

CONTENTS

Preface	vii
Contributors	ix
1. Prothoracicotropic Hormone <i>Wendy Smith and Robert Rybczynski</i>	1
2. Insulin-Like Peptides: Structure, Signaling and Function <i>Yevgeniya Antonova, Anam J. Arik, Wendy Moore, Michael A. Riehle and Mark R. Brown</i>	63
3. Bursicon, a Neuropeptide Hormone that Controls Cuticle Tanning and Wing Expansion <i>Qisheng Song</i>	93
4. Ecdysteroid Chemistry and Biochemistry <i>Rene Lafont, C. Dauphin-Villemant, J. T. Warren and H. Rees</i>	106
5. The Ecdysteroid Receptor <i>Vincent C. Henrich</i>	177
6. Evolution of Nuclear Receptors in Insects <i>François Bonneton and Vincent Laudet</i>	219
7. Neuroendocrine Regulation of Ecdysis <i>Dusan Zitnan and Michael Adams</i>	253
8. The Juvenile Hormones <i>Walter Goodman and Michel Cusson</i>	310
9. Hormones Controlling Homeostasis in Insects <i>David A. Schooley, Frank M. Horodyski and Geoffrey M. Coast</i>	366
10. Hormonal Control of Diapause <i>David L. Denlinger, George D. Yocum and Joseph P. Rinehart</i>	430
11. Endocrine Control of Insect Polyphenism <i>Klaus Hartfelder and Douglas J. Emlen</i>	464
12. Pheromone Production: Biochemistry and Molecular Biology <i>Gary J. Blomquist, Russell Jurenka, Coby Schal and Claus Tittiger</i>	523
Index	568
