1. Interactions Between Plants and Arbuscular Mycorrhizal Fungi	1
Shingo Hata, Yoshihiro Kobae, and Mari Banba	
1. Introduction	2
2. Studies on Model Legumes	3
3. Studies on Other Plants	14
4. Concluding Remarks	32
Acknowledgments	33
References	33
2. Barley Grain Development: Toward an Integrative View	49
Nese Sreenivasulu, Ljudmilla Borisjuk, Björn H. Junker, Hans-Peter Mock, Hardy Rolletschek, Udo Seiffert, Winfriede Weschke, and Ulrich Wobus	
1. Introduction	50
2. Barley Grain Development	51
3. 3-D/4-D Models of Developing Barley Grains	55
4. Omics Technologies and Molecular-Physiological Events During Grain Development	59
5. Systems Biology View of Barley Grain Development	77
6. Concluding Remarks	79
Acknowledgments	81
References	81
3. New Insights into the Regulation of the Actin Cytoskeleton by Tropomyosin	91
C.-L. Albert Wang and Lynne M. Coluccio	
1. Introduction	92
2. Biochemical and Biophysical Properties of Tropomyosin	92
3. Roles of Tropomyosin in Muscle and Nonmuscle Cells	99
4. Intracellular Distribution of Tropomyosin Isoforms	105
5. Caldesmon and Tropomyosins	108
6. Potential Roles of Tropomyosin in Cancer Metastasis	114

7. Concluding Remarks	116
Acknowledgments	116
References	117
4. Regulation of Sulfate Transport and Assimilation in Plants	129
Hideki Takahashi	
1. Introduction	130
2. Sulfate Transport Systems	132
3. Regulation of Sulfate Transport and Metabolism	145
4. Concluding Remarks	152
Acknowledgments	153
References	153
5. Metabolic Pathways in the Apicoplast of Apicomplexa	161
Frank Seeber and Dominique Soldati-Favre	
1. Introduction	162
2. Morphology, Acquisition, and Evolutionary Origin of the Apicoplast	164
3. Genome, Proteome, and Protein Trafficking	165
4. Potential and Limitations of <i>In Silico</i> Predictions of Metabolic Pathways	168
5. Biosynthesis of Various Metabolites and Factors	170
6. Apicoplast Metabolic Pathways as Drug Targets and the Phenomenon of Delayed Death	208
7. Conclusions	210
Acknowledgments	211
References	211
6. Molecular Mechanisms of Pathogenesis of Parkinson's Disease	229
M.I. Shadrina, P.A. Slominsky, and S.A. Limborska	
1. Introduction	230
2. Clinical Features of Parkinson's Disease	231
3. Neuropathology of Parkinson's Disease	233
4. Genetic Causes of Parkinson's Disease	234
5. Conclusion	256
References	257
Index	267
