Section I. Inverse Agonism and Inverse Agonists 1

1. Identification and Characterization of Steroidogenic Factor-1 Inverse Agonists 3

Mabrouka Doghman, Franck Madoux, Peter Hodder, and Enzo Lalli

1. Introduction	4
2. Characterization of Inverse Agonists of SF-1 by uHTS	6
3. Effect of SF-1 Inverse Agonists on Adrenocortical Tumor Cell Proliferation and Steroid Production	17
4. Conclusion	20
Acknowledgments	22
References	22

2. Assessment of Inverse Agonism for the Angiotensin II Type 1 Receptor 25

Hiroshi Akazawa, Noritaka Yasuda, Shin-ichiro Miura, and Issei Komuro

1. Introduction	26
2. Protocol for Cell Culture and Transfection	26
3. Radioligand Assay for AT ₁ Receptor	27
4. Protocol for Cell Stretching	28
5. Assessment of AT ₁ Receptor Activation	30
6. Conclusion	33
Acknowledgments	34
References	34

3. Measurement of Inverse Agonism in β -Adrenoceptors 37

Carlos A. Taira, Federico Monczor, and Christian Höcht

1. Introduction: Basal Spontaneous Receptor Activity. The Rise of the Concept of Inverse Agonism	38
2. β -Adrenoceptors: Main Features	42

3. Methodological Aspects of the Assessment of Inverse Agonist Properties at β AR	45
4. Clinical Potential Uses of β AR Inverse Agonists	51
References	53
4. Techniques for Studying Inverse Agonist Activity of Antidepressants at Recombinant Nonedited 5-HT_{2C-1NI} Receptor and Native Neuronal 5-HT_{2C} Receptors	61
Mathieu Seimandi, Joël Bockaert, and Philippe Marin	
1. Introduction	62
2. Constitutive Activity Toward the G α_q -PLC Effector Pathway of 5-HT _{2C-1NI} Receptors Transiently Expressed in HEK-293 Cells	65
3. Plasma Membrane Insertion of 5-HT _{2C-1NI} Receptors	71
4. Enhanced Responsiveness of Constitutively Active 5-HT _{2C} Receptors Upon Prolonged Treatment with Inverse Agonists	73
Acknowledgments	77
References	77
5. Differential Inverse Agonism at the Human Muscarinic M₃ Receptor	81
Paola Casarosa, Tobias Kiechle, and Remko A. Bakker	
1. Introduction to Muscarinic Receptors	82
2. Role of M ₃ R in Regulating Smooth Muscle Function and Clinical Use of Anticholinergics	84
3. <i>In Vitro</i> Assays to Monitor hM ₃ R Activation and Constitutive Activity	85
4. Constitutive Activity and Receptor Upregulation Studies	95
5. Physiological Relevance of hM ₃ R Constitutive Activity	98
References	100
6. Ghrelin Receptor: High Constitutive Activity and Methods for Developing Inverse Agonists	103
Sylvia Els, Annette G. Beck-Sickinger, and Constance Chollet	
1. Introduction	104
2. Constitutive Activity and Development of Ghrelin Receptor Inverse Agonists	105
3. Synthesis of Ghrelin Receptor Inverse Agonists: Solid-Phase Peptide Synthesis (SPPS)	107
4. Functional Assays for Ghrelin Receptor Inverse Agonists	113
References	119

