Section I. Identification and Measurement of Constitutive Activity 1

1. Constitutive Activity at the Cannabinoid CB₁ Receptor and Behavioral Responses 3

Katherine E. Hanlon and Todd W. Vanderah

1. Introduction	4
2. Modifying CB ₁ Activity	6
3. Behavioral Models	12
References	26

2. Detecting Constitutive Activity and Protean Agonism at Cannabinoid-2 Receptor 31

Massimiliano Beltramo, Rossella Brusa, Isabella Mancini, and Paola Scandroglio

1. Introduction	32
2. General Considerations	34
3. Evaluation of Constitutive Activity Using GTPγS Assay	35
4. Evaluation of Constitutive Activity Using cAMP Assay	39
5. Evaluation of Constitutive Activity Using RT-CES	42
6. Evaluation of Protean Agonism with cAMP Assay	46
7. Comparison of the Methods	48
References	49

3. Modulation of the Constitutive Activity of the Ghrelin Receptor by Use of Pharmacological Tools and Mutagenesis 53

Jacek Mokrosiński and Birgitte Holst

1. Introduction	54
2. The Ghrelin Receptor and Its Constitutive Activity	55
3. Structural Basis of Constitutive Activity	57

4. Residues Responsible for the Inverse Agonism and Efficacy Swap	61
5. Physiological Relevance of Constitutive Activity	65
6. Experimental Procedures	66
References	69
4. Assessment of Constitutive Activity and Internalization of GPR54 (KISS1-R)	75
Macarena Pampillo and Andy V. Babwah	
1. Introduction	76
2. Materials	77
3. Methods	79
Acknowledgment	91
References	92
5. Assessment of Constitutive Activity in E-Type Prostanoid Receptors	95
Hiromichi Fujino, Toshihiko Murayama, and John W. Regan	
1. Introduction	96
2. Assays Used to Assess EP3 Receptor Constitutive Activity	97
3. Assays Used to Assess EP4 Receptor Constitutive Activity	105
References	107
6. α_{1D}-Adrenergic Receptors: Constitutive Activity and Reduced Expression at the Plasma Membrane	109
J. Adolfo García-Sáinz, M. Teresa Romero-Ávila, and Luz del Carmen Medina	
1. Introduction	110
2. Methods	111
3. Constitutive Activity	114
4. Plasma Membrane α_{1D} -Adrenergic Receptors	117
5. Possible Physiological Implications	119
Acknowledgments	121
References	121
7. Constitutive Activity of the Histamine H_1 Receptor	127
Saskia Nijmeijer, Rob Leurs, and Henry F. Vischer	
1. Introduction	128
2. Methods to Study Constitutive H_1R Signaling	133
3. Constitutive Activity as Tool to Elucidate Receptor Activation and Crosstalk	142

4. Conclusion	144
Acknowledgments	144
References	145
8. Constitutive Activity of Somatostatin Receptor Subtypes	149
Anat Ben-Shlomo, Kolja Wawrowsky, and Shlomo Melmed	
1. Introduction	150
2. Choosing Cells to be Studied	151
3. Modifying SSTR Density	152
4. Summary	163
References	163
9. Assessment of Homologous Internalization of Constitutively Active N111G Mutant of AT₁ Receptor	165
Mohiuddin Ahmed Bhuiyan and Takafumi Nagatomo	
1. Introduction	166
2. Preparation of Receptor Plasmid and Protein	167
3. Radioligand Binding Assay	168
4. Inositol Phosphate Accumulation Assay	170
5. Internalization Assay	171
6. Western Blot Analysis	173
7. Data Analysis	174
8. Concluding Remark	175
References	175
10. Methods to Detect Cell Surface Expression and Constitutive Activity of GPR6	179
Balakrishna M. Prasad, Bettye Hollins, and Nevin A. Lambert	
1. Introduction	180
2. GPR6 is Expressed in Intracellular Compartments	180
3. Comparison of the Cell Surface Protein Detection Methods	187
4. Comparison of the Constitutive Gs-Activity Detection Methods	192
5. Conclusions	194
References	194
11. β_3-Adrenoceptor Agonists and (Antagonists as) Inverse Agonists: History, Perspective, Constitutive Activity, and Stereospecific Binding	197
Maria Grazia Perrone and Antonio Scilimati	
1. Introduction	198
2. β_3 -Adrenoceptor	201

