<i>Volumes in Series</i>	<i>xxi</i>

Section I. Organelles and Cellular Structure 1

1. Monitoring Cytoskeletal Dynamics in Living Neurons Using Fluorescence Photoactivation 3

Anne Gauthier-Kemper, Carina Weissmann, Hans-Jürgen Reyher, and Roland Brandt

1. Introduction	4
2. Generation and Expression of PAGFP Fusion Constructs with Cytoskeletal Proteins	5
3. Fluorescence Photoactivation, Live Cell Imaging, and Data Analysis	12
Acknowledgments	20
References	20

2. Red/Far-Red Fluorescing DNA-Specific Anthraquinones for Nucl:Cyto Segmentation and Viability Reporting in Cell-Based Assays 23

Roy Edward

1. Introduction	24
2. The Basic Requirement for Counterstaining	25
3. An Optimized Counterstain for GFP-Based Assays	27
4. Cellular Compartment Segmentation	28
5. Labeling Cells in Live and Fixed End-Point Assays	29
6. Protocol for Differential Dual Nuclear/Cytoplasmic Counterstaining in Live Cells	31
7. Protocols for Differential Dual Nuclear/Cytoplasmic Counterstaining in Fixed Cells	32
8. Measuring Cellular DNA Content	33
9. Protocol: DRAQ5™ DNA Content Measurement by Imaging	34
10. Protocol: Cell Enumeration in "In-Cell Westerns" (After Hannoush, 2008)	36
11. Further Augmentation of Compartment Segmentation	37

12. Cell Enumeration and Morphometrics: Early Sentinels of <i>In Vitro</i> Toxicology	37
13. A Far-Red Viability Dye Derivative	39
14. Protocols: Use of DRAQ7 TM to Identify Membrane-Compromised Cells	40
15. Summary	42
Acknowledgment	43
References	43
3. Methods to Measure Actin Treadmilling Rate in Dendritic Spines	47
Mikko Koskinen, Enni Bertling, and Pirta Hotulainen	
1. Introduction	48
2. Methods	51
Acknowledgments	57
References	57
4. Live-Cell Imaging of Clathrin Coats	59
Comert Kural and Tom Kirchhausen	
1. Introduction	60
2. Dynamics of Clathrin Assembly	61
3. Limits of Fluorescence Microscopy	62
4. TIRF Microscopy	63
5. How to Optimize Your TIRF System	64
6. Spinning-Disk Confocal Microscopy	65
7. Spherical Aberration Correction Applied to Spinning-Disk Confocal Microscopy	66
8. Getting Around the Diffraction Limit	67
9. Use of 2D Spinning-Disk Confocal Microscope to Study Clathrin-Mediated Endocytosis at the Ventral and Dorsal Surfaces of a Cell	69
10. Use of TIRF Microscopy to Study Clathrin-Mediated Endocytosis	70
11. The Third Dimension	71
12. 3D Tracking in Spinning-Disk Imaging	72
13. Use of 3D Tracking to Monitor Clathrin-Mediated Entry of Reovirus Particles at the Apical Surface of Polarized Cells	74
14. Using the Optimum Pixel and Step Sizes in z-Stacks	76
15. Conclusion	76
Acknowledgments	77
References	77
5. Imaging the Mitotic Spindle	81
Paul S. Maddox, Anne-Marie Ladouceur, Rajesh Ranjan, Jonas Dorn, Hery Ratsima, Damien D'Amours, and Amy S. Maddox	
1. Introduction	82
2. Modern Light Microscopy	83

