagulation Analyses Methods (Partly Adapted from Ellies <i>et al.</i> , 2002; Grewal <i>et al.</i> , 2008; Wang <i>et al.</i> , 2001)	230
Acknowledgments	236
References	236
14. Roles of GlcNAc-6-<i>O</i>-Sulfotransferases in Lymphoid and Nonlymphoid Tissues	243
Hiroto Kawashima	
1. Overview	244
2. Establishment of a Mouse Colon Adherent Cell Line and Cell Culture	246
3. Treatment of CAdC1 Cells with SCFAs	247
4. RT-PCR	247
5. Histology and Immunostaining	248
6. Preparation of Colonic-Mucin-Enriched Fraction	249
7. Carbohydrate Structural Analysis	250
8. Induction of Colitis by Dextran Sulfate Sodium	254
Acknowledgments	255
References	255

15. Core O-Glycans Required for Lymphocyte Homing: Gene Knockout Mice of Core 1 β1,3-N-Acetylglucosaminyltransferase and Core 2 N-Acetylglucosaminyltransferase	257
Junya Mitoma and Minoru Fukuda	
1. Introduction	258
2. Lymphocyte Homing Assay	260
3. Staining of Lymph Nodes by L- and E-Selectin-IgM Chimeric Proteins after Glycosidase Treatment	263
4. Probing of L-Selectin Ligands on Membrane Filters with L- and E-selectin-IgM Chimeric Proteins	265
5. Conclusions	267
Acknowledgments	269
References	269
16. Immunohistochemical Analysis of Carbohydrate Antigens in Chronic Inflammatory Gastrointestinal Diseases	271
Motohiro Kobayashi and Jun Nakayama	
1. Overview	272
2. Immunohistochemical Analysis Using Conventional Immunostaining	274
3. Immunohistochemical Analysis Using Multiple Immunostaining	279
4. Immunohistochemical Analysis Using L-Selectin-IgM Chimera Binding	283
Acknowledgments	287
References	287
17. Genetic Defects in Muscular Dystrophy	291
Kumaran Chandrasekharan and Paul T. Martin	
1. Overview	292
2. Mouse Models of Muscular Dystrophy	294
3. Approach to Phenotype Analysis in Mouse Muscular Dystrophy Models	306
4. Summary	312
Acknowledgments	312
References	312
18. POMT1 is Essential for Protein O-Mannosylation in Mammals	323
Mark Lommel, Tobias Willer, Jesús Cruces, and Sabine Strahl	
1. Overview	324
2. Experimental	325
3. Discussion/Conclusions	337

Acknowledgments	339
References	340
19. POMGnT1, POMT1, and POMT2 Mutations in Congenital Muscular Dystrophies	343
Tamao Endo, Hiroshi Many, Nathalie Seta, and Pascale Guicheney	
1. Overview	344
2. Methods	345
3. Procedures for Enzymatic Activity and Mutation Search	348
Acknowledgment	350
References	350
20. Cellular and Molecular Characterization of Abnormal Brain Development in Protein O-Mannose N-Acetylglucosaminyltransferase 1 Knockout Mice	353
Jianmin Liu, Yuan Yang, Xiaofeng Li, Peng Zhang, Yue Qi, and Huaiyu Hu	
1. Overview	354
2. Analysis of α -DG Glycosylation and Laminin Binding by Western Blot	355
3. Histological Analysis of POMGnT1 Knockout Brain	356
4. Lamination Defects in the Neocortex of POMGnT1 Knockout Mice	357
5. Analysis of the Pial Basement Membrane by Laminin Immunostaining	359
6. Analysis of the Pial Basement Membrane by Transmission Electron Microscopy	360
7. Analysis of the Glia Limitans by GFAP Immunofluorescence Staining	362
Acknowledgment	364
References	365
21. Investigating the Functions of LARGE: Lessons from Mutant Mice	367
Jane E. Hewitt	
1. Overview	368
2. Human LARGE and Relevance to Disease	369
3. Identification of Mice Carrying Mutations in <i>Large</i>	370
4. Loss of Functional Large Protein Results in Hypoglycosylation of α -Dystroglycan	373
5. Phenotypes of Mice with Mutations in <i>Large</i>	374
6. Expression of <i>LARGE</i> Genes	378
7. Does <i>Large</i> Encode a Functional Glycosyltransferase?	379
8. <i>Large</i> ^{myd} Mice as a Model for Therapeutic Approaches to Dystroglycanopathy	381
Acknowledgments	381
References	381

22. A Tumor Suppressor Function of Laminin-Binding α-Dystroglycan	387
Xingfeng Bao and Minoru Fukuda	
1. Background	388
2. Methods	389
Acknowledgment	395
References	395
23. Tumor Formation Assays	397
Shingo Hatakeyama, Hayato Yamamoto, and Chikara Ohyama	
1. Overview	398
2. Animal Care and Protocol Approval	399
3. Disinfection of Mice	399
4. Analgesia and Anesthesia in Mice	399
5. IP Injection	401
6. IV Injection into the Tail Vein	401
7. IV Tumor Formation Assay Using Immune-Deficiency Mice	403
8. SC Inoculation	405
9. FP Inoculation	407
10. Testicular Inoculation	408
11. Prostate Inoculation	408
Acknowledgment	411
References	411
