

CONTENTS

CONTRIBUTORS TO VOLUME 58.....	vii
PREFACE	ix
CONTENTS OF VOLUMES 35-57	xiii

Carotenoids

ABBY J. CUTTRISS, CHRISTOPHER I. CAZZONELLI,
ELEANORE T. WURTZEL, AND BARRY J. POGSON

I. Biological Function	3
II. Distribution	6
III. Carotenoid Biosynthesis	7
IV. Regulation of Carotenoid Biosynthesis	17
V. Nutrition	21
VI. Conclusions	25
Acknowledgements	25
References	25

Vitamin B₁ (Thiamine): A Cofactor for Enzymes Involved in the Main Metabolic Pathways and an Environmental Stress Protectant

MARIA RAPALA-KOZIK

I. Introduction	38
II. Thiamine Biosynthesis	45
III. TDP-dependent Enzymes in Plants	58
IV. Thiamine Transport, Distribution and Storage in Plant Tissues	65
V. Role of Thiamine in the Sensing, Response and Adaptation to Plant Stress ...	67
VI. Practical Aspects and Future Perspectives	72
Acknowledgements	74
References	74

Biosynthesis of Vitamin B₂ and Flavocoenzymes in Plants

MARKUS FISCHER AND ADELBERT BACHER

I. Introduction	94
II. A Single Plant Enzyme, RibAB Generates Both Committed Precursors for the Riboflavin Pathway.....	100

III. Deaminase/Reductase	105
IV. Lumazine Synthase	108
V. Riboflavin Synthase	116
VI. Riboflavin Kinase and FAD Synthetase	126
VII. Cellular Topology of Flavocoenzyme Biosynthesis in Plants	127
VIII. Regulation of Riboflavin Biosynthesis	128
IX. Excretion and Enhanced Formation of Riboflavin by Iron-Deficient Roots	129
X. Evolution of Flavocoenzyme Biosynthesis Enzymes in Plants	131
XI. Riboflavin Biosynthetic Enzymes as Potential Herbicide Targets	132
XII. Riboflavin and Plant Resistance	132
XIII. Biosynthesis of 5-deaza-7,8-didemethyl-8-hydroxy-riboflavin in Algae	133
XIV. Conclusions	137
References	138

Biosynthesis of NAD and Its Manipulation in Plants

GRAHAM NOCTOR, JUTTA HAGER, AND SHENGCHUN LI

I. Introduction	154
II. NAD in Human Nutrition and Health	156
III. NAD in Plant Biology	163
IV. Compartmentation and Transport of NAD in Plants	168
V. Plant Pathways of NAD Synthesis and Recycling	174
VI. Manipulating NAD Contents in Plants	180
VII. Conclusions and Perspectives	188
Acknowledgements	189
References	189

Pantothenate Biosynthesis in Higher Plants

MICHAEL E. WEBB AND ALISON G. SMITH

I. Biological Function and Requirements	204
II. Distribution in Plants	211
III. Biosynthetic Pathway and Location of the Pathway	213
IV. Regulation, Turnover, and Metabolism	226
V. Major Differences to Eubacteria and Other Prototrophic Organisms	233
VI. Engineering the Pathway	240
VII. Conclusion	244
References	245
