

CONTENTS

Contributors

vii

1. Mechanistic Intersections Between Picornavirus Translation and RNA Replication	1
Sarah Daijogo and Bert L. Semler	
I. Background	2
II. IRES-Dependent Translation and IRES-Transacting Factors	5
III. Viral Modification of Canonical and Noncanonical Translation Factors	8
IV. Important Aspects of RNA Replication	11
V. Important RNA Elements in RNA Replication	11
VI. Viral and Cellular Proteins Involved in RNA Replication	12
VII. Alteration of Host Cell Environment and Implications for Replication	14
VIII. The Switch from Viral Translation to Viral RNA Replication	14
Acknowledgments	19
References	19
2. Mycoviruses, RNA Silencing, and Viral RNA Recombination	25
Donald L. Nuss	
I. Introduction	26
II. Overcoming Technical Challenges to Mycovirus Research	27
III. Antiviral Defense Mechanisms in Fungi	30
IV. Regulation of the Fungal Antiviral RNA Silencing Response	35
V. RNA Silencing Contributes to Mycovirus RNA Recombination	38
VI. Concluding Remarks	43
References	44
3. Viruses and Metabolism: Alterations of Glucose and Glutamine Metabolism Mediated by Human Cytomegalovirus	49
Yongjun Yu, Amy J. Clippinger, Francis J. Pierciey, Jr., and James C. Alwine	
I. The Warburg Effect and Cancer Cells	50
II. Human Cytomegalovirus	52
III. Glucose, Pyruvate, and Glutamine Metabolism in HCMV-Infected Cells	54

IV. How does HCMV Accomplish These Alterations in Glucose and Glutamine Metabolism so that Glucose can be Used for Fatty Acid Synthesis?	55
V. Conclusions and Discussion	62
References	63

4. Regulatory Roles of Protein Kinases in Cytomegalovirus Replication **69**

Manfred Marschall, Sabine Feichtinger, and Jens Milbradt

I. Introduction	70
II. The Nature of Herpesviral Protein Kinases	73
III. CrossTalk Between Herpesviral and Cellular Protein Kinases	74
IV. Conclusions	91
V. Outlook for Antiviral Research	91
Acknowledgments	93
References	93

5. HIV Immune Evasion: Disruption of Antigen Presentation by the HIV Nef Protein **103**

Elizabeth R. Wonderlich, Jolie A. Leonard, and Kathleen L. Collins

I. Introduction to HIV-1 Pathogenesis	104
II. HIV-1 Nef	106
III. Candidate Host Factors that Partner with Nef	110
IV. Downmodulation of MHC-I: Endocytic Mechanism	114
V. Downmodulation of MHC-I: Evidence for Targeting of Newly Synthesized Protein in the Secretory Pathway	114
VI. Summary	119
Acknowledgments	120
References	120