3. Examples	93
4. Conclusions	101
Acknowledgments	101
References	101
6. Modeling of Spatial Intracellular Signaling Events in Neurons	105
Wendy C. Wenderski and Susana R. Neves	
1. Introduction	105
2. Computational Modeling of Intracellular Signaling	106
3. Imaging Signaling Events in Striatal Neuronal Cultures	112
4. Experimental Validation of Model Predictions	121
Acknowledgments	121
References	121
7. Imaging Chromosome Dynamics in Meiosis in Plants	125
Moira J. Sheehan and Wojciech P. Pawlowski	
1. Introduction	126
2. Technical Considerations	128
3. Protocols and Methods	134
Acknowledgments	141
References	141
8. Analyzing Lysosomes in Live Cells	145
Paul R. Pryor	
1. Introduction	145
2. Visualizing Lysosomes	146
3. Measuring Lysosomal Ions	152
4. Delivery of Phagocytic Material to the Lysosome	153
5. Endocytosis of Membrane Probes to the Lysosome	154
References	156
9. Detection and Quantification of Biomolecular Association in Living Cells using Single-Molecule Microscopy	159
Mario Bramehuber and Gerhard J. Schütz	
1. Movements and Interactions Drive Biomolecular Function	160
2. The Concept: "Please Move to the Dark, so That We Can See You"	162
3. Proofing the Principle	164
4. Some Examples	166
5. A User Guide to TOCCSL	176
6. Analysis	179
7. Conclusions	181
Acknowledgments	182
References	182

10. Visualizing Cardiac Ion Channel Trafficking Pathways	187
James W. Smyth and Robin M. Shaw	
1. Introduction	188
2. Introducing Recombinant DNA for Ectopic Expression of Fluorescent Ion Channel Fusion Proteins	190
3. Isolating <i>De Novo</i> Ion Channel Forward Trafficking	191
4. Recreating Cardiomyocyte-Like Membrane Subdomains in Model Cell Systems	192
5. Tools for Visualizing Forward Trafficking and Delivery of Ion Channels in Real Time	197
6. Data Analysis	201
7. Concluding Remarks	201
Acknowledgments	202
References	202
11. Live Cell Imaging of the Cytoskeleton	203
Eve G. Stringham, Nancy Marcus-Gueret, Laura Ramsay, and Kristopher L. Schmidt	
1. Introduction	204
2. Live Imaging of MTs in Tissue Cultured Cells	206
3. Live Imaging of MTs in Whole Organisms	209
4. Live Imaging of Actin Filaments in <i>C. elegans</i>	211
References	214
12. Fluorescence Single-Molecule Imaging of Actin Turnover and Regulatory Mechanisms	219
Naoki Watanabe	
1. Introduction	220
2. Introducing a Low Density of Fluorescent Proteins in XTC Cells	222
3. Observation of XTC Cells Spreading on Poly-L-lysine (PLL)-coated Glass Coverslips	224
4. Data Analysis	229
Acknowledgments	232
References	232
13. Analysis of Cell Dispersion and Migration by Video-Microscopy	233
Bonnomet Arnaud, Terryn Christine, Cutrona Jérôme, Jonquet Antoine, Birembaut Philippe, and Zahm Jean-Marie	
1. Introduction	234
2. Video-Microscope	235
3. Model of Cell Dispersion	236

4. Models of Cell Migration in Sheet	238
5. Model of 3D Cell Migration	243
6. Quantification	245
7. Conclusions	252
References	252

Section II. Molecules and Ions **255**

14. Real Time Qualitative and Quantitative GLUT4 Translocation Assay **257**

Malepillil Vavachan Vijayakumar and Manoj Kumar Bhat

1. Introduction	258
2. GLUT4 Translocation Assay	259
3. Methods and Procedures	261
4. Conclusions and Future Applications	270
Acknowledgements	270
References	270

15. Advanced Imaging of Cellular Signaling Events **273**

Marek Cebecauer, Jana Humpolíčková, and Jérémie Rossy

1. Introduction	274
2. Selection of Tools and Transfection of Cells	275
3. Imaging of Cell Signaling Events	276
4. Data Analysis	281
5. Summary	287
Acknowledgments	288
References	288

16. Dynamic Imaging of Homo-FRET in Live Cells by Fluorescence Anisotropy Microscopy **291**

Subhasri Ghosh, Suvrajit Saha, Debanjan Goswami, Sameera Bilgrami, and Satyajit Mayor

