

## Contents

Preface	vii
List of Contributors	ix
<b>1. Role of Phospholipid Transfer Protein in HDL Remodeling and Atherosclerosis</b>	<b>1</b>
<i>Hiroaki Hattori</i>	
<b>2. The Role of Cholesteryl Ester Transfer Protein (CETP) in HDL Metabolism</b>	<b>17</b>
<i>Neil J. Hime</i>	
<b>3. Plasma Cholesteryl Ester Transfer Protein (CETP) in Relation to Human Pathophysiology</b>	<b>35</b>
<i>Akihiro Inazu</i>	
<b>4. HDL and Reverse Cholesterol Transport: Physiological Modulation</b>	<b>61</b>
<i>Giovanna Catalano and Maryse Guerin</i>	
<b>5. Serum Paraoxonase (PON1) and its Interactions with HDL: Relationship between PON1 and Oxidative Stress</b>	<b>77</b>
<i>Jelena Vekic, Jelena Kotur-Stevuljevic, Aleksandra Zeljkovic, Aleksandra Stefanovic, Zorana Jelic-Ivanovic, Slavica Spasic and Vesna Spasojevic-Kalimanovska</i>	
<b>6. Paraoxonase-1 and its Interactions with HDL: Molecular Structures of PON1 and HDL</b>	<b>99</b>
<i>Daniel Rochu, Eric Chabrière and Patrick Masson</i>	

7. Apolipoprotein A-I Mutations 133  
*Akira Matsunaga, Yoshinari Uehara, Bo Zhang and Keiji Saku*
  8. The Scavenger Receptor Class B Type I: An HDL Receptor Involved in Lipid Transport and HDL Dependent Signaling 153  
*Aishah Al-Jarallah, Rachele Brunet and Bernardo Trigatti*
  9. HDL Mimetic Peptides: Novel Therapeutic Strategies for the Treatment of Inflammatory Vascular Disease 179  
*C. Roger White, G.M. Anantharamaiah and Geeta Datta*
  10. Sterol Efflux by ABCA1 and ABCG1 199  
*Naoki Terasaka*
  11. Functional Change in the HDL Particle by Oxidative Modification and its Contribution to Atherogenesis 215  
*Toshiyuki Matsunaga, Akira Hara and Tsugikazu Komoda*
  12. Pre $\beta$ 1-HDL, a Native Lipid-poor HDL, and its Potential as a New Marker for HDL Metabolism 243  
*Takashi Miida and Satoshi Hirayama*
  13. Determination of Circulating Native and Denaturated HDL Concentrations and its Clinical Implications 261  
*Takanari Nakano, Makoto Seo and Tsugikazu Komoda*
- Index 277
