Section I. Advances in Liposome Formation and Characterization **1**

1. Spontaneously Formed Unilamellar Vesicles	3
Mu-Ping Nieh, Norbert Kučerka, and John Katsaras	
1. Introduction	4
2. Preparation of Spontaneously Forming ULVs	5
3. Characterization of ULVs	6
4. ULV Stability	7
5. Parameters Affecting ULVs	8
6. Mechanism of ULV Formation	12
7. Encapsulation and Controlled Release Mechanism of Spontaneously Formed ULVs	13
8. Application	16
9. Concluding Remarks	16
Acknowledgement	17
References	17

2. Use of Acoustic Sensors to Probe the Mechanical Properties of Liposomes	21
Kathryn Melzak, Achilleas Tsortos, and Electra Gizeli	
1. Introduction	22
2. Acoustic Measurements	25
3. Experimental Procedures	29
4. Change in ΔPh and ΔA for Adsorbed Vesicles as a Function of Cholesterol Content	34
5. Comparison of the Results to Various Model Systems	36
6. Can the Response Be Explained in Terms of Variable Slip at the Surface?	38
7. Displacements Associated with the Liposomes	38

8. Concluding Remarks	39
Acknowledgments	39
References	39
3. Liposome Characterization by Quartz Crystal Microbalance Measurements and Atomic Force Microscopy	43
Patrick Vermette	
1. Introduction	44
2. Liposomes Assessed by AFM	46
3. QCM Measurements of Intact Liposomes	57
4. Surface-Bound Liposomes in Perspective and General Conclusions	65
References	67
4. Mixing Solutions in Inkjet Formed Vesicles	75
Thomas H. Li, Jeanne C. Stachowiak, and Daniel A. Fletcher	
1. Introduction	76
2. Unilamellar Vesicle Formation by Microfluidic Encapsulation	79
3. Determination of Encapsulation Fraction within Vesicles	82
4. Concluding Remarks	92
References	93
5. Recombinant Proteoliposomes Prepared Using Baculovirus Expression Systems	95
Kanta Tsumoto and Tetsuro Yoshimura	
1. Introduction	96
2. Principles of Recombinant Proteoliposome Preparation	96
3. Construction of Recombinant AcNPVs	98
4. Expression of Recombinant Proteins on BV Envelopes	99
5. Preparation of Proteoliposomes by Fusion of BVs with Liposomes	101
6. Concluding Remarks	107
References	108
6. Block Liposomes: Vesicles of Charged Lipids with Distinctly Shaped Nanoscale Sphere-, Pear-, Tube-, or Rod-Segments	111
Alexandra Zidovska, Kai K. Ewert, Joel Quispe, Bridget Carragher, Clinton S. Potter, and Cyrus R. Safinya	
1. Introduction	112
2. Liposome Preparation	115
3. Microscopy	115

4. Design and Synthesis of MVLBG2	116
5. Phase Behavior of MVLBG2/DOPC Lipid Mixtures	118
6. Concluding Remarks	126
Acknowledgments	126
References	127
7. Microfluidic Methods for Production of Liposomes	129
Bo Yu, Robert J. Lee, and L. James Lee	
1. Introduction	130
2. Conventional Technologies for Production of Liposomes	131
3. Microfluidic Technologies for Synthesis of Nanoparticles	132
4. Microfluidic Technologies for Production of Liposomes	133
5. Concluding Remarks	138
Acknowledgments	139
References	139
8. Constructing Size Distributions of Liposomes from Single-Object Fluorescence Measurements	143
Christina Lohr, Andreas H. Kunding, Vikram K. Bhatia, and Dimitrios Stamou	
1. Introduction	144
2. How Particle Size can be Obtained from Intensity Distributions	147
3. Vesicle Preparation and Immobilization	147
4. Image Acquisition	149
5. Image Processing	151
6. Intensity and Size Distributions	155
7. Multilamellarity Assay	155
8. Measuring Membrane-Curvature Selective Protein Binding	158
9. Concluding Remarks	158
References	159
9. Giant Unilamellar Vesicle Electroformation: From Lipid Mixtures to Native Membranes Under Physiological Conditions	161
Philippe Méléard, Luis A. Bagatolli, and Tanja Pott	
1. Introduction	162
2. General GUV Electroformation Protocol	164
3. Methods for GUV Electroformation from Lipid Mixtures, Liposomes, and Native Membranes	167
4. Concluding Remarks	173
References	174

