

CONTENTS

<i>Contributors</i>	<i>xi</i>
<i>Preface</i>	<i>xvii</i>
<i>Volumes in Series</i>	<i>xix</i>

Section I. Techniques **1**

1. Laser-Induced Radiation Microbeam Technology and Simultaneous Real-Time Fluorescence Imaging in Live Cells **3**

Stanley W. Botchway, Pamela Reynolds, Anthony W. Parker, and Peter O'Neill

1. Introduction	4
2. Experimental Procedure	10
3. Conclusion/Forward Look	25
Acknowledgments	26
References	26

2. A Cell Biologist's Guide to High Resolution Imaging **29**

Graeme Ball, Richard M. Parton, Russell S. Hamilton, and Ilan Davis

1. Introduction	30
2. Physical Limitations on the Resolution of Conventional Microscopy	31
3. Preparations for High Resolution Fluorescence Imaging	35
4. High Resolution Image Data Acquisition and Processing	39
5. Processing	43
6. Analysis of High Resolution Image Data	47
7. Conclusions	51
Acknowledgments	51
References	51

3. Applications of Fluorescence Lifetime Spectroscopy and Imaging to Lipid Domains *In Vivo* **57**

André E. P. Bastos, Silvia Scolari, Martin Stöckl, and Rodrigo F. M. de Almeida

1. The Challenge of Studying Lipid Domains <i>In Vivo</i> Defied by Fluorescence Lifetimes	58
--	----

2. Importance of Studies <i>In Vitro</i> to Design and Rationalize Studies <i>In Vivo</i>	61
3. Labeling Cell Membranes <i>In Vivo</i> : Lipophilic Probes Versus GFP-Tagged Membrane Proteins	67
4. Cuvette Lifetimes and FLIM: <i>In Vivo</i> Applications	70
Acknowledgments	78
References	79
4. Detecting and Tracking Nonfluorescent Nanoparticle Probes in Live Cells	83
Gufeng Wang and Ning Fang	
1. Introduction	84
2. Techniques and Tools	84
3. Biological Applications	90
4. Cytotoxicity of Nanoparticle Probes	100
5. Conclusions and Future Perspective	101
Acknowledgments	102
References	102
5. Fluorescence Lifetime Microscopy of Tumor Cell Invasion, Drug Delivery, and Cytotoxicity	109
Gert-Jan Bakker, Volker Andresen, Robert M. Hoffman, and Peter Friedl	
1. Introduction	110
2. Preparation of Mouse Mammary Tumor Cell Spheroids in a Collagen Matrix	112
3. Simultaneous Acquisition of Fluorescence Lifetime and Intensity to Monitor DOX Uptake	113
4. Monitoring Drug Uptake Kinetics by FLIM	119
5. Conclusions and Outlook	123
Acknowledgment	123
References	124
6. Measuring Membrane Protein Dynamics in Neurons Using Fluorescence Recovery after Photobleach	127
Inmaculada M. González-González, Frédéric Jaskolski, Yves Goldberg, Michael C. Ashby, and Jeremy M. Henley	
1. Introduction	128
2. Experimental Parameters and Preparation	130
3. Equipment	133
4. Establishing FRAP Conditions	134
5. A Basic FRAP Protocol	136
6. Analysis of FRAP	137

Acknowledgments	145
References	145
7. Fluorescent Speckle Microscopy in Cultured Cells	147
Marin Barisic, António J. Pereira, and Helder Maiato	
1. Introduction	148
2. Technical Challenges of FSM	151
3. Detailed Methodology for FSM in Cultured Cells	153
4. Future Challenges	159
Acknowledgments	159
References	159
8. Green-to-Red Photoconvertible mEosFP-Aided Live Imaging in Plants	163
Jaideep Mathur, Sarah Griffiths, Kiah Barton, and Martin H. Schattat	
1. Introduction	164
2. Expression of mEosFP Fusion Proteins in Plants	167
3. Visualization of mEosFP Probes in Plants	170
4. Uses of mEosFP Probes in Plants	173
5. Post Acquisition Image Processing and Data Creation	177
Acknowledgments	178
References	179
9. Methods for Cell and Particle Tracking	183
Erik Meijering, Oleh Dzyubachyk, and Ihor Smal	
1. Introduction	184
2. Tracking Approaches	185
3. Tracking Tools	187
4. Tracking Measures	192
5. Tips and Tricks	195
Acknowledgments	197
References	197
10. Correlative Light-Electron Microscopy: A Potent Tool for the Imaging of Rare or Unique Cellular and Tissue Events and Structures	201
Alexander A. Mironov and Galina V. Beznoussenko	
1. Introduction	202
2. Observation of Living Cells and Fixation	203
3. Immunolabeling with NANOGOLD	207
4. Enhancement of Sample Contrast, Sample Locating, and Embedding	208

