Ammonia-Oxidising Archaea – Physiology, Ecology and Evolution

Christa Schleper and Graeme W. Nicol

Abbreviations	3
1. Introduction	3
2. Discovery of Archaea in Moderate Aerobic Habitats	4
3. First Insights into the Physiology of Ammonia-oxidising Archaea ...	6
4. Model Organisms of Ammonia-Oxidising Archaea	9
5. Membrane Lipids of Ammonia-Oxidising Archaea	13
6. Genomes and Metagenomes of Ammonia-Oxidising Archaea	15
7. Diversity, Distribution and Activity of Ammonia-oxidising Archaea in the Environment	22
8. Concluding Remarks	33
Acknowledgement	34
References	34

Reductive Stress in Microbes: Implications for Understanding

Mycobacterium tuberculosis Disease and Persistence

Aisha Farhana, Loni Guidry, Anup Srivastava, Amit Singh,
Mary K. Hondalus and Adrie J.C. Steyn

Abbreviations	44
1. Introduction	45
2. Scope	46
3. The Concept of Reductive Stress	47
4. Overview: General Physiological Characteristics of <i>Mycobacterium Tuberculosis</i>	49

5. Reductive Sinks in Microbes	59
6. Redox Sinks in Mycobacteria	76
7. Concluding Remarks	95
Acknowledgements	98
References	98

Regulation of CtsR Activity in Low GC, Gram+ Bacteria

Alexander K.W. Elsholz, Ulf Gerth and Michael Hecker

Abbreviations	120
1. Protein Quality Control	120
2. CtsR-Regulated Genes	122
3. Cellular Functions of Genes Regulated by CtsR	125
4. Mechanisms for the Inactivation of the CtsR Repressor	129
5. Control of CtsR Degradation by the Regulated Adaptor McsB	136
6. Summary and Outlook	136
Acknowledgement	137
References	137
AUTHOR INDEX	145
SUBJECT INDEX	167
