Preface xv

Previous Volumes in Series xvii

SECTION 1 RYR Ca^{2+} RELEASE CHANNELS

CHAPTER 1 RyRs: Their Disposition, Frequency, and Relationships with Other Proteins of Calcium Release Units

Clara Franzini-Armstrong

- I. Overview 3
- II. Introduction 4
- III. Cardiac CRUs 4
- IV. CRUs in Skeletal and Invertebrate Body Muscles 8
- V. Factors Affecting CRU Assembly in Skeletal and Cardiac Muscles 12
- VI. Isoform-Specific Features of RyR Distribution 16
- VII. Architecture of SR and T Tubule Membranes in Muscle- and Fiber-Type Specific 17
- References 22

CHAPTER 2 Electron Microscopy of Ryanodine Receptors

Terence C. Wagenknecht and Zheng Liu

- I. Overview 27
- II. Introduction 28
- III. Cryo-EM of Macromolecular Complexes 28
- IV. Three-Dimensional Architecture of RyR as Determined by Cryo-EM 29
- V. α -Helices in the TM Region and the Mechanism of Calcium Channel Gating 32

- VI. Synergism of 3D Cryo-EM and Other Biophysical/Biochemical Techniques 34
- VII. Outlook and Perspectives 40
- References 42

CHAPTER 3 The Ryanodine Receptor Pore: Is There a Consensus View?

Joanne Carney, Sammy A. Mason, Cedric Viero, and Alan J. Williams

- I. Overview 49
- II. Introduction 50
- III. Ion Handling in RyR 51
- IV. Where is the PFR in the RyR Channel? 53
- V. Attempts to Identify the Structure of the RyR PFR 58
- VI. Theoretical Approaches to Understanding the Mechanisms Underlying Ion Translocation and Discrimination in RyR 61
- VII. Testing Physical and Theoretical Models of the RyR PFR by Residue Substitution 62
- VIII. Concluding Remarks 64
- References 64

CHAPTER 4 Regulation of RyR Channel Gating by Ca^{2+} , Mg^{2+} and ATP

Derek R. Laver

- I. Overview 69
- II. Introduction 70
- III. RyR2 in Cardiac Contraction and Pacemaking 70
- IV. Four Ca^{2+} Sensing Mechanisms for RyR2 71
- V. Synergistic Ca^{2+} -Activation via Cytoplasmic and Luminal Facing Binding Sites 74
- VI. Channel Open Times and the Role of Ca^{2+} Feed-Through 76
- VII. Three Mechanisms for Mg^{2+} -Inhibition of RyR2 77
- VIII. A Model for Ca^{2+} and Mg^{2+} Regulation of RyR2 80
- IX. Adenine Nucleotides 82

- X. Regulation of RyR2 in Cardiac E-C Coupling 84
- XI. Concluding Remarks 86
- References 87

CHAPTER 5 Regulation of Ryanodine Receptor Ion Channels Through Posttranslational Modifications

Gerhard Meissner

- I. Overview 91
- II. Introduction 92
- III. RyR1 and RyR2 Phosphorylation 93
- IV. RyR Modulation by Reactive Oxygen and Nitrogen Species 99
- V. Conclusions 104
- References 105

CHAPTER 6 Crosstalk via the Sarcoplasmic Gap: The DHPR-RyR Interaction

Manfred Grabner and Anamika Dayal

- I. Overview 115
- II. DHPR and RyR Arrangement in Skeletal and Cardiac Muscle Membranes—Basis for Differences in the EC Coupling Mechanism 116
- III. Structural Domains Involved in *sk*DHPR-RyR1 Interaction 119
- IV. The Role of Intracellular Molecular Regions Besides the α_{1S} II–III Loop in *sk*DHPR-RyR1 Interaction 126
- V. Intracellular Molecular Regions of α_{1S} Involved in Tetrad Formation 128
- VI. The Role of the Accessory *sk*DHPR Subunits in Interaction with RyR1 128
- VII. Conclusion 131
- References 133

