

CONTENTS

<i>Contributors</i>	<i>xi</i>
<i>Preface</i>	<i>xv</i>
<i>Volumes in Series</i>	<i>xvii</i>

1. Analyses of Subnanometer Resolution Cryo-EM Density Maps	1
Matthew L. Baker, Mariah R. Baker, Corey F. Hryc, and Frank DiMaio	
1. Introduction	2
2. Features in a Subnanometer Resolution Density Map	3
3. Tools: Analyzing a Subnanometer Resolution Density Map	4
4. Protocol: From Density Map to Atomic Model	9
5. Case Study: Mm-cpn	21
6. Discussion	24
Acknowledgments	25
References	25
2. Methods for Segmentation and Interpretation of Electron Tomographic Reconstructions	31
Niels Volkmann	
1. Introduction	32
2. Noise Reduction	35
3. Segmentation	36
4. Detection and Mapping of Macromolecular Assemblies	38
5. Classification and Averaging	39
6. Validation	40
Acknowledgments	41
References	42
3. Integration of Cryo-EM with Atomic and Protein-Protein Interaction Data	47
Friedrich Förster and Elizabeth Villa	
1. Introduction	48
2. The Problem of Placing Assembly Subunits into Cryo-EM Maps	49
3. Structure Prediction of Subunits	50

4. Protein-Protein Interaction Data	54
5. Model Building of a Complex Using Cryo-EM and Additional Data	58
6. Refinement of Atomic Models Using High-Resolution Maps	64
7. Conclusion and Outlook	68
References	69
4. Unified Data Resource for Cryo-EM	73
Catherine L. Lawson	
1. Introduction	74
2. EM Structural Data Archives	75
3. Deposition and Content	77
4. Access	79
5. Examples of Use	82
6. Future Prospects	85
7. Guide to Deposition of EM Structural Data	85
Acknowledgments	87
References	87
5. Electron Crystallography and Aquaporins	91
Andreas D. Schenk, Richard K. Hite, Andreas Engel, Yoshinori Fujiyoshi, and Thomas Walz	
1. Electron Crystallography	92
2. Contributions of Electron Crystallography to the Structural Biology of Aquaporins	93
3. Contributions of Structural Studies on Aquaporins to Advances in Electron Crystallography	99
Acknowledgments	113
References	113
6. Cryoelectron Microscopy Applications in the Study of Tubulin Structure, Microtubule Architecture, Dynamics and Assemblies, and Interaction of Microtubules with Motors	121
Kenneth H. Downing and Eva Nogales	
1. Introduction: The Role of Electron Microscopy in Tubulin Studies	122
2. Tubulin Studies by Electron Crystallography	123
3. Microtubule Structure	128
4. Structure of Microtubule Assembly/Disassembly Intermediates	131
5. Mechanism of Kinesin Movement Along Microtubule	133
6. Drug Binding Studied by Diffraction and Modeling	136
7. Tomography for Larger Structures	137
8. Conclusion	139

Acknowledgments	139
References	140
7. Helical Crystallization of Two Example Membrane Proteins: MsbA and the Ca^{2+}-ATPase	143
John Paul Graves, Lauren Fisher, Andrew Ward, and Howard S. Young	
1. Helical Crystallization of the Bacterial Integral Membrane Protein, MsbA	144
2. Helical Crystallization of the Sarcoplasmic Reticulum Ca^{2+} -ATPase	147
3. Discussion	151
4. Conclusions	156
Acknowledgments	157
References	157
8. Multiparticle Cryo-EM of Ribosomes	161
Justus Loerke, Jan Giesebrecht, and Christian M. T. Spahn	
1. Introduction	162
2. Dealing with Heterogeneity: 3D Sorting	163
3. Subnanometer Multiparticle Cryo-EM of Ribosomes in Practice	165
4. Interpretation	171
5. Conclusions	173
Acknowledgments	174
References	174
9. Single-Particle Electron Microscopy of Animal Fatty Acid Synthase: Describing Macromolecular Rearrangements that Enable Catalysis	179
Edward J. Brignole and Francisco Asturias	
1. Electron Microscopy and the Next Frontier in Structural Biology	180
2. The Catalytic Cycle of FAS Requires Conformational Changes	180
3. Methods and Rationale Employed in the Conformational Analysis of FAS	182
4. EM and FAS: A Versatile Tool for a Flexible Macromolecule	195
Acknowledgments	198
References	199
10. Tomography of Actin Cytoskeletal Networks	203
Dorit Hanein	
1. Introduction	204
2. Testing the Lamella Hypothesis	205

3. Challenges	206
Acknowledgments	212
References	212
11. Visual Proteomics	215
Friedrich Förster, Bong-Gyoon Han, and Martin Beck	
1. Introduction	216
2. Data Acquisition	217
3. Templates	221
4. Template Matching	227
5. Assessment of Performance	232
6. The Spatial Proteome of <i>L. interrogans</i>	237
7. Outlook	241
Acknowledgments	241
References	242
12. Cryoelectron Tomography of Eukaryotic Cells	245
Asaf Mader, Nadav Elad, and Ohad Medalia	
1. Introduction	246
2. Specimen Preparation	248
3. Relying on Correlative Light and Electron Microscope for Cellular Structural Study of Eukaryotic Cells	252
4. Cryoelectron Tomography of Cytoskeleton-Driven Processes	254
5. Cryotomography of Midbodies	256
6. Structural Analysis of the Nuclear Pore Complex by Cryo-ET	257
7. Concluding Remarks	260
Acknowledgments	260
References	260
13. 3D Visualization of HIV Virions by Cryoelectron Tomography	267
Jun Liu, Elizabeth R. Wright, and Hanspeter Winkler	
1. Introduction	268
2. Cryoelectron Tomography	270
3. 3D Visualization of Intact HIV Virion	278
4. Conclusions and Perspective	286
Acknowledgments	286
References	286

14. Automation in Single-Particle Electron Microscopy: Connecting the Pieces	291
Dmitry Lyumkis, Arne Moeller, Anchi Cheng, Amber Herold, Eric Hou, Christopher Irving, Erica L. Jacovetty, Pick-Wei Lau, Anke M. Mulder, James Pulokas, Joel D. Quispe, Neil R. Voss, Clinton S. Potter, and Bridget Carragher	
1. Introduction	292
2. Specimen Preparation	295
3. Autoloading and Robotic Screening	300
4. Microscopy	304
5. Image Processing	311
6. Assessment and Integration	322
7. The Future of Automation	327
Acknowledgments	330
References	330
