

CONTENTS

Contributors

vii

1. Myxobacterial Vesicles: Death at a Distance?	1
David E. Whitworth	
I. Introduction	2
II. Outer Membrane Vesicles	2
III. Myxobacteria	8
IV. Myxobacterial Vesicles	16
V. Concluding Remarks	23
Acknowledgments	25
References	25
2. Diversity, Structure, and Size of N₂O-Producing Microbial Communities in Soils—What Matters for Their Functioning?	33
Gesche Braker and Ralf Conrad	
I. Introduction	34
II. Global Importance of N ₂ O Emissions	35
III. Processes Leading to N ₂ O Production	37
IV. Exploring Ammonia Oxidizer and Denitrifier Communities in Soil	42
V. Importance of Diversity, Structure, and Size of Nitrifier and Denitrifier Communities for N ₂ O Production in Soil	46
VI. Conclusion	56
Acknowledgments	57
References	57
3. Solar-Driven Hydrogen Production in Green Algae	71
Steven J. Burgess, Bojan Tamburic, Fessehay Zemichael, Klaus Hellgardt, and Peter J. Nixon	
I. Introduction	72
II. Biophotolytic H ₂ Production	73
III. H ₂ Production in Green Algae	74
IV. Improving H ₂ Production in <i>C. reinhardtii</i>	78
V. Engineering Challenges: Photobioreactors	93

VI. Conclusions and Future Prospects	97
References	98

4. Mucosal Biofilm Communities in the Human Intestinal Tract **111**

Sandra Macfarlane, Bahram Bahrami, and George T. Macfarlane

I. Introduction	112
II. Colonization of the Upper Gastrointestinal Tract	113
III. Mucosal-Associated Populations in the Large Bowel	118
IV. Alterations in Intestinal Mucosal Communities in IBD	123
V. Therapeutic Manipulation of Mucosal Biofilm Communities	130
VI. Modeling Studies	133
VII. Conclusions	135
References	135
