

CONTENTS

<i>Contributors</i>	<i>xiii</i>
<i>Preface</i>	<i>xix</i>
<i>Volumes in Series</i>	<i>xxi</i>

Section 1. Modeling **1**

1. Modeling the Role of Nitrification in Open Ocean Productivity and the Nitrogen Cycle **3**

Andrew Yool

1. Introduction	4
2. Ocean Carbon Cycle	4
3. Export Production and the f -Ratio	7
4. Plankton Ecosystem Models	12
5. Modeling Nitrification	15
6. Operational Considerations	22
7. Future Modeling	24
8. Summary	27
Acknowledgments	28
References	28

2. Continuous Cultivation and Thermodynamic Aspects of Niche Definition in the Nitrogen Cycle **33**

Stefanie Müller and Marc Strous

1. Introduction	33
2. A Minimal Model for Microbial Behavior	35
3. Continuous Cultivation—Background and Experimental Approach	43
4. Conclusion	50
Acknowledgments	50
References	50

Section 2. Cultivation and Cell Physiology	53
3. Isolation, Cultivation, and Characterization of Ammonia-Oxidizing Bacteria and Archaea Adapted to Low Ammonium Concentrations	55
Annette Bollmann, Elizabeth French, and Hendrikus J. Laanbroek	
1. Introduction	56
2. General Description of Cultivation Methods for Ammonia-Oxidizing Microorganisms	57
3. Enrichment of Ammonia Oxidizers	63
4. Isolation of Ammonia Oxidizers	68
5. Characterization of Ammonia-Oxidizing Prokaryotes	72
References	84
4. Cultivation, Detection, and Ecophysiology of Anaerobic Ammonium-Oxidizing Bacteria	89
Boran Kartal, Wim Geerts, and Mike S. M. Jetten	
1. Introduction	90
2. Enrichment of Anammox Bacteria as Planktonic Cell Suspensions	93
3. Molecular Detection of Anammox Bacteria	97
4. Conclusions	104
Acknowledgments	104
References	105
5. Cultivation, Growth Physiology, and Chemotaxonomy of Nitrite-Oxidizing Bacteria	109
Eva Spieck and André Lipski	
1. Introduction	110
2. Recipes for the Culture of NOB	112
3. Cultivation Procedure	114
4. Isolation	116
5. Physiological Investigations	118
6. Chemical Analyses	121
7. Monitoring the Cultures	121
8. Fatty Acid Analyses	124
Acknowledgments	127
References	127
6. Surveying N₂O-Producing Pathways in Bacteria	131
Lisa Y. Stein	
1. Introduction	132
2. Bioinformatics	135

3. Surveying Function	143
4. Concluding Remarks	147
References	148

Section 3. Molecular Microbial Ecology and Processes Measurements **153**

7. Stable Isotope Probing with ^{18}O -Water to Investigate Growth and Mortality of Ammonia Oxidizing Bacteria and Archaea in Soil **155**

Karen Adair and Egbert Schwartz

1. Introduction	156
2. Materials and Methods	158
3. Calculation of Growth and Mortality Indices	160
4. Results	161
5. Discussion	165
6. Conclusions	167
Acknowledgments	167
References	168

8. Measuring Nitrification, Denitrification, and Related Biomarkers in Terrestrial Geothermal Ecosystems **171**

Jeremy A. Dodsworth, Bruce Hungate, José R. de la Torre, Hongchen Jiang, and Brian P. Hedlund

1. Introduction	172
2. General Considerations for Measurement of N-Cycle Activities in Terrestrial Geothermal Habitats	177
3. Methods for Measuring Nitrification in Terrestrial Geothermal Habitats	179
4. Methods for Measuring Denitrification in Terrestrial Geothermal Habitats	187
5. Detection and Quantification of Potential Biomarkers for Thermophilic AOA and Denitrifying <i>Thermus thermophilus</i>	193
6. Closing Remarks	198
Acknowledgments	198
References	198

9. Determining the Distribution of Marine and Coastal Ammonia-Oxidizing Archaea and Bacteria Using a Quantitative Approach **205**