1. Introduction	292
2. Theoretical Concepts	293
3. Homo-FRET Measurements in an Imaging Modality: Practical Considerations	298
4. Implementation of High-Resolution Steady-State Anisotropy Imaging Modalities	309
5. Detecting Homo-FRET Using Time Resolved Anisotropy (TRA) Modalities	319
6. Prospects and Perspectives	325
Acknowledgments	325
References	325

17. Time-Resolved Luminescence Resonance Energy Transfer Imaging of Protein-Protein Interactions in Living Cells	329
Harsha E. Rajapakse and Lawrence W. Miller	
1. Introduction	330
2. Lanthanide Protein Labels	332
3. Transfection and Cellular Delivery of TMP-Lumi4	335
4. Time-Resolved LRET Microscopy	338
Acknowledgment	344
References	344
18. Imaging of Corticosteroid Receptors in Live Cells	347
Mayumi Nishi	
1. Introduction	348
2. Time-Lapse Imaging of GR and MR in a Single Cell	349
3. Subcellular and Intranuclear Dynamics of GR and MR Examined by FRAP Analyses	354
4. Interaction of Corticosteroid Receptors in the Nucleus	354
5. Notes	357
Acknowledgment	360
References	360
19. Investigating Second Messenger Signaling <i>In Vivo</i>	363
Rüdiger Rudolf, Mathias Hafner, and Marco Mongillo	
1. Introduction	364
2. Multimodal Imaging in Living Mouse Skeletal Muscle	365
3. Adaptations to Tissues Other Than Skeletal Muscle	375
4. Concluding Remarks	380
Acknowledgments	380
References	380
20. Probes for Intracellular RNA Imaging in Live Cells	383
Philip J. Santangelo, Eric Alonas, Jeenah Jung, Aaron W. Lifland, and Chiara Zurla	
1. Introduction	384
2. Imaging RNA in Live Cells	385
3. Limitations of Single-Label Probes and Molecular Beacons	386
4. Imaging Native, Nonengineered RNA in Live Cells with Single RNA Sensitivity Using Exogenous Probes	389
5. Time-Lapse Imaging of Native, Nonengineered β -actin mRNA Granule Dynamics	394
6. Imaging RNA-Protein Colocalization Using MTRIPs	395

7. Conclusions	396
References	397
21. Imaging the Glycome in Living Systems	401
Boyangzi Li, Feiyan Mock, and Peng Wu	
1. Introduction	402
2. Bioorthogonal Chemistry in Glycan Labeling: Merits and Limitations	403
3. Metabolic Labeling of Cell Surface Fucosylated Glycans in Zebrafish Embryos for Fluorescence Imaging	406
4. Labeling Cell Surface Glycans Bearing the LacNAc Disaccharide in Chinese Hamster Ovary(CHO) Cells for Fluorescence Imaging	412
Acknowledgments	416
References	416
22. Intracellular Magnesium Detection by Fluorescent Indicators	421
Valentina Trapani, Monika Schweigel-Röntgen, Achille Cittadini, and Federica I. Wolf	
1. Introduction	422
2. Fluorescent Indicators for Magnesium	424
3. Magnesium Detection in Live Cells by Spectrofluorimetry	428
4. Magnesium Detection in Live Cells by Microscopy	434
5. Future Perspectives	441
Acknowledgments	442
References	442
23. Illuminating Mobile Zinc with Fluorescence: From Cuvettes to Live Cells and Tissues	445
Zhen Huang and Stephen J. Lippard	
1. Introduction	446
2. A Guide to Fluorescent Zinc Probes	448
3. Representative Procedure for Imaging Mobile Zinc in Live Cells	457
4. Imaging Endogenous Neuronal Zinc in Live Cells and Tissues	462
5. Concluding Remarks	464
Acknowledgments	465
References	465
24. Quantitative Fluorescent Live Cell Imaging of Intracellular Ca^{2+} and H^{+} Ions in Malaria Parasites	469
Petra Rohrbach	
1. Introduction	470
2. Live Cell Imaging of Intact Malaria Parasites	471

3. Measuring Ion Homeostasis in <i>P. falciparum</i> Using Fluorescent Indicators	474
Acknowledgment	482
References	482
<i>Author Index</i>	485
<i>Subject Index</i>	511
