Contributors ix

- 1 **Introduction** 1
Stuart Brody
 - I. Introduction 1
 - II. An Unofficial, Abbreviated/Annotated Version of the History of the Genetics of Circadian Rhythms 2
 - III. Common Themes 5
 - IV. Some Reflections 7
 - References 10
- 2 **The Itty-Bitty Time Machine: Genetics of the Cyanobacterial Circadian Clock** 13
Shannon R. Mackey, Susan S. Golden, and Jayna L. Ditty
 - I. Introduction 15
 - II. The Kai-Based Oscillator: Early Studies 17
 - III. KaiC: Breakthroughs into Oscillator Timing and Clock Synchronization 22
 - IV. Input Pathways: Light-Dependent Cellular Metabolism Synchronizes the Clock with Local Time 28
 - V. Output Pathways: Multiple Independent Pathways Merge to Coordinate Cellular and Physiological Processes 35
 - VI. Conclusions 44
 - Acknowledgments 46
 - References 46
- 3 **The Genetics of Circadian Rhythms in *Neurospora*** 55
Patricia L. Lakin-Thomas, Deborah Bell-Pedersen, and Stuart Brody
 - I. Introduction 57
 - II. Early Genetic Analysis 59

III. The Genetics and Biochemistry of the FRQ/WCC Feedback Loop	64
IV. Other Clock-Associated Genes	76
V. FRQ-Less Rhythms	79
VI. Clock-Controlled Genes	89
VII. Outlook	94
References	95
4 The Genetics of Plant Clocks	105
C. Robertson McClung	
I. Introduction	106
II. Genome-Wide Characterization of Circadian-Regulated Genes and Processes	107
III. Molecular Organization of Plant Circadian Clocks into Interlocked Transcriptional Feedback Loops	110
IV. Conservation of Clock Genes	122
V. Circadian Clocks Enhance Fitness	124
VI. Concluding Remarks	126
Acknowledgment	126
References	126
5 Molecular Genetic Analysis of Circadian Timekeeping in <i>Drosophila</i>	141
Paul E. Hardin	
I. Introduction	142
II. The Circadian Feedback Loops of <i>Drosophila</i>	144
III. Posttranscriptional Regulation of Rhythmic Transcription	149
IV. Light Entrainment of the <i>Drosophila</i> Circadian Feedback Loops	154
V. Summary and Conclusions	161
Acknowledgments	164
References	165
6 Genetics of Circadian Rhythms in Mammalian Model Organisms	175
Phillip L. Lowrey and Joseph S. Takahashi	
I. Introduction	176
II. The Beginning of Mammalian Clock Genetics	178

III. Overview of the Mammalian Clock System	183
IV. The Mammalian Circadian Molecular Oscillator	186
V. Behavioral, Molecular, and Cell/Tissue Effects of Circadian Clock Gene Mutations	188
VI. Posttranslational Modification of Clock Proteins	194
VII. Posttranscriptional Clock Mechanisms	204
VIII. Effects of Temperature on the Mammalian Clock	207
IX. Unresolved Issues and Future Directions	211
X. Conclusion	212
Acknowledgments	213
References	213
7 The Genetics of the Human Circadian Clock	231
Luoying Zhang, Chris R. Jones, Louis J. Ptacek, and Ying-Hui Fu	
I. Human Circadian Phenotypes	232
II. Insights Gained from Familial Advanced Sleep Phase Syndrome	235
III. Insights Gained from Association Studies	242
IV. Future Directions	243
References	244
Index	249