Annika C. Mosier and Christopher A. Francis

1. Introduction	206
2. Methods for Measuring the Abundance of AOA and AOB Within Marine and Coastal Systems	209

3. Methodological Considerations	213
4. Targeting Specific Ecotypes: Quantifying Shallow and Deep Clades of Marine Water Column AOA	214
Acknowledgments	217
References	218
10. ^{15}N-Labeling Experiments to Dissect the Contributions of Heterotrophic Denitrification and Anammox to Nitrogen Removal in the OMZ Waters of the Ocean	223
Moritz Holtappels, Gaute Lavik, Marlene M. Jensen, and Marcel M. M. Kuypers	
1. Introduction	224
2. Theoretical Description of ^{15}N -Incubation Experiments	227
3. In the Field: Supplementary Measurements	233
4. In the Field: Incubation Experiments	237
5. In the Lab: Mass Spectrometry Measurements	240
6. Data Processing and Interpretation	243
7. Common Pitfalls	248
8. Concluding Remarks	249
Acknowledgments	249
References	250
11. Assessment of Nitrogen and Oxygen Isotopic Fractionation During Nitrification and Its Expression in the Marine Environment	253
Karen L. Casciotti, Carolyn Buchwald, Alyson E. Santoro, and Caitlin Frame	
1. Introduction	254
2. Methods	259
3. Analytical Techniques	262
4. Data Analysis	264
5. Discussion	272
References	275
12. Identification of Diazotrophic Microorganisms in Marine Sediment via Fluorescence <i>In Situ</i> Hybridization Coupled to Nanoscale Secondary Ion Mass Spectrometry (FISH-NanoSIMS)	281
Anne E. Dekas and Victoria J. Orphan	
1. Introduction	282
2. Methods	285
3. Concluding Remarks	300
Acknowledgments	301
References	301

13. Measurement and Distribution of Nitrification Rates in the Oceans	307
B. B. Ward	
1. Introduction	308
2. Nitrification Rate Measurements in Seawater (Table 13.1)	310
3. Nitrification Rate Measurements in Sediments	318
4. Distribution of Nitrification	319
References	320
14. Construction of STOX Oxygen Sensors and Their Application for Determination of O₂ Concentrations in Oxygen Minimum Zones	325
Niels Peter Revsbech, Bo Thamdrup, Tage Dalsgaard, and Donald Eugene Canfield	
1. Introduction	326
2. STOX Sensor Principle	327
3. Sensor Construction	328
4. Electronics for STOX Sensors	332
5. STOX Sensor Calibration and Performance	333
6. Calculation of Oxygen Concentrations from STOX Data	335
7. <i>In Situ</i> Deployment of STOX Sensors in OMZs	337
8. Future Fast Response STOX Sensors	339
9. Using STOX Sensors to Recalibrate Conventional Oxygen Sensors	339
Acknowledgments	340
References	340
15. Regulation and Measurement of Nitrification in Terrestrial Systems	343
Jeanette M. Norton and John M. Stark	
1. Introduction	344
2. Diversity of the Nitrification Process in Terrestrial Environments	345
3. Substrates and Products of Nitrification Reactions	346
4. Controls on Nitrification Rates in Soil Environments	347
5. Measurements of Nitrification in Terrestrial Environments	350
6. Measurement of Nitrification Rates in Terrestrial Ecosystems	351
7. Measurement of Nitrification Kinetics	357
8. Nitrifier Population Size	361
9. Modeling Approaches	361
10. Future Advancements in Nitrification Rate Research in Terrestrial Environments	362
References	362