Section II. Liposomes in Therapeutics	177
10. Liposomal Boron Delivery for Neutron Capture Therapy	179
Hiroyuki Nakamura	
1. Introduction	180
2. Boron-Encapsulation Approach	183
3. Boron Lipid-Liposome Approach	186
4. <i>nido</i> -Carborane Lipid Liposomes	187
5. Transferrin-Conjugated <i>nido</i> -Carborane Lipid Liposomes	189
6. <i>closo</i> -Dodecaborate Lipid Liposomes	193
7. Concluding Remarks	203
References	203
11. Production of Recombinant Proteoliposomes for Therapeutic Uses	209
Lavinia Liguori and Jean Luc Lenormand	
1. Introduction	210
2. Expression of Bak Protein Using a Bacterial Cell-Free Expression System	213
3. Scale-Up Production of Bak Proteoliposomes	215
4. Bak Proteoliposome Production	216
5. Liposome Preparation	216
6. Proteoliposome Purification	217
7. Analysis of the Purified Bak Proteoliposomes	217
8. Transmission Electron Microscopy	218
9. Apoptosis Induction in Cancer Cell Lines: Caspase 9 Activation	220
10. Concluding Remarks	221
Acknowledgments	222
References	222
12. Liposome-Mediated Therapy of Neuroblastoma	225
Daniela Di Paolo, Monica Loi, Fabio Pastorino, Chiara Brignole, Danilo Marimpietri, Pamela Becherini, Irene Caffa, Alessia Zorzoli, Renato Longhi, Cristina Gagliani, Carlo Tacchetti, Angelo Corti, Theresa M. Allen, Mirco Ponzoni, and Gabriella Pagnan	
1. Introduction	226
2. Materials	227
3. Untargeted Liposomes Entrapping Doxorubicin	227
4. Tumor-Targeted Liposomal Chemotherapy	228
5. Vascular-Targeted Liposomal Chemotherapy	232
6. Liposomes Entrapping Fenretinide (HPR)	236

7. Antisense Oligonucleotide-Entrapped Liposomes	237
8. Gold-Containing Liposomes	241
Acknowledgments	243
References	243
13. Tumor-Specific Liposomal Drug Release Mediated by Liposomase	251
Ian Cheong and Shibin Zhou	
1. Introduction	252
2. Tumor Models	254
3. Generation of <i>C. novyi</i> Spores and <i>C. novyi</i> -NT	255
4. Preparation of Liposomal Formulations	256
5. Combination Therapy with <i>C. novyi</i> -NT Spores and Liposomes	259
6. Purification and Identification of Liposomase	259
7. Conclusion and Future Perspectives	263
References	263
14. Targeted Lipoplexes for siRNA Delivery	267
Ana Cardoso, Sara Trabulo, João Nuno Moreira, Nejat Düzgüneş, and Maria C. Pedroso de Lima	
1. Introduction	268
2. Liposome and Complex Preparation	270
3. Physicochemical Characterization of the Complexes	271
4. Assessment of siRNA Protection	273
5. Assessment of Lipoplex Internalization and Biological Activity <i>In Vitro</i>	276
6. Cell Viability Studies	283
7. Concluding Remarks	285
References	286
15. Mucosal Delivery of Liposome–Chitosan Nanoparticle Complexes	289
Edison L. S. Carvalho, Ana Grenha, Carmen Remuñán-López, Maria José Alonso, and Begoña Seijo	
1. Introduction	290
2. Preparation of Liposome–Chitosan Nanoparticle (L/CS-NP) Complexes	292
3. Characterization of (L/CS-NP) Complexes	298
4. Results	304
5. Conclusions and Prospects	309
Acknowledgment	310
References	310

16. Antiangiogenic Photodynamic Therapy with Targeted Liposomes	313
Naoto Oku and Takayuki Ishii	
1. Introduction	314
2. PDT with PEG-Coated Liposomal BPD-MA	316
3. PDT with Polycation-Coated Liposomal BPD-MA	318
4. PDT with Tumor Angiogenic Vessel-Targeted Liposomal BPD-MA	324
5. Usefulness of Antiangiogenic PDT with Neovessel-Targeted Liposomes	327
6. Concluding Remarks	329
References	329
17. Controlling the <i>In Vivo</i> Activity of Wnt Liposomes	331
L. Zhao, S. M. Rooker, N. Morrell, P. Leucht, D. Simanovskii, and J. A. Helms	
1. Introduction	332
2. Materials, Methods, and Results	334
3. Concluding Remarks	343
References	345
18. Convection-Enhanced Delivery of Liposomes to Primate Brain	349
Michal T. Krauze, John Forsayeth, Dali Yin, and Krystof S. Bankiewicz	
1. Introduction	350
2. Liposome Preparation	351
3. Quantification of Liposome-Entrapped Gadoteridol by Magnetic Resonance Imaging	352
4. Experimental Subjects	353
5. Infusion Catheter Design and Infusion Procedure	353
6. Distribution of Liposomes Within Anatomic Structures of the Primate Brain	357
7. Volumetric Calculations of Liposomal Distribution in Primate CNS	359
8. Future and Outlook of CED to Brain	359
Acknowledgment	360
References	360
19. Hemoglobin-Vesicles as an Artificial Oxygen Carrier	363
Hiromi Sakai, Keitaro Sou, and Eishun Tsuchida	
1. Introduction: Encapsulated Hemoglobin as an Artificial Oxygen Carrier	364
2. Encapsulation of Concentrated Hb in Liposomes	366
3. Source of Hb and Its Purification	368
4. Regulation of Oxygen Affinity	371
5. Structural Stabilization of Liposome-Encapsulated Hb	372

6. Blood Compatibility of LEH and HbV	374
7. Regulation of Osmotic Pressure and Suspension Rheology to Mimic and Overwhelm the Function of Blood	375
8. Concluding Remarks	377
References	378