3. Methodologies	214
Acknowledgments	224
References	225
12. Constitutive Activity of the Lutropin Receptor and Its Allosteric Modulation by Receptor Heterodimerization	231
Deborah L. Segaloff	
1. Introduction	232
2. General Principles for Quantifying Receptor Activation	235
3. Modifying Cell Surface Expression Levels of Recombinant hLHR and Mutants Thereof	239
4. Quantifying Cell Surface hLHR Expression	243
5. Quantifying cAMP Production in Cells Expressing the hLHR	245
6. Experimental Strategies for Characterizing the Attenuating Effects of a Signaling Inactive hLHR on a Coexpressed wt or CAM hLHR	246
Acknowledgment	250
References	250
13. Assessing Constitutive Activity of Extracellular Calcium-Sensing Receptors <i>In Vitro</i> and in Bone	253
Wenhan Chang, Melita Dvorak, and Dolores Shoback	
1. Introduction	254
2. Materials and Methods	258
3. Results	262
4. Conclusions	263
Acknowledgments	265
References	265
14. Constitutive Activity of Neural Melanocortin Receptors	267
Ya-Xiong Tao, Hui Huang, Zhi-Qiang Wang, Fan Yang, Jessica N. Williams, and Gregory V. Nikiforovich	
1. Introduction	268
2. Signaling Assay for the Neural Melanocortin Receptors	268
3. Naturally Occurring Constitutively Active MC4R Mutants	270
4. Inverse Agonism of AgRP at the MC3R	273
5. Computational Modeling of the Constitutively Active MC4R Mutants	273
Acknowledgments	277
References	277

15. Measurement of Constitutive Activity of BMP Type I Receptors	281
David J. J. de Gorter, Maarten van Dinther, and Peter ten Dijke	
1. Introduction	281
2. Determining ALK2 Constitutive Activity	284
3. Determining the Effects of ALK2 Constitutive Activity on Osteoblast Differentiation	289
4. Concluding Remarks	291
Acknowledgments	292
References	292
16. Probing the Constitutive Activity Among Dopamine D1 and D5 Receptors and Their Mutants	295
Bianca Plouffe, Jean-Philippe D'Aoust, Vincent Laquerre, Binhui Liang, and Mario Tiberi	
1. Introduction	296
2. Design of Genetically Modified D1-Like Receptor Constructs and Cloning Strategy	299
3. Transfection of D1R and D5R Expression Constructs in HEK293 Cells	301
4. Radioligand-Binding Assays	303
5. Whole Cell cAMP Assays	305
6. Results Validating Experimental Approaches	313
7. Concluding Remarks	324
Acknowledgments	326
References	327
17. Identification of Gain-of-Function Variants of the Human Prolactin Receptor	329
Vincent Goffin, Roman L. Bogorad, and Philippe Touraine	
1. Introduction	330
2. Experimental Procedures	333
3. Identification of Constitutive Activity: Results and Discussion	345
4. Conclusions	353
Acknowledgments	353
References	353
18. Investigations of Activated ACVR1/ALK2, a Bone Morphogenetic Protein Type I Receptor, That Causes Fibrodysplasia Ossificans Progressiva	357
Frederick S. Kaplan, Petra Seemann, Julia Haupt, Meiqi Xu, Vitali Y. Lounev, Mary Mullins, and Eileen M. Shore	