5. Identification of the Cell of Interest on EPON Blocks	211
6. Sample Orientation and EM Sectioning from the Very First Section	212
7. Picking up Serial Sections with the Empty Slot Grid	214
8. EM Analysis	216
Acknowledgments	217
References	218
11. Optical Techniques for Imaging Membrane Domains in Live Cells (Live-Cell Palm of Protein Clustering)	221
Dylan M. Owen, David Williamson, Astrid Magenau, and Katharina Gaus	
1. Introduction	222
2. Sample Preparation and Data Acquisition	224
3. Data Analysis	228
Acknowledgments	234
References	234
12. Single Live Cell Topography and Activity Imaging with the Shear-Force-Based Constant-Distance Scanning Electrochemical Microscope	237
Albert Schulte, Michaela Nebel, and Wolfgang Schuhmann	
1. Introduction	238
2. Shear-Force-Based Constant-Distance Scanning Electrochemical Microscopy for Live Cell Studies: Apparatus, Probes, and Operation	240
3. Selected Applications of SF-CD-SECM Live Cell Studies	248
Acknowledgments	253
References	254
13. Visualization of TGN-Endosome Trafficking in Mammalian and Drosophila Cells	255
Satoshi Kametaka and Satoshi Waguri	
1. Introduction	256
2. Molecular Tools	258
3. Live-Cell Imaging in Mammalian Cells	260
4. Live-Cell Imaging in Drosophila Cells	266
5. Conclusion Remarks	269
References	269
14. Live Cell Imaging with Chemical Specificity Using Dual Frequency CARS Microscopy	273
Iestyn Pope, Wolfgang Langbein, Paola Borri, and Peter Watson	
1. Introduction	274
2. "Noninvasive" Live Cell Imaging	275

3. Experimental Setup	279
4. Maximizing Collection Efficiency for Live Cell Imaging	287
Acknowledgments	289
References	290
15. Imaging Intracellular Protein Dynamics by Spinning Disk Confocal Microscopy	293
Samantha Stehbens, Hayley Pemble, Lyndsay Murrow, and Torsten Wittmann	
1. Introduction	294
2. Instrument Design	298
3. Combination with Other Imaging Techniques	304
4. Specimen Preparation	307
Acknowledgments	312
References	312
Section II. Tools	315
16. Visualizing Dynamic Activities of Signaling Enzymes Using Genetically Encodable FRET-Based Biosensors: From Designs to Applications	317
Xin Zhou, Katie J. Herbst-Robinson, and Jin Zhang	
1. Introduction	318
2. Generalizable Modular Designs	319
3. FRET-Based Biosensors for Monitoring Signaling Enzymes	324
4. Example: A-kinase Activity Reporter (AKAR)	332
5. Summary and Perspectives	336
Acknowledgments	337
References	337
17. Live-Cell Imaging of Aquaporin-4 Supramolecular Assembly and Diffusion	341
A. S. Verkman, Andrea Rossi, and Jonathan M. Crane	
1. Aquaporin-4 (AQP4) and Orthogonal Arrays of Particles	342
2. Approaches to Image AQP4 and OAPs	343
3. AQP4 Diffusion and OAPs Studied by Quantum Dot Single Particle Tracking	345
4. OAP Dynamics and Structure Studied with GFP-AQP4 Chimeras	347
5. Single-Molecule Analysis Shows AQP4 Heterotetramers	349
6. Photobleaching Reveals Post-Golgi Assembly of OAPs	351
7. Super-Resolution Imaging of AQP4 OAPs	351
References	352

18. Coiled-Coil Tag–Probe Labeling Methods for Live-Cell Imaging of Membrane Receptors	355
Yoshiaki Yano, Kenichi Kawano, Kaoru Omae, and Katsumi Matsuzaki	
1. Introduction	356
2. Various Principles Used for Tag–Probe Labeling	357
3. Coiled-Coil Tag–Probe Labeling	360
4. Applications	366
Acknowledgments	368
References	368
19. Monitoring Protein Interactions in Living Cells with Fluorescence Lifetime Imaging Microscopy	371
Yuansheng Sun, Nicole M. Hays, Ammasi Periasamy, Michael W. Davidson, and Richard N. Day	
1. Introduction	372
2. FD FLIM Measurements	376
3. Measuring Protein–Protein Interactions in Living Cells Using FLIM–FRET	385
4. The Strengths and Limitations of FLIM	388
Acknowledgment	389
References	389
20. Open Source Tools for Fluorescent Imaging	393
Nicholas A. Hamilton	
1. Why Open Source Software?	394
2. Open Source Software for Microscopy Imaging and Analysis	406
3. The Future	414
Acknowledgments	415
References	415
21. Nanoparticle PEBBLE Sensors in Live Cells	419
Yong-Eun Koo Lee and Raoul Kopelman	
1. Introduction	420
2. PEBBLE Sensor Designs	424
3. Preparation/Characterization	430
4. Examples	431
5. Summary and Critical Issues	461
Acknowledgments	462
References	462
<i>Author Index</i>	471
<i>Subject Index</i>	495
