

Section A – Overview 1

1. Organelle Signaling 3
Ralph A. Bradshaw, and Edward A. Dennis

Section B – Nuclear Signaling 9**Part 1****Transcription 11**

2. Signaling at the Nuclear Envelope 13
Géza Ambrus and Larry Gerace
3. Nuclear Receptor Coactivators 21
Joshua D. Stender and Christopher K. Glass
4. Corepressors in Mediating Repression by Nuclear Receptors 27
Gratien G. Prefontaine, Peter J. Cook and Michael G. Rosenfeld
5. Steroid Hormone Receptor Signaling 37
Vincent Giguère
6. FOXO Transcription Factors: Key Targets of the PI3K-Akt Pathway that Regulate Cell Proliferation, Survival, and Organismal Aging 43
Anne Brunet, Hien Tran and Michael E. Greenberg
7. The Multi-Gene Family of Transcription Factor AP-1 53
Peter Angel and Jochen Hess
8. NF κ B: A Key Integrator of Cell Signaling 63
John K. Westwick, Klaus Schwamborn and Frank Mercurio
9. Ubiquitin-mediated Regulation of Protein Kinases in NF κ B Signaling 71
Ming Xu and Zhijian J. Chen

10. Transcriptional Regulation via the cAMP Responsive Activator CREB 83
Paul K. Brindle

11. The NFAT Family: Structure, Regulation, and Biological Functions 89
Fernando Macian, Fernando Cruz-Guilloty, Sonia Sharma and Anjana Rao

12. JAK-STAT Signaling 99
Li Song and Christian Schindler

Part 2**Chromatin Remodeling 107**

13. Histone Acetylation Complexes 109
Tara L. Burke and Patrick A. Grant
14. Regulation of Histone Deacetylase Activities and Functions by Phosphorylation and Dephosphorylation 119
Edward Seto and Xiang-Jiao Yang
15. Histone Methylation: Chemically Inert but Chromatin Dynamic 129
Johnathan R. Whetstone
16. Histone Phosphorylation: Chromatin Modifications that Link Cell Signaling Pathways to Nuclear Function Regulation 139
Priscilla Nga Ieng Lau and Peter Cheung
17. Histone Variants: Signaling or Structural Modules? 149
Toyotaka Ishibashi, Andra Li and Juan Ausió
18. Histone Ubiquitination 167
Vikki M. Weake and Jerry L. Workman

19. Chromatin Mediated Control of Gene Expression in Innate Immunity and Inflammation 179
Gioacchino Natoli

Part 3

Stress Responses 185

20. Complexity of Stress Signaling 187
Daniel R. Hyde, Sally A. Amundson and Albert J. Fornace Jr.
21. Oxidative Stress and Free Radical Signal Transduction 207
Bruce Dimple
22. Double-Strand Break Recognition and its Repair by Non-Homologous End-Joining 215
Xiaoping Cui and Michael R. Lieber
23. ATM Mediated Signaling Defends the Integrity of the Genome 221
Martin F. Lavin, Magtoub Gatei, Philip Chen, Amanda Kijas and Sergei Kozlov
24. Signaling to the p53 Tumor Suppressor through Pathways Activated by Genotoxic and Non-Genotoxic Stresses 235
Carl W. Anderson and Ettore Appella
25. The p53 Master Regulator and Rules of Engagement with Target Sequences 255
Alberto Inga, Jennifer J. Jordan, Daniel Menendez, Veronica De Sanctis and Michael A. Resnick
26. The Heat Shock Response and the Stress of Misfolded Proteins 267
Richard I. Morimoto and Sandy D. Westerheide
27. Hypoxia Mediated Signaling Pathways 277
Denise A. Chan, Albert C. Koong and Amato J. Giaccia
28. Regulation of mRNA Turnover by Cellular Stress 283
Subramanya Srikantan and Myriam Gorospe

29. Oncogenic Stress Responses 293
Dmitry V. Bulavin

30. Ubiquitin and FANC Stress Responses 301
Stacy A. Williams and Gary M. Kupfer

31. Stress and γ -H2AX 309
Jennifer S. Dickey, Christophe E. Redon, Asako J. Nakamura, Brandon J. Baird, Olga A. Sedelnikova and William M. Bonner

Section C – Signaling to/from Intracellular Compartments 319

32. Regulation of mRNA Turnover 321
Ann-Bin Shyu and Chyi-Ying A. Chen
33. Signaling to Cytoplasmic Polyadenylation and Translation 327
Jong Heon Kim and Joel D. Richter
34. Translation Control and Insulin Signaling 333
Anand Selvaraj and George Thomas
35. Signaling Pathways that Mediate Translational Control of Ribosome Recruitment to mRNA 339
Ryan J.O. Dowling and Nahum Sonenberg
36. Nuclear and Cytoplasmic Functions of Abl Tyrosine Kinase 347
Jean Y.J. Wang
37. The SREBP Pathway: Gene Regulation through Sterol Sensing and Gated Protein Trafficking 355
Arun Radhakrishnan, Li-Ping Sun, Peter J. Espenshade, Joseph L. Goldstein and Michael S. Brown
38. Ubiquitination/Proteasome 361
Daniel Kornitzer and Aaron Ciechanover
39. Regulating Endoplasmic Reticulum Function through the Unfolded Protein Response 367
Alicia A. Bicknell and Maho Niwa

40. Protein Quality Control in the Endoplasmic Reticulum 383
Yuki Okuda-Shimizu, Ying Shen and Linda Hendershot
41. Protein Quality Control in Peroxisomes: Ubiquitination of the Peroxisomal Targeting Signal Receptors 389
Chris Williams and Ben Distel
42. Mitochondrial Dynamics: Fusion and Division 399
Yasushi Tamura, Miho Iijima and Hiromi Sesaki
43. Signaling Pathways from Mitochondria to the Cytoplasm and Nucleus 405
Immo E. Scheffler
44. Quality Control and Quality Assurance in the Mitochondrion 413
Carolyn K. Suzuki
45. Mitochondria as Organizers of the Cellular Ca^{2+} Signaling Network 425
György Szabadkai and Michael R. Duchen
46. Signaling during Organelle Division and Inheritance: Peroxisomes 435
Andrei D. Fagarasanu and Richard A. Rachubinski
47. Bidirectional Crosstalk between Actin Dynamics and Endocytosis 443
Giorgio Scita and Pier Paolo Di Fiore
48. Signaling in Autophagy Related Pathways 455
Patrice Codogno and Alfred J. Meijer

Section D – Cell Cycle/Cell Death Signaling 461

49. Regulation of Cell Cycle Progression 463
Jennifer Scolah and Clare H. McGowan
50. The Role of Rac and Rho in Cell Cycle Progression 473
Laura J. Taylor and Dafna Bar-Sagi
51. The Role of Alternative Splicing During the Cell Cycle and Programmed Cell Death 477
Xialu Li and James L. Manley
52. Cell-Cycle Functions and Regulation of Cdc14 Phosphatases 483
Harry Charbonneau
53. Caspases: Cell Signaling by Proteolysis 489
Guy S. Salvesen
54. Apoptosis Signaling: A Means to an End 495
Lisa J. Pagliari, Michael J. Pinkoski and Douglas R. Green
55. The Role of Ceramide in Cell Regulation 505
Leah J. Siskind, Thomas D. Mullen and Lina M. Obeid

Index 517