1. Introduction	358
2. Patient Methodologies	359
3. Cellular Methodologies	362
4. Tissue Methodologies	366
5. <i>In Vivo</i> Methodologies	369
Acknowledgments	371
References	371
19. Identification and Evaluation of Constitutively Active Thyroid Stimulating Hormone Receptor Mutations	375
Joaquin Lado-Abeal, Leah R. Quisenberry, and Isabel Castro-Piedras	
1. Introduction	376
2. <i>TSHR</i> Gene Mutational Screening	382
3. Determination of <i>TSHR</i> Constitutive Activity <i>In Vitro</i>	386
4. Measurement of <i>TSHR</i> Expression at Cell Surface by Flow Cytometry Analysis	388
5. TSH-TSHR Binding Assays	389
6. <i>TSHR</i> Phosphorylation Analysis	391
Acknowledgments	392
References	392
20. Assessment of Constitutive Activity of a G Protein-Coupled Receptor, <i>Cpr2</i>, in <i>Cryptococcus neoformans</i> by Heterologous and Homologous Methods	397
Chaoyang Xue, Yina Wang, and Yen-Ping Hsueh	
1. Introduction of Receptors and Constitutive Receptors	398
2. Identification of <i>Cpr2</i> as a Natural Occurring Constitutively Active Receptor	399
3. Additional Constitutively Active Receptors Identified in Fungi	409
Acknowledgments	409
References	409
21. <i>In Vitro</i> and <i>In Vivo</i> Assessment of Mu Opioid Receptor Constitutive Activity	413
Edward J. Bilsky, Denise Giuvelis, Melissa D. Osborn, Christina M. Dersch, Heng Xu, and Richard B. Rothman	
1. Introduction	414
2. Measuring Opioid Receptor Constitutive Activity <i>In Vitro</i>	415
3. cAMP Quantification Assay in CHO Cells Expressing Cloned Opioid Receptors	425

4. <i>In Vivo</i> Assessment of Antagonist Potency in Opioid Naïve Subjects	430
5. <i>In Vivo</i> Assessment of Antagonist Potency to Precipitate Withdrawal	435
6. Summary	440
Acknowledgments	441
References	441
22. Constitutively Active μ-Opioid Receptors	445
Mark Connor and John Traynor	
1. Introduction	446
2. Methods for Measuring Constitutive Activity	447
3. Conclusions	465
Acknowledgments	465
References	466
23. Protein Kinase CK2 Is a Constitutively Active Enzyme that Promotes Cell Survival: Strategies to Identify CK2 Substrates and Manipulate Its Activity in Mammalian Cells	471
Jacob P. Turowec, James S. Duncan, Ashley C. French, Laszlo Gyenis, Nicole A. St. Denis, Greg Vilks, and David W. Litchfield	
1. Introduction	472
2. Purification of CK2 for <i>In Vitro</i> Studies	474
3. Assays for CK2 Activity	481
4. Modulation of CK2 in Mammalian Cells	485
5. Conclusions	491
Acknowledgments	491
References	492
24. Assessment of CK2 Constitutive Activity in Cancer Cells	495
Maria Ruzzene, Giovanni Di Maira, Kendra Tosoni, and Lorenzo A. Pinna	
1. Introduction	496
2. Assay of CK2 in Crude Biological Samples	499
3. In-Cell Assay of Endogenous CK2 Activity	504
4. Identification/Validation of <i>In Vivo</i> CK2 Targets with Specific Inhibitors	506
Acknowledgments	511
References	511

