1. Mast Cells in Nonmammalian Vertebrates: An Overview	1
Gabriella Chieffi Baccari, Claudia Pinelli, Alessandra Santillo, Sergio Minucci, and Rakesh Kumar Rastogi	
1. Introduction	2
2. Mammals	4
3. Nonmammalian Vertebrates	5
4. Summary and Perspectives	35
References	41
2. Control of Actin Assembly by the WH2 Domains and Their Multifunctional Tandem Repeats in Spire and Cordon-Bleu	55
Marie-France Carlier, Clotilde Husson, Louis Renault, and Dominique Didry	
1. Introduction	56
2. Individual WH2 Domain as a Disordered Protein Module Regulating Actin Assembly Dynamics	58
3. Regulation of Actin Assembly by WH2 Repeat Proteins, Spire and Cordon-Bleu	67
4. Concluding Remarks	79
Acknowledgments	80
References	80
3. Role for Primary Cilia as Flow Detectors in the Cardiovascular System	87
Kim Van der Heiden, Anastasia D. Egorova, Robert E. Poelmann, Jolanda J. Wentzel, and Beerend P. Hierck	
1. Introduction	89
2. Primary Cilium	89
3. Biomechanics and the Cardiovascular System	95
4. Primary Cilia in the Cardiovascular System	102
5. Concluding Remarks	110
References	110

4. Chemical Stress on Protein Disulfide Isomerases and Inhibition of their Functions	121
Susumu Imaoka	
1. Introduction	122
2. Identification and Initial Characterization of PDI	124
3. The PDI Family	125
4. Substrate Recognition by PDIs	145
5. Chemicals Binding to PDI	147
6. Inhibition of PDI Functions by Small Compounds (or Ligands)	152
7. Effects of ER Stress on PDI Functions	156
8. Concluding Remarks	157
References	158
5. Retrograde Signaling Pathway from Plastid to Nucleus	167
Takehito Inaba, Fumiko Yazu, Yasuko Ito-Inaba, Tomohiro Kakizaki, and Katsuhiko Nakayama	
1. Introduction	168
2. Historical Overview	169
3. Treatments Known to Affect Plastid Signaling	171
4. Tetrapyrroles	176
5. Redox and ROS in Plastid Signaling	179
6. Effects of Plastid Gene Expression and Protein Import on Nuclear Gene Expression	183
7. GUN Proteins and Plastid Signaling	186
8. Transcription Factors and Plastid Signaling	188
9. Interconnection Between Plastid Signaling and Other Signaling Pathways	191
10. Concluding Remarks	194
Acknowledgments	195
References	195
6. New Insights into the Regulation of Vascular Permeability	205
Alejandra Chavez, Monica Smith, and Dolly Mehta	
1. Introduction	206
2. Endothelial Transport Pathways	206
3. Composition of IEJs	209
4. Signaling Mechanisms Increasing Paracellular Permeability	215
5. Signaling Mechanisms Restoring Normal Paracellular Permeability	221
6. Concluding Remarks	232
Acknowledgments	233
References	233

CONTRIBUTORS

Gabriella Chieffi Baccari

Department of Life Sciences, Second University of Naples, Caserta, Italy

Marie-France Carlier

Cytoskeleton Dynamics and Cell Motility group, CNRS Gif-sur-Yvette, France

Alejandra Chavez

Department of Pharmacology and Center for Lung and Vascular Biology, University of Illinois at Chicago, Chicago, Illinois, USA

Dominique Didry

Cytoskeleton Dynamics and Cell Motility group, CNRS Gif-sur-Yvette, France

Anastasia D. Egorova

Department of Anatomy and Embryology, Leiden University Medical Center, Leiden, The Netherlands

Beerend P. Hierck

Department of Anatomy and Embryology, Leiden University Medical Center, Leiden, The Netherlands

Clotilde Husson

Cytoskeleton Dynamics and Cell Motility group, CNRS Gif-sur-Yvette, France

Susumu Imaoka

Department of Bioscience, School of Science and Technology, Kwansei Gakuin University, Sanda, Hyogo, Japan

Takehito Inaba

Interdisciplinary Research Organization, Faculty of Agriculture, University of Miyazaki, Miyazaki, Japan

Yasuko Ito-Inaba

Interdisciplinary Research Organization, Faculty of Agriculture, University of Miyazaki, Miyazaki, Japan

Tomohiro Kakizaki

National Institute of Vegetable and Tea Science, 360 Kusawa, Ano, Tsu, Mie, Japan
