Novel Bacterial MerR-Like Regulators: Their Role in the Response to Carbonyl and Nitrosative Stress

Alastair G. McEwan, Karrera Y. Djoko, Nathan H. Chen, Rafael L.M. Couñago, Stephen P. Kidd, Adam J. Potter and Michael P. Jennings

Abbreviations	2
1. Introduction	2
2. Identification and Properties of NmlR Proteins	4
3. Defense Against Carbonyl and Nitrosative Stress	10
4. A Role for NmlR-Based Defenses in Bacterial Pathogenesis	13
5. The Mechanism of Transcriptional Regulation by NmlR Proteins	16
6. Concluding Remarks	17
Acknowledgments	17
References	18

Quorum Sensing: Regulating the Regulators

Marijke Frederix and Allan J. Downie

1. Introduction	24
2. QS Signals	25
3. Plasmid Transfer in <i>Agrobacterium tumefaciens</i> : A Tale of Two Signals	31
4. Hierarchical QS and the <i>Rhizobium</i> -Legume Symbiosis	33
5. Other Hierarchically Organized QS Systems	37
6. Integration of QS Systems	38
7. Environmental Signals Affecting QS Gene Regulation	45

8. Signals from Other Species	56
Acknowledgments	58
References	58

The Single-Domain Globin of *Vitreoscilla*: Augmentation of Aerobic Metabolism for Biotechnological Applications

Alexander D. Frey, Mark Shepherd, Soile Jokipii-Lukkari, Hely Häggman
and Pauli T. Kallio

Abbreviations	82
1. Oxygen Limitation: From Bioprocess Engineering to Metabolic Engineering	83
2. Oxygen Sensing and Molecular Adaptation to Hypoxia in <i>E. coli</i>	84
3. Bacterial Metabolism and the Influence of Varying Oxygen Levels	90
4. A Bacterial Globin Protein to Improve Growth and Productivity Under Microaerobic Conditions	92
5. The Role and Function of Bacterial Globins	104
6. Regulation of <i>Vitreoscilla</i> Hemoglobin Promoter (P_{vhh})	110
7. Effect of Globin Expression on Cellular Metabolism	114
8. Effect of Globin Expression on Cellular Carbon Metabolism	116
9. From Metabolome to Transcriptome of Globin Expressing Cells	121
10. Globins, Cytochromes, and Their Interaction with O_2/NO	123
Acknowledgment	124
References	124

Singlet Oxygen Stress in Microorganisms

J. Glaeser, A.M. Nuss, B.A. Berghoff and Gabriele Klug

1. Introduction	143
2. Formation and Toxic Effects of Singlet Oxygen	144
3. Targets of Singlet Oxygen	148
4. Responses to Photooxidative Stress in Microorganisms	151
5. Molecular Mechanisms Underlying the Photooxidative Stress Response	157

6. Perspectives	165
Acknowledgment	166
References	166

Metal Sensing in *Salmonella*: Implications for Pathogenesis

Deenah Osman and Jennifer S. Cavet

1. Introduction	176
2. Copper Sensing and Resistance	180
3. Iron Sensing and Homeostasis	194
4. Manganese Sensing and Uptake	202
5. Zinc Sensing and Homeostasis	206
6. Nickel, Cobalt Sensing, and Homeostasis	211
7. Coordination of the Metal Sensors to Control Cellular Metal Levels	215
8. Concluding Remarks	217
References	218