7. Constitutive Activity and Inverse Agonism at the α_{1a} and α_{1b} Adrenergic Receptor Subtypes	123
Susanna Cotecchia	
1. Introduction	124
2. Combination of Computational Modeling and Site-Directed Mutagenesis of the Receptor to Identify Constitutively Activating Mutations	127
3. Measuring Constitutive Activity of Receptor-Mediated Gq Activation	130
4. Inverse Agonism at the α_1 -ARs	132
5. Conclusions	135
Acknowledgments	136
References	136
8. Measurement of Inverse Agonism of the Cannabinoid Receptors	139
Tung M. Fong	
1. Introduction	139
2. Gi-cAMP Assay	140
3. GTP γ S Binding Assay	142
4. Electrophysiological Assays	143
5. Summary	143
References	144
9. Constitutively Active Thyrotropin and Thyrotropin-Releasing Hormone Receptors and Their Inverse Agonists	147
Susanne Neumann, Bruce M. Raaka, and Marvin C. Gershengorn	
1. Introduction	148
2. TRH-R2 and Its Inverse Agonist Midazolam	149
3. TSHR and Its Inverse Agonist NCGC00161856	153
Acknowledgments	159
References	159
10. Inverse Agonists and Antagonists of Retinoid Receptors	161
William Bourguet, Angel R. de Lera, and Hinrich Gronemeyer	
1. Introduction	162
2. Functional Classification of Retinoid Receptor Ligands	164
3. Structural Basis of Retinoid Receptor Action	165
4. Synthetic Routes and Toolbox for Rational Retinoid Design	169
5. Protocols for the Study of Ligand Function	177
6. Chemical Syntheses	190
Acknowledgments	191
References	192

11. γ-Aminobutyric Acid Type A (GABA_A) Receptor Subtype Inverse Agonists as Therapeutic Agents in Cognition	197
Guerrini Gabriella and Ciciani Giovanna	
1. Introduction	198
2. Inverse Agonism: Definition	203
3. Negative Allosteric Regulators of GABA _A -R in Cognitive Impairment	204
4. Methods for Evaluating the Affinity and Efficacy at GABA _A Receptor Subtypes	206
5. Conclusion	208
References	208
12. Assays for Inverse Agonists in the Visual System	213
Masahiro Kono	
1. Introduction	214
2. Opsin Preparation	218
3. Transducin Preparation	219
4. Transducin Activation Assay	219
Acknowledgments	221
References	221
13. Receptor-Driven Identification of Novel Human A₃ Adenosine Receptor Antagonists as Potential Therapeutic Agents	225
Silvia Paoletta, Stephanie Federico, Giampiero Spalluto, and Stefano Moro	
1. Introduction	226
2. Newer Potential Therapeutic Role of A ₃ Adenosine Receptors	226
3. A ₃ Adenosine Receptor Antagonists	228
4. Receptor-Based Antagonist Design	231
Acknowledgments	243
References	243
14. Inverse Agonist Activity of Steroidogenic Factor SF-1	245
Fabrice Piu and Andria L. Del Tredici	
1. Introduction	246
2. SF-1 Inverse Agonism in the R-SAT [®] Assay of Cellular Proliferation	247
3. SF-1 Inverse Agonism in Luciferase Transcriptional Assay	251
4. SF-1 Inverse Agonism in Adrenocortical Cultures	254
Acknowledgments	257
References	257

15. Methods to Measure G-Protein-Coupled Receptor Activity for the Identification of Inverse Agonists	261
Gabriel Barreda-Gómez, M. Teresa Giralt, and Rafael Rodríguez-Puertas	
1. Introduction	262
2. [³⁵ S]GTPγS Binding Assay in Membrane Homogenates	266
3. [³⁵ S]GTPγS Autoradiography in Brain Sections	270
Acknowledgments	272
References	273
 Section II. Novel Strategies and Techniques for Constitutive Activity and Inverse Agonism	 275
16. Use of Pharmacoperones to Reveal GPCR Structural Changes Associated with Constitutive Activation and Trafficking	277
Jo Ann Janovick and P. Michael Conn	
1. Introduction	278
2. Methods for Measuring Receptors and Receptor Activity	279
3. Assessment of Results	283
4. Conclusions	290
Acknowledgments	290
References	290
 17. Application of Large-Scale Transient Transfection to Cell-Based Functional Assays for Ion Channels and GPCRs	 293
Jun Chen, Sujatha Gopalakrishnan, Marc R. Lake, Bruce R. Bianchi, John Locklear, and Regina M. Reilly	
1. Introduction	294
2. Large-Scale Transient Transfection	295
3. Cryopreservation of Cells	296
4. Application to Ion Channel Assays	297
5. Application to GPCR Assays	305
6. Conclusion	308
Acknowledgment	309
References	309