CHAPTER 7 Ryanodinopathies: RyR-Linked Muscle Diseases

Lan Wei and Robert T. Dirksen

- I. Overview 139
- II. Introduction 140
- III. RyR1-Linked Diseases 142

- IV. RyR2-Linked Diseases 153
- V. Conclusions and Perspectives 158
- References 160

SECTION 2 $\text{IP}_3\text{R Ca}^{2+}$ RELEASE CHANNELS

CHAPTER 8 3D Structure of IP_3 Receptor

Irina I. Serysheva and Steven J. Ludtke

- I. Overview 171
- II. Introduction 172
- III. Predicted Topology of IP_3R Molecule 173
- IV. Arrangement of IP_3R in the Native Membrane 175
- V. 3D Structure of IP_3R by Electron Microscopy 176
- VI. Crystal Structures of Isolated Domains 182
- VII. Conformational Transitions in IP_3R Channel 183
- VIII. Future Outlook 185
- References 186

CHAPTER 9 Molecular Architecture of the Inositol 1,4,5-Trisphosphate Receptor Pore

Darren F. Boehning

- I. Overview 191
- II. Introduction 192
- III. The Transmembrane Domains 194
- IV. The Ion Conduction Pore: Electrophysiologic Studies 197
- V. The Ion Conduction Pore: Modeling Studies 202
- References 204

CHAPTER 10 Adenophostins: High-Affinity Agonists of IP_3 Receptors

Ana M. Rossi, Andrew M. Riley, Barry V. L. Potter, and Colin W. Taylor

- I. Overview 209
- II. Discovery and Initial Characterization of Adenophostins 210
- III. Structure and Synthesis of Adenophostin 212
- IV. Activation of IP_3R by Adenophostin 216

- V. Why does Adenophostin Bind to IP₃R With High-Affinity? 220
- VI. Is Adenophostin more than a Stable, High-Affinity Agonist of IP₃R? 225
- References 228

CHAPTER 11 Regulation of IP₃R Channel Gating by Ca²⁺ and Ca²⁺ Binding Proteins

J. Kevin Foskett and Don-On Daniel Mak

- I. Overview 235
- II. Introduction 236
- III. Cytoplasmic Ca²⁺ Regulation of IP₃R Channel Gating 237
- IV. Ca²⁺ Binding Protein Regulation of IP₃R Channel Gating 263
- References 267

CHAPTER 12 Regulation of Inositol 1,4,5-Trisphosphate Receptors by Phosphorylation and Adenine Nucleotides

Matthew J. Betzenhauser and David I. Yule

- I. Overview 273
- II. Regulation of IP₃R by Phosphorylation 274
- III. Regulation of IP₃R by Adenine Nucleotides 283
- References 292

CHAPTER 13 Role of Thiols in the Structure and Function of Inositol Trisphosphate Receptors

Suresh K. Joseph

- I. Overview 299
- II. Introduction 300
- III. Regulation of IP₃R Function by Changes in Thiol Redox State 300
- IV. Comparison of Thiol Regulation of IP₃R and RyRs 308
- V. Cysteine Residues as Probes of IP₃R Structure 310
- VI. Future Directions 314
- References 315

CHAPTER 14 Inositol 1,4,5-Triphosphate Receptor, Calcium Signaling, and Polyglutamine Expansion Disorders
Ilya Bezprozvanny

- I. Overview 323
- II. Huntington's Disease, Spinocerebellar Ataxia Type 2, and Spinocerebellar Ataxia Type 3 324
- III. Mutant Huntingtin Specifically Sensitizes IP₃R1 to IP₃ 325
- IV. Mutant Huntingtin Activates NR2B-Containing NMDA Receptors 326
- V. Deranged Ca²⁺ Signaling and Apoptosis of HD MSN 329
- VI. IP₃R and Abnormal Ca²⁺ Signaling in SCA2 Neurons 330
- VII. IP₃R and Abnormal Ca²⁺ Signaling in SCA3 Neurons 332
- VIII. Ca²⁺ Blockers and Perspectives for Clinical Intervention in HD and SCA Patients 333
- References 335

Index 343
