

CONTENTS

<i>Contributors</i>	ix
<i>Preface</i>	xiii
1. Genetic and Epigenetic Controls of Plant Regeneration	1
Lin Xu and Hai Huang	
1. Introduction	3
2. Types of Regeneration in Higher Plants	4
3. Tissue Regeneration	7
4. <i>De novo</i> Organogenesis	10
5. Somatic Embryogenesis	17
6. Wound Signal in Plant Regeneration	22
7. Regeneration in Moss	22
8. Concluding Remarks and Perspectives	23
Acknowledgments	24
References	24
2. The Hormonal Control of Regeneration in Plants	35
Ying Hua Su and Xian Sheng Zhang	
1. Introduction	36
2. Spatiotemporal Patterns of Hormonal Response are Critical to <i>De novo</i> Regeneration	40
3. Hormonal Biosynthesis Contributes to the Distribution of the Hormonal Response and <i>De novo</i> Regeneration	45
4. Hormonal Signaling in <i>De novo</i> Plant Regeneration	50
5. Hormone Interactions During Plant Regeneration	55
6. Concluding Remarks and Perspectives	59
Acknowledgments	61
References	61
3. Histone Modifications and Regeneration in the Planarian <i>Schmidtea mediterranea</i>	71
Sofia M. C. Robb and Alejandro Sánchez Alvarado	
1. Introduction	72
2. Histone Families and Variants in <i>S. mediterranea</i>	74
3. A Survey of Histone Modifications in <i>S. mediterranea</i>	77
4. Distribution of Acetylation Marks in Planarian Cells	77

5. Epigenetic Modifying Enzymes in Planarians	79
6. Histone Modifications, Stem Cells, and Cell Lineages	84
7. Conclusions	87
Acknowledgments	91
References	91
4. Control of Growth During Regeneration	95
Gongping Sun and Kenneth D. Irvine	
1. Cells Participating in Regenerative Growth	97
2. Recognizing Tissue Damage to Initiate Regeneration	98
3. Regenerative Growth is Controlled by Signaling Networks	99
4. Control of Regenerative Growth by Organ Patterning	109
5. Suppression of Regenerative Growth	110
6. Conclusion	113
Acknowledgments	114
References	114
5. Cell Death: A Program to Regenerate	121
Sophie Vríz, Silke Reiter, and Brigitte Galliot	
1. Introduction to Regenerative Cell Death	122
2. What Timing for Spontaneous Cell Death During Regeneration?	126
3. Injury Signals Triggering Regenerative Cell Death	131
4. Caspase Activation, a Versatile Tool to Regulate Regeneration	135
5. A Complex Paracrine Control of Regeneration Through Cell Death	142
Acknowledgments	144
References	144
6. Mechanisms of Systemic Wound Response in <i>Drosophila</i>	153
Won-Jae Lee and Masayuki Miura	
1. Introduction	155
2. Basic Processes Involved in Local Wound Responses	156
3. Organismal level of Systemic Wound Response in <i>Drosophila</i>	170
4. Conclusion	174
Acknowledgments	175
References	175
7. Postembryonic Organogenesis of the Digestive Tube: Why Does It Occur in Worms and Sea Cucumbers but Fail in Humans?	185
Vladimir S. Mashanov, Olga Zueva, and José E. García-Arrarás	
1. Introduction	186
2. Mechanisms of Digestive Tract Regeneration in Different Animal Models	187

3. Emerging Principles of Intestinal Regeneration Across Eumetazoans	204
4. Conclusions	210
Acknowledgments	211
References	211
8. Aging and Regeneration in Vertebrates	217
Konstantinos Sousounis, Joelle A. Baddour, and Panagiotis A. Tsonis	
1. Aging and Regeneration	218
2. Effects of Aging on Stem Cells and Cell Turnover	219
3. Age-Dependent Changes of Regeneration Potential After Injury	225
4. Concluding Remarks	230
Acknowledgments	233
References	233
9. Skeletal Muscle Degeneration and Regeneration in Mice and Flies	247
Mamta Rai, Upendra Nongthomba, and Miranda D. Grounds	
1. Introduction	248
2. Skeletal Muscle Formation (Myogenesis) and Maturation in Mice and Flies	249
3. Homeostasis and a Range of Factors Essential for Optimal Muscle Function	255
4. Mechanisms of Muscle Hypertrophy	257
5. Muscle Hypertrophy and Atrophy in Insects: Comparison with Other Species	261
6. Muscle Degeneration Versus Necrosis/Regeneration in Mice and Flies	264
7. Muscle Degeneration in Neuromuscular Diseases	267
8. Sarcopenia: Age-Related Degeneration with Loss of Skeletal Muscle Mass and Function	268
9. Conclusions	272
Acknowledgments	273
Glossary of Terms	273
References	274
10. Mathematical Modeling of Regenerative Processes	283
Osvaldo Chara, Elly M. Tanaka, and Lutz Brusch	
1. Introduction	284
2. Models for the Initiation of a Regenerative Response	288
3. Models for Tissue Patterning During Regenerate Growth	294
4. Models for Arresting the Regenerative Response	303

5. Open Problems	311
6. Conclusions and Perspectives	312
Acknowledgments	313
References	313
11. Re-engineering Development to Instruct Tissue Regeneration	319
Beatrice Tonnarelli, Matteo Centola, Andrea Barbero, Rolf Zeller, and Ivan Martin	
1. Introduction	320
2. Limb Skeletal Development	321
3. Endogenous Bone Repair Processes	324
4. Classical Approaches to Bone Tissue Engineering	326
5. Developmental Engineering of Bone	327
6. Developmental Re-engineering of Bone Tissue	330
7. Conclusions	333
Acknowledgments	334
Glossary	334
References	334
Index	339
