

CONTENTS

<i>Contributors</i>	<i>xi</i>
<i>Preface</i>	<i>xix</i>
<i>Volumes in Series</i>	<i>xxi</i>

1. Analysis of Serpin Secretion, Misfolding, and Surveillance in the Endoplasmic Reticulum	1
Shujuan Pan, Michael J. Iannotti, and Richard N. Sifers	
1. Introduction	2
2. Protocols	3
3. Concluding Remarks	14
Acknowledgments	14
References	14
2. Serpin-Enzyme Receptors: LDL Receptor-Related Protein 1	17
Dudley K. Strickland, Selen Catania Muratoglu, and Toni M. Antalis	
1. Introduction	18
2. Purification of LRP1	18
3. Expression of Receptor Fragments	21
4. Ligand Binding to LRP1	23
5. Binding of Serpin-Enzyme Complexes to LRP1	26
6. Summary	28
Acknowledgments	28
References	28
3. The Role of Autophagy in Alpha-1-Antitrypsin Deficiency	33
Tunda Hidvegi, Amitava Mukherjee, Michael Ewing, Carolyn Kemp, and David H. Perlmutter	
1. Introduction	34
2. Methods for Detection of Autophagy in Cell Line Models	36
3. LC3 Conversion Assay	38
4. Assessing Autophagy by Analyzing Degradation of Long-Lived Proteins	41
5. Use of Autophagy-Deficient Cell Lines	42

6. Pulse-Chase Labeling to Determine the Effect of Autophagy on Degradation of Individual Proteins	43
7. Methods for Detection of Hepatic Autophagy <i>In Vivo</i>	45
8. Methods for Detection of Hepatic Injury	48
References	52
4. Serpins and the Complement System	55
László Beinrohr, Thomas A. Murray-Rust, Leanne Dyksterhuis, Péter Závodszy, Péter Gál, Robert N. Pike, and Lakshmi C. Wijeyewickrema	
1. Introduction	56
2. Human Plasma C1-Inhibitor	57
3. Production of Recombinant C1-Inhibitor in Yeast	64
Acknowledgments	73
References	74
5. Use of Mouse Models to Study Plasminogen Activator Inhibitor-1	77
Paul J. Declerck, Ann Gils, and Bart De Taeye	
1. Introduction	78
2. Role of PAI-1 in Different (Patho)Physiological Processes	80
3. Mouse Models to Study the Role of PAI-1	82
4. Mouse (Wild-Type) Models to Study the Role of PAI-1 in Cardiovascular Disease and Cancer	83
5. Genetically Modified Mice to Study the Role of PAI-1 in Cardiovascular Disease and Cancer	87
6. Conclusions	93
References	94
6. Plasminogen Activator Inhibitor Type 2: Still an Enigmatic Serpin but a Model for Gene Regulation	105
Robert L. Medcalf	
1. Introduction	106
2. PAI-2 and the Plasminogen-Activating System	107
3. General Features of PAI-2	108
4. PAI-2 Gene Expression and Regulation	115
5. Conclusions	122
6. Methodology: Rapid Run-On Transcription Assay Protocol	123
Acknowledgments	126
References	126

7. The SerpinB1 Knockout Mouse: A Model for Studying Neutrophil Protease Regulation in Homeostasis and Inflammation	135
Charaf Benarafa	
1. Generation of <i>SerpinB1</i> Knockout Mice	136
2. Models of Lung Infection and Inflammation	139
3. Neutrophil Homeostasis	142
Acknowledgments	146
References	146
8. Investigating Maspin in Breast Cancer Progression Using Mouse Models	149
Michael P. Endsley and Ming Zhang	
1. Introduction	150
2. Transgenic Mouse Models	151
3. Syngeneic Tumor Model	157
4. Conclusion	161
References	162
9. Hsp47 as a Collagen-Specific Molecular Chaperone	167
Yoshihito Ishida and Kazuhiro Nagata	
1. Introduction	168
2. Hsp47 as a Collagen-Binding Protein in the ER	169
3. Interaction and Recognition of Collagen by Hsp47	170
4. A Phenotype and Abnormal Collagen Maturation in Hsp47 Knockout Mice	171
5. Possible Roles of Hsp47 in Procollagen Maturation in the ER	172
6. Hsp47 Null Cells: A Tool for Studying the Fate of Misfolded Collagen	174
7. Regulation of Hsp47 Expression and Its Clinical Importance	176
References	178
10. Assays for the Antiangiogenic and Neurotrophic Serpin Pigment Epithelium-Derived Factor	183
Preeti Subramanian, Susan E. Crawford, and S. Patricia Becerra	
1. Introduction	184
2. Purification of PEDF Protein	185
3. Techniques to Assay PEDF	188
4. Neurotrophic Assays	194
5. Antiangiogenic Assays	197
Acknowledgments	202
References	202

