Foreword to the Second Edition

Foreword to the Third Edition

Foreword to the Fourth Edition

Preface to the Fourth Edition

Section I

Biophysical Chemistry, Metabolism, Second Messengers, and Ultrastructure

1. Biophysical Chemistry of Physiological Solutions

Jeffrey C. Freedman

2. Physiological Structure and Function of Proteins

Matthew R. Pincus

3. Cell Membranes

Jeffrey C. Freedman

4. Ionophores in Planar Lipid Bilayers

Jeffrey C. Freedman

5. Cell Structure

Michael S. Forbes

6. Signal Transduction and Second Messengers

Aldebaran M. Hofer

7. Calcium as an Intracellular Second Messenger: Mediation by Calcium-Binding Proteins

John R. Dedman and Marcia A. Kaetzel

xi
xiii
xvii
xix
xxi
xxiii
xxv

Section II

Membrane Potential, Transport Physiology, Pumps, and Exchangers

8. Diffusion and Permeability

113

Nicholas Sperelakis and Jeffrey C. Freedman

9. Origin of Resting Membrane Potentials

121

Nicholas Sperelakis

10. Gibbs–Donnan Equilibrium Potentials

147

Nicholas Sperelakis

11. Mechanisms of Carrier-Mediated Transport: Facilitated Diffusion, Cotransport and Countertransport

153

Steven M. Grassl

12. Active Ion Transport by ATP-Driven Ion Pumps

167

Robert A. Farley

13. Ca^{2+} -ATPases

179

*Tracy J. Pritchard, Istvan Edes and
Evangelia G. Kranias*

14. Na^{+} - Ca^{2+} Exchange Currents

195

*John H.B. Bridge, Natalia S. Torres and
Michela Ottolia*

15. Intracellular Chloride Regulation

221

Francisco J. Alvarez-Leefmans

16. Osmosis and Regulation of Cell Volume	261	27. Why are So Many Ion Channels Mechanosensitive?	493
<i>Clive M. Baumgarten and Joseph J. Feher</i>		<i>Catherine E. Morris</i>	
17. Intracellular pH Regulation	303		
<i>Robert W. Putnam</i>			
Section III		Section IV	
Membrane Excitability and Ion Channels		Ion Channels as Targets for Toxins, Drugs, and Genetic Diseases	
18. Cable Properties and Propagation of Action Potentials	325	28. Ion Channels as Targets for Toxins	509
<i>Nicholas Sperelakis</i>		<i>Kenneth M. Blumenthal</i>	
19. Electrogenesis of Membrane Excitability	345	29. Ion Channels as Targets for Drugs	525
<i>Nicholas Sperelakis</i>		<i>Seth Robey, Kevin J. Sampson and Robert S. Kass</i>	
20. Patch-Clamp Techniques	369	30. Inherited Diseases of Ion Transport	535
<i>Laura Conforti</i>		<i>Robert A. Farley</i>	
21. Structure and Mechanism of Voltage-Gated Ion Channels	383		
<i>Simon Rock Levinson and William A. Sather</i>		Section V	
22. Biology of Gap Junctions	409	Synaptic Transmission and Sensory Transduction	
<i>Richard D. Veenstra</i>		31. Ligand-Gated Ion Channels	549
23. Regulation of Cardiac Ion Channels by Cyclic Nucleotide-Dependent Phosphorylation	431	<i>Kenneth R. Tovar and Gary L. Westbrook</i>	
<i>Gordon M. Wahler and Nicholas Sperelakis</i>		32. Synaptic Transmission	563
24. Direct Regulation of Ion Channels by GTP-Binding Proteins	445	<i>Janusz B. Suszkiw</i>	
<i>Atsushi Inanobe and Yoshihisa Kurachi</i>		33. Excitation—Secretion Coupling	579
25. Developmental Changes in Ion Channels	453	<i>Nicole Gallo-Payet and Marcel Daniel Payet</i>	
<i>Takeshi Kobayashi, Noritsugu Tohse, Hisashi Yokoshiki and Nicholas Sperelakis</i>		34. Stimulus—Response Coupling in Metabolic Sensor Cells	601
26. Regulation of Ion Channel Localization and Activity Through Interactions with the Cytoskeleton	475	<i>Stan Misler</i>	
<i>Stephen Lambert</i>		35. Cyclic Nucleotide-Gated Ion Channels	621
		<i>Anita L. Zimmerman</i>	
		36. Sensory Receptors and Mechanotransduction	633
		<i>Andrew S. French and Päivi H. Torkkeli</i>	

37. Acoustic Transduction	649	46. Contraction of Muscles: Mechanochemistry	801
<i>Daniel C. Marcus</i>		<i>Richard J. Paul</i>	
38. Visual Transduction	669	47. Flagella, Cilia, Actin- and Centrin-based Movement	823
<i>Anita L. Zimmerman</i>		<i>Kenneth W. Foster</i>	
39. Gustatory and Olfactory Sensory Transduction	681	48. Electrocytes of Electric Fish	855
<i>Stephen D. Roper</i>		<i>Anthony L. Gotter, Marcia A. Kaetzel and John R. Dedman</i>	
40. Infrared Sensory Organs	699		
<i>Stephen D. Roper and Michael S. Grace</i>			
41. Electoreceptors and Magnetoreceptors	705	Section VII	
<i>Timothy C. Tricas and Bruce A. Carlson</i>		Protozoa and Bacteria	
		49. Physiological Adaptations of Protists	873
		<i>Michael Levandowsky</i>	
Section VI		50. Physiology of Prokaryotic Cells	891
Muscle and Other Contractile Systems		<i>Dennis W. Grogan</i>	
42. Skeletal Muscle Excitability	729		
<i>Nicholas Sperelakis, Judith Heiny and Hugo Gonzalez-Serratos</i>		Section VIII	
43. Cardiac Action Potentials	757	Specialized Processes: Photosynthesis and Bioluminescence	
<i>Gordon M. Wahler</i>		51. Photosynthesis	909
44. Smooth Muscle Excitability	771	<i>Darrell Fleischman</i>	
<i>Neil D. Detweiler, Anup K. Srivastava, Asif R. Pathan, Sujay V. Kharade and Nancy J. Rusch</i>		52. Bioluminescence	925
45. Excitation-Contraction Coupling in Skeletal Muscle	783	<i>J. Woodland Hastings</i>	
<i>Judith A. Heiny and Gerhard Meissner</i>		Appendix	949
		Index	957
