Contributors vii

1 Sensory Functions for Degenerin/Epithelial Sodium Channels (DEG/ENaC) 1

Yehuda Ben-Shahar

- I. Introduction 2
- II. Chemosensation 7
- III. Mechanosensation 10
- IV. Peripheral Pain 15
- V. Conclusions 17
- References 17

2 Genetic and Phenotypic Consequences of Introgression Between Humans and Neanderthals 27

Christopher Wills

- I. Introduction 28
- II. The First Genetic Evidence for Introgression in Our Species 29
- III. Evidence for Introgression Obtained from Present-Day Human Genomes 30
- IV. History of Hominans in Europe 32
- V. Comparison of Middle European Neanderthal Nuclear DNA with Modern Human Nuclear DNA 37
- VI. The ABBA-BABA Test for Introgression 38
- VII. Different Regions of the Neanderthal Genome are Found in Different Modern Humans 41
- VIII. The Genetic Contribution of the Denisovans to Our Species 44
- IX. Possible Range of Phenotypic Impacts of Neanderthal and Denisovan Introgressions into Modern Humans 45
- Acknowledgments 50
- References 50

3 Genomic Approaches to Understanding Hox Gene Function 55

Siew Woh Choo and Steven Russell

- I. Introduction: Historical Perspective 56
- II. The Molecular Genetics of Hox Complexes: Conservation and Colinearity 59
- III. Hox Target Genes and Functions 62
- IV. Early Experiments to Identify Hox Target Genes 65
- V. Genomic Approaches to Identifying Hox Target Genes 66
- VI. Microarray Expression Profiling 68
- VII. ChIP Approaches 73
- VIII. Computational Approaches 80
- IX. Prospects 81
- References 84

4 GATA Transcription Factors in the Developing Reproductive System 93

Tamara Zaytouni, Evgeni E. Efimenko, and Sergei G. Tevosian

- I. Introduction 94
- II. Molecular Control of Gonadal Development 99
- III. Canonical WNT Signaling Control of Gonadal Development 102
- IV. The GATA-FOG Transcriptional Partnership 103
- V. GATA4-FOG2 Control of Gonadal Development 105
- VI. Conclusions 119
- Acknowledgment 120
- References 120