11. The <i>Drosophila</i> Serpins: Multiple Functions in Immunity and Morphogenesis	205
Jean Marc Reichhart, David Gubb, and Vincent Leclerc	
1. Introduction	206
2. The Range of <i>Drosophila</i> Serpin Functions	207
3. Techniques for Analysis of Immune Response	214
Acknowledgments	220
References	220
 12. Modeling Serpin Conformational Diseases in <i>Drosophila melanogaster</i>	 227
Thomas R. Jahn, Elke Malzer, John Roote, Anastasia Vishnivetskaya, Sara Imarisio, Maria Giannakou, Karin Panser, Stefan Marciniak, and Damian C. Crowther	
1. Introduction	228
2. Why <i>Drosophila</i> Models of Serpinopathies?	229
3. Screening for Polymerogenic Mutations in Physiologically Important Fly Serpins	229
4. First Steps in the Generation of a Human Serpinopathy Model in <i>Drosophila</i>	230
5. Longevity Assays in Flies Expressing Human Serpins	233
6. Behavioral Assays in Flies Expressing Human Serpins	234
7. Microscopic Phenotyping of Flies Expressing Human Serpins	235
8. Using Genetic Screens to Identify Genes That Have a Role in Generating, or Suppressing Serpin-Induced Phenotypes	236
9. Conclusions	237
10. Method 1: Generating Transgenic <i>Drosophila</i>	237
11. Method 2: The <i>Drosophila</i> UAS/GAL4 Expression System	242
12. Method 3: Chemical Mutagenesis and X-ray Mutagenesis	242
13. Method 4: Screening for Mutations Caused by Chemical and X-ray Mutagenesis	245
14. Method 6: Examination of the Eye Imaginal Disc	246
15. Method 7: Pseudopupil Assay	248
16. Method 8: Protein Extraction from Flies	250
17. Method 9: Genetic Backcrossing	251
18. Method 10: Longevity Assays	252
19. Method 11: Locomotor Assays	253
20. Method 12: Immunostaining of Fly Brains	253
21. Method 13: P-element and RNAi Screening	254
22. Method 15: Deletion Kit Screening	255
References	255

13. Using <i>Caenorhabditis elegans</i> to Study Serpinopathies	259
Olivia S. Long, Sager J. Gosai, Joon Hyeok Kwak, Dale E. King, David H. Perlmutter, Gary A. Silverman, and Stephen C. Pak	
1. Introduction	260
2. Considerations for Transgenesis	261
3. Microinjection	268
4. High-Content Drug Screening	273
Acknowledgments	279
References	279
14. Using <i>C. elegans</i> to Identify the Protease Targets of Serpins <i>In Vivo</i>	283
Sangeeta R. Bhatia, Mark T. Miedel, Cavita K. Chotoo, Nathan J. Graf, Brian L. Hood, Thomas P. Conrads, Gary A. Silverman, and Cliff J. Luke	
1. Introduction	284
2. Methods for Identifying the Targets of Intracellular Serpins in <i>C. elegans</i>	286
Acknowledgments	297
References	297
15. Viral Serpin Therapeutics: From Concept to Clinic	301
Hao Chen, Donghang Zheng, Jennifer Davids, Mee Yong Barteo, Erbin Dai, Liying Liu, Lyubomir Petrov, Colin Macaulay, Robert Thoburn, Eric Sobel, Richard Moyer, Grant McFadden, and Alexandra Lucas	
1. Introduction	302
2. From Viral Pathogenesis to Identification of Immunomodulatory Potential	305
3. Testing Biological Potential	307
4. Assessing Clinical Therapeutic Potential for a Viral Serpin in Clinical Trial: Trial of Serp-1 Treatment in Patients with Acute Coronary Syndrome and Stent Implant	319
References	326
16. Human SCCA Serpins Inhibit Staphylococcal Cysteine Proteases by Forming Classic "Serpins-Like" Covalent Complexes	331
Tomasz Kantyka and Jan Potempa	
1. Introduction	332
2. Purification of Staphopains	333
3. Purification of GST-SCCA1 and GST-SCCA2 Fusion Proteins	333
4. Characterization of Inhibition	334

5. Detection of Serpin-Enzyme Complex	338
6. Determination of an Interaction Site	341
7. Summary	343
Acknowledgments	344
References	344
17. Plants and the Study of Serpin Biology	347
Thomas H. Roberts, Joon-Woo Ahn, Nardy Lampl, and Robert Fluhr	
1. Introduction	348
2. Detection of Serpins in Plant Extracts and Localization of Serpins in Plant Tissues and Cells	349
3. Purification of Serpins from Plant Tissues	353
4. Production of Recombinant Plant Serpins	360
5. Analysis of Plant Serpin-Protease Interactions	360
Acknowledgments	364
References	364
<i>Author Index</i>	369
<i>Subject Index</i>	397