16. Protocol for the Measurement of Nitrous Oxide Fluxes from Biological Wastewater Treatment Plants 369

Kartik Chandran

1. Introduction	370
2. Sampling Design for Full-Scale Monitoring	370
3. Sampling Procedures: Headspace Gas Measurement	373
4. Sampling Procedures: Measurement of Aqueous N ₂ O Concentrations	376
5. Sampling Procedures: Measurement of Advective Gas Flow Rate from Bioreactor Headspace	376
6. Principles of Real-Time N ₂ O Measurement	377
7. Data Analysis: Determination of Fluxes	377
8. Data Analysis: Determination of Emission Fractions	378
9. Data Analysis: Calculation of N ₂ O Emission Factors	378
10. Standardization of Protocol and Comparison with Established Emissions Flux Measurement Methods	379
11. N ₂ O Emission Fluxes from Activated Sludge Processes	381
12. Triggers for N ₂ O Emission from Wastewater Treatment Operations	382
13. Lab-Scale and Field-Scale Adaptation of Protocol N ₂ O Emission Measurements	383
14. Concluding Remarks	383
Acknowledgment	383
References	384

Section 4. Genetics, Biochemistry and Biogeochemistry 387

17. Genetic Transformation of Ammonia-Oxidizing Bacteria 389

Luis A. Sayavedra-Soto and Lisa Y. Stein

1. Introduction	390
2. Transformation of AOB	391
3. Gene Inactivation in AOB	393
4. Use of Broad-Host Range Plasmids	398
5. Strain Stability and Maintenance	399
6. Conclusions	399
References	400

18. Dissecting Iron Uptake and Homeostasis in *Nitrosomonas europaea* 403

Luis A. Sayavedra-Soto, Neeraja Vajrала, and Daniel J. Arp

1. Introduction	404
2. Use of Bioinformatics to Plan Fe-Related Studies	406

3. Methods to Learn About the Physiological Responses to Fe Limitation	407
4. Methods to Study Siderophore Uptake	418
5. Genetic Complementation to Study <i>fur</i> Homologs	421
6. Methods for Gene Inactivation of Fe Uptake Systems	422
7. Lingering Questions that can be Answered by the Above Protocols	423
8. Conclusion	425
References	425
19. Production of Recombinant Multiheme Cytochromes <i>c</i> in <i>Wolinella succinogenes</i>	429
Melanie Kern and Jörg Simon	
1. Introduction	430
2. Bacterial Cytochrome <i>c</i> Biogenesis Systems	433
3. Recombinant Cytochrome <i>c</i> Production	435
4. Cytochromes <i>c</i> in the Epsilonproteobacterium <i>W. succinogenes</i>	435
5. Three Cytochrome <i>c</i> Heme Lyase Isoenzymes in <i>W. succinogenes</i>	439
6. Heterologous Production of Cytochromes <i>c</i> in <i>W. succinogenes</i>	439
7. Conclusions and Perspectives	442
Acknowledgments	443
References	443
20. Techniques for Investigating Hydroxylamine Disproportionation by Hydroxylamine Oxidoreductases	447
A. Andrew Pacheco, Jennifer McGarry, Joshua Kostera, and Angel Corona	
1. Introduction	448
2. General Considerations	450
3. Ammonia Concentration Determination	454
4. Nitric Oxide Concentration Determination	457
5. Nitrite Concentration Determination	458
6. Nitrous Oxide and Dinitrogen Concentration Determination	460
References	462
21. Liquid Chromatography—Mass Spectrometry-Based Proteomics of <i>Nitrosomonas</i>	465
Hans J. C. T. Wessels, Jolein Gloerich, Erwin van der Biezen, Mike S. M. Jetten, and Boran Kartal	
1. Introduction	466
2. LC-MS/MS Instrument Setup	468
3. Growth of <i>N. eutropha</i> C91 Pure Culture	469
4. Sample Preparation	470

5. C18 Reversed Phase LC-MS/MS Analysis	471
6. Database Searches and Validation of Results	472
7. Dataset Description and Protein Identification Example	476
8. Conclusions	479
References	479
22. The Geochemical Record of the Ancient Nitrogen Cycle, Nitrogen Isotopes, and Metal Cofactors	483
Linda V. Godfrey and Jennifer B. Glass	
1. Introduction	484
2. Reconstructing the Nitrogen Cycle and Associated Trace Metal Abundances through Time	489
3. Determining Changes in the N-Cycle from the Geological Record of N Isotopes and Metal Availability	492
4. Measurement	497
5. Concluding Remarks	499
Acknowledgments	499
References	499
<i>Author Index</i>	507
<i>Subject Index</i>	533
