vii

1. Phage Therapy Pharmacology: Calculating Phage Dosing	1
Stephen Abedon	
I. Introduction	2
II. Standard Antibacterial <i>In Vitro</i> Metrics	3
III. Killing Titer and MBC Calculation	9
IV. Reduction Times and Dosing	19
V. Bacterial Density and Phage Population Growth	29
VI. Effective Dose Revisited	34
VII. Conclusion	34
References	38
2. From Rio Tinto to Mars: The Terrestrial and Extraterrestrial Ecology of Acidophiles	41
R. Amils, E. González-Toril, A. Aguilera, N. Rodríguez, D. Fernández-Remolar, F. Gómez, A. García-Moyano, M. Malki, M. Oggerin, I. Sánchez-Andrea, and J. L. Sanz	
I. Introduction	42
II. Extremophiles	43
III. Acidophiles	44
IV. Geomicrobiology of Rio Tinto	46
V. Subsurface Geomicrobiology of the Iberian Pyrite Belt	55
VI. Methanogenesis in Nonmethanogenic Conditions	59
VII. Rio Tinto as a Geochemical Analogue of Mars	62
VIII. Future Trends	64
References	65
3. Fungal Adaptation to Extremely High Salt Concentrations	71
Cene Gostinčar, Metka Lenassi, Nina Gunde-Cimerman, and Ana Plemenitaš	
I. Halotolerant and Halophilic Fungi: An Introduction	72
II. <i>Hortaea werneckii</i> —A Model for Extreme Halotolerance	78
III. <i>Wallemia ichthyophaga</i> —Alternative Halophilic Solutions	87

IV. The Next Step: Genomics, Transcriptomics, and Beyond	88
V. Conclusions: An Integrated Model of Extreme Halotolerance	89
Acknowledgments	91
References	91
4. Resistance of Yeasts to Weak Organic Acid Food Preservatives	97
Peter W. Piper	
I. The Monocarboxylate Preservatives	98
II. The Physiological Action of Weak Organic Carboxylic Acids on Yeast	101
III. Resistance Mechanisms	104
IV. Conclusions	110
References	110
5. Silver Nanoparticles: A Microbial Perspective	115
M. J. Sweet and I. Singleton	
I. Introduction	116
II. NP Types	117
III. Microbial-related Applications of NPs	119
IV. Mechanism of Antimicrobial Action of AgNP	120
V. Environmental Implications of AgNP—Microbial Considerations	122
VI. Conclusions	126
Acknowledgments	127
References	127