25. Structural Basis of the Constitutive Activity of Protein Kinase CK2	515
Birgitte B. Olsen, Barbara Guerra, Karsten Niefind, and Olaf-Georg Issinger	
1. Introduction	516
2. A Constitutively Active CK2 α Structure and Its Stabilizing Elements	516
3. Analyzing the Constitutive Activity of Protein Kinase CK2	521
Acknowledgments	528
References	528
26. Measuring the Constitutive Activation of c-Jun N-terminal Kinase Isoforms	531
Ryan T. Nitta, Shawn S. Badal, and Albert J. Wong	
1. Introduction	532
2. Important Reagents for Studying JNK Activity	534
3. Protein Expression and Purification of JNK Proteins and c-JUN	535
4. Measuring the Autophosphorylation Ability of the JNK Isoforms	538
5. Determining the Kinase Activity of the JNK Isoforms	540
6. Monitoring the Formation of JNK Homodimers	540
7. Measuring Nuclear Translocation of JNK Protein	541
8. Future Directions	544
Acknowledgments	546
References	546
27. Measurement of Constitutive MAPK and PI3K/AKT Signaling Activity in Human Cancer Cell Lines	549
Kim H. T. Paraiso, Kaisa Van Der Kooi, Jane L. Messina, and Keiran S. M. Smalley	
1. Introduction	550
2. Maintaining Melanoma Cell Lines	552
3. Western Blotting	553
4. Phospho-Flow Cytometry	559
5. Immunofluorescence	562
6. Conclusions	565
Acknowledgments	566
References	566

28. Constitutive Activity of GPR40/FFA1: Intrinsic or Assay Dependent?	569
Leigh A. Stoddart and Graeme Milligan	
1. Introduction	570
2. Measuring FFA1-Mediated Calcium Mobilization	575
3. Measuring Direct Activation of G Proteins via FFA1	581
References	587
29. Constitutive Activity of TRP Channels: Methods for Measuring the Activity and Its Outcome	591
Shaya Lev and Baruch Minke	
1. Introduction	592
2. TRP Channels and Cellular Degeneration	594
3. Constitutive TRP Channel Activity Which Does Not Lead to Cellular Degeneration	595
4. Constitutive TRP Channel Activity Which Leads to Cellular Degeneration	604
Acknowledgments	609
References	609
30. Measurement of Orexin (Hypocretin) and Substance P Effects on Constitutively Active Inward Rectifier K⁺ Channels in Brain Neurons	613
Yasuko Nakajima and Shigehiro Nakajima	
1. Introduction	614
2. Dissociated Culture of Cholinergic Neurons in the Basal Forebrain	615
3. Effects of Orexin (Hypocretin) and Substance P on Constitutively Active Inward Rectifier K ⁺ (KirNB) Channels	620
4. Signal Transduction of Substance P and Orexin Effects on KirNB Channels	625
Acknowledgments	628
References	629
31. Characterization of G Protein-Coupled Receptor Kinase 4 and Measuring Its Constitutive Activity <i>In Vivo</i>	631
Bradley T. Andresen	
1. Introduction	632
2. Selection of Cells/Model Systems to Study GRK4 Function	634
3. Generation of Kinase Dead-GRK4	637
4. Functional Characterization of GRK4 Constitutive Activity	639

5. Agonist-Mediated GRK4 Activity	648
6. Summary	649
Acknowledgments	649
References	650
32. Voltage-Clamp-Based Methods for the Detection of Constitutively Active Acetylcholine-Gated $I_{K,ACh}$ Channels in the Diseased Heart	653
Niels Voigt, Samy Makary, Stanley Nattel, and Dobromir Dobrev	
1. Introduction	654
2. Recording of Constitutive $I_{K,ACh}$ Using Patch-Clamp Techniques	655
3. Conclusions and Perspective	671
Acknowledgments	673
References	673
33. Assaying WAVE and WASH Complex Constitutive Activities Toward the Arp2/3 Complex	677
Emmanuel Derivery and Alexis Gautreau	
1. Introduction	678
2. Establishment of Stable Cell Lines Expressing Tagged WAVE and WASH Complexes	680
3. Large-Scale Purification of WAVE and WASH Complexes	682
4. Aggregation Analysis of WAVE and WASH Multiprotein Complexes	684
5. Activity Measurements Using Pyrene Actin Polymerization Assays	687
6. Detection of an Endogenous Activity of the WAVE Complex	691
7. Concluding Remarks	693
Acknowledgments	693
References	694
